

Awesome Showreel by Pantural. Remastered to HD Video

Rendering Time: 110 days

November 23, 2009 - 14:02

This short was created by Pantural, he is a figure on the 3D VFX scene and occasionally gets time to create his own work. The software packages utilized were: Autodesk 3DS Max 2008 and Mudbox, Adobe After Effects, Sony Sound Forge, Adobe Photoshop, and Sony Vegas. Total animation working time was approximately 5 days. Absolutely breathtaking work that must be seen and passed along. This piece was designed for his personal portfolio.

The story is about four cars: a Chevrolet Camaro, a Ford Shelby Mustang, a Jeep Grand Cherokee and a Lada, and a helicopter pose for some great stills, then combine into one carnage-filled crash. They get overwhelmed by a black substance, probably the same black stuff that was used in Spiderman 3.

Country: Azerbaijan

City: Baku - Quba
