

Grand Slam Retractable Batting Cage

AALCO is proud to introduce our series of Bottom Lift Batting Cages. Unlike typical cages that require manually lifting the net up on the framework, then lifting the net to the ceiling, the Grand Slam System is a frameless cage that electrically lifts the net from the floor to the ceiling in less than two minutes.

- Single-key operation
- Optional radio or computer control
- Maintenance free drive shaft system
- Custom built to fit your building conditions
- Net height will be as high as your building structure
- Allows coaches to see trajectory of balls hit
- Allows players to conveniently play catch
- Larger cages allow for infield practice
- Allows more hittable space for coaching convenience
- Nets constructed for #36-320 lb. tensile nylon netting for years of use
- Available with golf netting for more coaching flexibility

Cage in the "Up" position
