We update our handsets frequently, so visit [boost.com.au](http://boost.com.au) for the latest range of handsets and pricing. If you purchase a Boost Prepaid SIM you'll need to have an 850MHz compatible handset for 3G access and LTE band 3 (1800MHz) and band 28 (700MHz) for 4G access. To check if your handset is compatible visit [telstra.com/device](http://telstra.com/device).

**PREPAID MOBILE RECHARGE OPTIONS**

Some Boost SIMs come preloaded with credit. If your SIM doesn't include credit, simply activate your SIM and then recharge the amount that's right for you on Boost Mobile Prepaid.

**WHAT'S INCLUDED**

When you recharge, you'll get inclusions to use on calls, text (SMS & MMS) and data. These inclusions depend on your Prepaid mobile offer and your recharge, so check out what's included before you recharge. Boost offers access to the full Telstra network. Outside of 4G coverage areas, your device will automatically switch to 3G and speeds will be less.

**WHAT'S NOT**

Your inclusions can't be used for some things like calls and text to satellite and premium numbers (eg. 19xx numbers), operator assisted calls (most 12xx numbers), content charges, calls and text to premium international numbers and international roaming. Calls and text to selected standard international numbers are enabled on recharges of \$30 or more only.
