

Special Review: 2012 Film. L.A. Going Down. HD Video

Released in Theaters this Friday 13

November 15, 2009 - 16:34

In 2009, American scientist Professor West travels to a research facility in India, where a colleague Satnam has made a mysterious but alarming discovery: unusually severe storms on the surface of the Sun are having a grave effect on Earth. Professor West contacts his friend Adrian Helmsley, a scientific advisor to the US President, and informs him of the ominous developments. Helmsley attempts to brief President Wilson on Satnam's findings, but is stopped by White House Chief of Staff Anheuser. Events move forward to 2010, by which time President Wilson is aware of what is happening ...div.overlay { width:1040px; height:560px; } #imgplay { margin:63px 0px 0px 190px; } #player { background:no-repeat url('/videos/news/2009/november/catab.jpg') top center; } #splash, #player, #player embed, #player object { width:560px; height:290px; }
