March 05, 2010 - 12:14

For his Master Thesis at Arts et Technologies de l'Image, Mathieu G  rard created "Steel Life", a breathtaking tapestry of textures and light that evokes themes of genesis and rebirth.

While there is not obvious narrative, the film uses abstract realism lovingly rendered imagery inspired by nature to build an associative network of ideas. The lush soundtrack, composed by Mathieu Alvado and performed by the Star Pop Orchestra, adds a dramatic arc to the film.
