QUALITY SOLUTIONS. EXPERT SUPPORT. SINCE 1988.
1-800-275-4576 | +1-815-338-8685 | MACSALES.COM

In terms of interesting, 2020 has to be high on the list. Not the kind of interesting we'd prefer, and I suspect even less so by the time this letter is published. That said, it should also be a time in history where we can appreciate the challenges we have prevailed through and create new hope and expectation for a far different, far better 2021.

Throughout it all, we are glad to be here for you. We have been able to pull out all the stops to ensure the best solutions and experience for you, our customer. We are absolutely here for you, and we exist because of you. Our mission centers around providing top-level customer service, support, and the solutions you need today while preparing to meet tomorrow's needs.

Our team that makes you number one, is number one for operational safety priorities. Being a manufacturer of electronic solutions, we have always taken cleanliness seriously. Hygiene and sanitization have long been a standard operating practice for our team. Visitors have reflected that you can practically eat off the warehouse and manufacturing floors at OWC. And the eats that you wouldn't see aren't there to see, thanks to MERV13 filtration and UV 'kill zone' that combine for a 99.999% effectiveness in capturing/killing all

airborne bacteria and viruses. We are proud to report there has not been a single on-site infection/transmission throughout COVID-19 and we're going to keep it that way.

Team members that can work from home do so. As a result, they have given us a wealth of information about the realities of working from home. Their firsthand experience has helped us more effectively address the concerns of all of those working and learning remotely today.

All of us at OWC genuinely care about everyone's health and well-being and are here to help you day and night with all of your computer, technical, and workflow needs.

2020 was certainly not the year we expected or wanted, but regardless of how you celebrate this year — we do wish you a Merry Christmas, Happy Holidays, and hopefully a better New Year.

*We are in this together,
and we will beat this...
Together.*

THUNDERBOLT 4 VS. THUNDERBOLT 3 WHAT'S IN IT FOR ME?

This past summer, Intel released the specifications and expectations of Thunderbolt 4. It caused quite a stir, initiated a lot of conversation, and created a bit of fear in those heavily invested in Thunderbolt 3.

In a nutshell, Thunderbolt 4 is still Thunderbolt 3. Let's break it all down and answer a few questions about what Thunderbolt 4 is really all about.

CAN A THUNDERBOLT 4 COMPUTER USE THUNDERBOLT 3 DEVICES?

Absolutely! Thunderbolt 4 is a new standard, not a new technology. While Apple users have always benefitted from Thunderbolt 3's remarkable capabilities, PC/Windows computers have had various implementation levels when described as having TB3 (see chart below). Now with TB4, a PC user can be assured that they have the full Thunderbolt feature set.

And yes, you can still use all your TB3 devices, knowing that they are the latest and greatest. A TB4 device merely utilizes a new feature set that supports and interfaces with all that came before.

CAN A THUNDERBOLT 3 COMPUTER USE THUNDERBOLT 4 DEVICES?

Affirmative. Thunderbolt 4 devices are currently Hubs and Docks, that for the first time ever, let you add Thunderbolt 3/4 ports from a single port on your computer. If you are an Apple user, you will need the latest macOS that includes support for this new capability. If you are a PC owner, it's a bit fuzzier – you will need to check with the actual PC maker.

Remember, Thunderbolt 3 and Thunderbolt 4 devices do not displace each other – Thunderbolt 4 is merely adding features and capabilities to the existing Thunderbolt 3 architecture. They all work together. Thunderbolt 4 does not replace Thunderbolt 3 – it just allows for better use of all USB Type-C connected devices.

HOW IS THUNDERBOLT 3 DIFFERENT FROM THUNDERBOLT 4?

Thunderbolt 4 doesn't make Thunderbolt any better – it just makes everything Thunderbolt 3 could already do a standard requirement.

		THUNDERBOLT 4	THUNDERBOLT 3 MAC	THUNDERBOLT 3 PC
Unrivaled Simplicity	One universal computer port	☑	☑	☑
	Accessories with four Thunderbolt ports	☑	☑	
Maximum Performance	Minimum PC speed requirements	40Gb/s	40Gb/s	20Gb/s
	Minimum PC video requirements	Two 4K displays	Two 4K displays	One 4K display
	Minimum PC data requirements	PCIe 32Gb/s USB 3.2 10Gb/s	PCIe 32Gb/s USB 3.2 10Gb/s	PCIe 16Gb/s USB 3.2 10Gb/s
	Required PC charging on at least one computer port	☑	☑	
	Standard, Required PC wake from sleep dock functionality	☑	☑	
	Minimum PC port power for accessories	15W	15W	15W
	Thunderbolt Networking	☑	☑	☑
Security	Required Intel VT-d based DMA protection	☑	☑	

A THUNDERBOLT 4 CABLE IS THE LINK YOU CAN COUNT ON, NO MATTER WHAT THE LINK IS.

Thunderbolt 4 cables herald a new, fully certified, universal compatibility. What does that mean? While others (including some Thunderbolt 3) aren't fully interoperable with all USB-C port uses, Thunderbolt 4 cables will work regardless of the device or computer. Many tech support issues occur when a wrong Type-C cable is used – especially when someone thinks that the one Apple included with their laptop or iPad Pro is a fully enabled Thunderbolt cable. News flash: it is *not*.

So, as long as your Thunderbolt 4 cable is from a reputable, certified manufacturer (like OWC) and is imprinted with a lightning bolt and the number 4, you don't have to worry about what kind of USB-C/Thunderbolt/Power/Display device you're using. It will work 100% of the time at the maximum specification supported by the device and computer. And yes, 40Gb/s Thunderbolt 3 cables also work fine with Thunderbolt 4 devices and computers too.

THUNDERBOLT 3 AND 4 ARE BOTH 'THE LATEST'

In no way does Thunderbolt 4 replace or diminish the great Thunderbolt 3. With OWC, you have and will continue to get the maximum potential out of all Thunderbolt has to offer. Thunderbolt 4 lets us do even more with Thunderbolt 3—with more ports—and that's fantastic!

For more, please read our blog post at www.macsales.com/thunderbolt

THE BOTTOM LINE

As a company devoted to helping keep your computer running longer, faster, and more efficiently, you can be assured that all the great new and used Macs OWC offers will be viable for many years to come. Long live your computer!

Pocket-Sized Powerhouses

PORTABLE SSDS FOR ALL COMPUTERKIND™

Tiny. Tough. Thrillingly fast. The Envoy Pro family of portable SSDs are the ideal companion for all data storage needs. From personal to pro and from desktop to on-the-go.

NEW! OWC ENVOY PRO FX

Up to 2800MB/s | Up to 2.0TB | Mac, Windows, Linux, Chrome OS, & iPadOS

The fastest, most compatible bus-powered portable drive For All Computerkind. The first of its kind to go into space and return to work with yesterday's, today's and tomorrow's Thunderbolt and USB computers/devices. Perfect for audio, video, photography, graphics, gaming, and general data storage/backup uses.

- Flexible compatibility: Macs and PCs, plus iPad Pro, Chromebook, and Surface devices
- Xtremely fast: supports Thunderbolt and USB interface up to 2800MB/s
- OWC Aura SSD powered: up to 6x faster performance vs. other portable SSDs
- Built like a tank: dust/drop/waterproof certified
- Protected: 3 Year OWC Limited Warranty

480GB-2.0TB COMING SOON!

www.macsales.com/envoyprofx

NO MORE INTERFACE WORRIES!

This stealthy and silent drive plugs into to computers, tablets, and smartphones so you can transfer files as fast as our device can go!

NEW! OWC ENVOY PRO SX

Up to 2800MB/s | Up to 4.0TB | Mac & Windows

This super-fast, rugged portable Thunderbolt SSD for daily to production-level audio, design, and photography storage needs.

- Super-fast: up to 6x faster performance vs other portable SSDs
- Super versatile: perfect for A/V, photo, graphics, gaming, and general storage/backup
- Xtremely portable: bus-powered and smaller than most compact size smartphones
- Xtremely rugged: dust/drop/waterproof certified
- Protected: up to 3 Year OWC Limited Warranty

480GB-2.0TB COMING SOON!

www.macsales.com/envoyprosx

ONE SUPER LITTLE BEAST

This SSD handles daily storage to production-level workflows like a true superhero. And its extremely rugged to shrug off the most perilous work and play settings.

NEW! OWC ENVOY PRO ELEKTRON

Up to 1011MB/s | Up to 2.0TB | Mac, Windows, Linux, Chrome OS, & iPadOS

The fastest and toughest mini-sized SSD in the universe. Put massive-sized personal and work files in the palm of our hand while pushing USB-C's bandwidth to the max. Edit and save wherever, whenever on virtually any Mac, PC, or mobile device.

- Unbeatable: up to 2x faster performance than other mini-sized SSDs
- Universally compatible: works with past/present/future Thunderbolt and USB Macs plus iPad Pros, Chromebooks, and Android tablets
- Impenetrable: crushproof, dustproof and waterproof
- Protected: up to 3 Year OWC Limited Warranty

480GB-2.0TB from \$99.00

SMALLER. FASTER. LIGHTER

Half the size of a smartphone and bus-powered, yet able to transfer gigabytes of data in seconds with anything, anywhere.

Backup, Play, & Edit. Faster.

NEW! OWC ENVOY EXPRESS

Up to 1553MB/s | 0GB Add your own drive | Mac & Windows

World's first Thunderbolt-certified, bus-powered 'add your own drive' enclosure that puts super-fast video, audio, and gaming backup and storage in your pocket for easy transport.

- Lightning speed: supports up to 1553MB/s real-world performance
- Certified: first bus-powered enclosure that meets stringent Thunderbolt power requirements
- Easy DIY: uses any NVMe M.2 2280 SSD available today and in the future
- Gets onboard: includes removable slide mount for out-of-the-way use convenience
- Compact: shorter than a ballpoint pen and weighs a mere 3.3 ounces with drive
- Protected: 2 Year OWC Limited Warranty

ADD CHOICE OF DRIVE IN 3 STEPS

Quick DIY solution for today's and tomorrow's storage needs

only \$79.00

OWC ENVOY PRO EX WITH USB-C

Up to 980MB/s | Up to 4.0TB | Mac, Windows, Chrome OS, & iPadOS

Take your photos, videos, and music with you wherever you roam. With lightning-fast speeds up to 980MB/s, you can edit 4K videos and photos or drag and drop files in mere seconds. You can even record directly from USB-C cameras.

- Super-charged: powered by an OWC NVMe M.2 SSD, designed to go everywhere
- Robust: edit large format files directly from the drive
- Mobile: bus-powered and fits in your pocket
- Impenetrable: crushproof, dustproof and waterproof
- Protected: up to 3 Year OWC Limited Warranty

240GB-4.0TB from \$99.00

www.macsales.com/envoyproex

OWC ENVOY PRO EX WITH THUNDERBOLT 3

Up to 2800MB/s | Up to 4.0TB | Mac & Windows

Ultra-fast, portable SSD with military-level protection from drops and bruises. Made to handle in-the-field audio, design, and photography storage needs.

- Production ready: for demanding large-format video VFX, VR and AR
- Powerful: OWC NVMe M.2 SSD + Thunderbolt 3 performance
- Impenetrable: crushproof, dustproof and waterproof
- Protected: 3 Year OWC Limited Warranty

240GB-4.0TB from \$149.75

WORLD'S FIRST PRODUCTS

Explore new frontiers in productivity and creativity. Boldly reach higher and do more. These forward-thinking products transport you into a new future with limitless potential.

OWC THUNDERBAY FLEX 8

World's first Thunderbolt 3 storage, docking, and PCIe expansion solution. p. 10

OWC THUNDERBOLT HUB

For the first time ever add three Thunderbolt/Universal Type-C ports and one USB Port for connecting more storage, devices, and displays. p. 29

OWC CASE BYTE

World's first attached high-speed SSD for 2016 and later 13-inch MacBook Pro. p. 47

OWC ENVOY EXPRESS

World's first Thunderbolt-certified, bus-powered 'add your own drive' enclosure that puts super-fast video, audio, and gaming backup and storage in your pocket for easy transport.

MERCURY PRO U.2 DUAL

World's first dual U.2 bay storage solution that combines blazing-fast NVMe SSD dual performance and massive capacity in a compact design. p. 20

OWC U2 SHUTTLE

World's first U.2 carrier shuttle for 3.5 inch drive bays that combines four NVMe M.2 SSDs into a swappable, high capacity, flexible and RAID-ready storage solution. p. 36

HELIOS 3S WITH NVME INTERCHANGE SYSTEM

World's first U.2 interchange system revolutionizes storage with easy access, swaps and transport of U.2 SSDs up to 16TB. p. 37

www.macsales.com/worldfirs

OWC THUNDERBAY FAMILY

The amount of data you need to access and store efficiently increases daily. With multiple configurations to choose from, the ThunderBay line provides space, speed, and flexibility for your storage needs – today and in the future.

Flex Through Every Workflow

NEW! OWC THUNDERBAY FLEX 8

Up to 2750MB/s | Up to 128TB | Mac

The world's first Thunderbolt storage, docking, and PCIe expansion solution. It's highly configurable to meet your unique workflow needs.

- Versatile: 8 FLEXible drive bays all supporting 2.5-inch/3.5-inch SATA 6Gb/s, and the top four bays also support U.2 NVMe for ultimate speed
- Connected: works with all devices with (1) USB-C and (2) USB-A ports
- Visual: displayPort 1.4 for connecting up to an 8K display
- Expandable: front-side SD 4.0 and CFexpress card readers
- Cutting-edge: PCIe (x16) slot for A/V, storage, RAID, networking, or I/O card
- Protected: up to 5 Year OWC Limited Warranty

DIY Enclosure for Max Configurability \$1,299.00
www.macsales.com/flex

MUSCLE-FLEXING READY SOLUTIONS

8 HDD MAXIMUM CAPACITY CONFIGURATION

Ideal for taming the voracious drive space appetite of RAW, 4K, large format, and VR workflows. Arrives pre-set with RAID 5 speed and protection. Select a recommended PCIe card or add your own to experience more convenient docking and expanded capabilities!

from \$2,199.00

8 ENTERPRISE-CLASS HARD DRIVES

Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.

4 SSD + 4 HDD MAXIMUM FLEXIBILITY CONFIGURATION

Get the best of both worlds, a blazing-fast, high-capacity SSD RAID 0 project drive for large format, multi-stream workflows along with the added long-term storage capacity of HDD RAID 5. Select a recommended PCIe card or add your own to experience more convenient docking and expanded capabilities!

from \$2,579.00

4 U.2 SOLID STATE DRIVES

Nothing speeds up your workflow like large SSD storage. This blazing-fast SSD RAID is perfect for large-format and multi-stream workflows

4 ENTERPRISE-CLASS HARD DRIVES

Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.

1 NVME SSD + 7 HDD MAXIMUM WORKFLOW CONFIGURATION

Ingest and edit live on a hyper-fast U.2 SSD or use the drive as a swappable transport for fast lab processing while being able to edit and store projects on a HDD RAID 5 array. Select a recommended PCIe card or add your own to experience more convenient docking and expanded capabilities!

from \$2,599.00

1 U.2 SOLID STATE DRIVE

This is the fastest FLEX Bay with up to 2750MB/s 4-lane PCIe performance. This is where you can harness the power of U.2 SSDs to experience their workflow enhancing maximum potential.

7 ENTERPRISE-CLASS HDD

Edit and store entire projects on this ultra-capacity HDD RAID array that arrives pre-certified in RAID 5 for the best balance of data integrity and performance. Or, setup the RAID of your choice with flexible user configurable RAID 0, 1, 4, 5, 1+0 (10) options.

PCIE CARD OPTIONS TO ENHANCE YOUR FLEX 8 WORKFLOW

Easily expand your capabilities. Add additional connectivity or storage with ease, or leave the PCIe slot empty for future expansion options.

OWC ACCELSIOR 4M2

Our fastest SSD ever offers up to 2750MB/s of pure performance in Flex 8. It's great for adding additional ultra-high-performance storage to your OWC ThunderBay Flex 8 workflow.
www.macsales.com/accelstor4m2

AKITIO 5-SPEEDN 10G/NBASE-T

Integrate your Flex 8 perfectly into IP-based workflows. Runs up to 10G speed at 100m with Cat-6A cable, or up to 5G with Cat-6 cable.
www.macsales.com/akitio5speed

NEW! OWC THUNDERBAY 8

Up to 2586MB/s | Up to 128TB | Mac & Windows

Eight hot swappable drive bays makes you feel like you're running your own personal data center! Two Thunderbolt ports so you can breeze through business backups, as well as today's highest RAW photo and multi-stream 4K video formats.

- Mix or match: 2.5-inch (no adapter needed) and 3.5-inch HDDs and SSDs
- Connected: second Thunderbolt 3 port for adding up to five additional Thunderbolt devices
- SoftRAID: manages, monitors, and protects your data
- Powerful: daisy-chain six units together for up to 768TB capacity
- Protected: up to 5 Year OWC Limited Warranty

16TB-128TB from \$1,319.00

www.macsales.com/thunderbay8

Edit, Experiment, Create, & Design

OWC THUNDERBAY 4 WITH THUNDERBOLT 3

Up to 1527MB/s | Up to 64TB | Mac & Windows

Our original RAID powerhouse now with Thunderbolt 3 so you can get the most out of your storage, take the brakes off your workflow, and do more.

- Versatile: works with 3.5-inch or 2.5-inch drives - no adapter needed
- Connected: dual Thunderbolt 3 ports + dedicated DisplayPort 1.2 port
- SoftRAID: manages, monitors, and protects your data
- Options: Thunderbolt 3 and Thunderbolt 2 models available
- Protected: up to 5 Year OWC Limited Warranty

4.0TB-64TB from \$649.00

Great drives

Equipment is super solid and support staff is fantastic. No need to look anywhere else.

NEW! OWC MERCURY PRO LTO

Up to 360MB/s native | Up to 12TB native | Mac & Windows

This easily integrated tape backup/archiving solution is a critical requirement to protect and preserve huge volumes of data over time. A built-in handle makes it easy to take it on-set, or on the move - bringing shared data protection to your studio, department, or office computers. This ready to use tape backup/archiving solution is an essential requirement for those who need to protect and preserve important projects or critical data over a long period of time.

- Flexible: built-in IBM-LTO-8 drive reads and writes LTO-8 and LTO-7 tapes
- Store longer: up to 30-year tape longevity and store more: up to 12TB native and up to 30TB compressed storage capacity per tape cartridge
- Consolidate: add an optional data staging SSD up to 16TB
- Simple interface: mount, format, and backup to an LTO tape and hard drive simultaneously via included myLTO® app
- Protected: 5 Year OWC Limited Warranty

From \$4499 with everything you need

www.macsales.com/mercuryprolto

STAGING DRIVE READY

The Mercury Pro LTO has an additional drive bay enabling you to add an SSD as a staging drive. You can then transfer everything to the LTO tape for efficient, consolidated single copies.

www.macsales.com/drives

Archiving Made Drag & Drop Easy

START ARCHIVING IMMEDIATELY

Includes LTO-8 12TB data tape, cleaning tape, Thunderbolt cable, and Imagine Products myLTO® software.

SOLUTIONS FOR EVERY TYPE OF STORAGE. POWERFUL RAID WITH THUNDERBAY AND SOFTRAIID.

OWC hardware and software teams work together daily to create unmatched and powerful RAID solutions that deliver the lightning-fast speed and rock-solid protection our customers demand.

DISCOVER THE BEST WAY TO RAID ON P. 16-17 OR VISIT WWW.MACSALES.COM/SOFTRAIID

ENTERPRISE-GRADE DESKTOP NAS FOR SMALL WORKGROUPS

NEW! OWC JUPITER MINI 5-BAY

Up to 80TB | Intel Xeon D Processor | 10Gb Ethernet

The secure network data storage platform that can be modified to your unique needs while fitting on a desk top for easy access. No more sourcing components, choosing between operating systems, or paying and trusting third-party cloud vendors with your precious data.

- FreeNAS preloaded: world's #1 open source storage OS with user friendly GUI
- Powerfully flexible: handles basic document storage to 4K video projects
- Customizable: free plug-ins for entertainment, collaboration, security, backup, and more
- Protected: up to 3 Year OWC Limited Warranty

SOFTWARE

Work better.

Work together.

THINGS WORK BETTER WHEN THEY WORK TOGETHER.

Our software and hardware teams work together to produce powerful, efficient, and beautifully made technologies. From our reliability-focused hardware that protects your precious data to our software that ensures you get the most out of that OWC hardware to our backend tools that optimize and stress test each solution, we're diligent about ensuring your new OWC solution is ready to perform seamlessly.

Our dedicated team works on every facet of our solutions, from top to bottom, inside and out. Our products are fine-tuned to work exactly as designed and address your needs with pin-point accuracy. It's the OWC Advantage.

Easily Manage, Monitor and Protect Your Data

For over 25 years, SoftRAID has been the most fully featured, robust and powerful software RAID solution available for macOS. Now that "ability" is available for Windows users too!

SoftRAID saves you time and money by making it easier to maintain mission-critical workflows. With SoftRAID, you're no longer locked into expensive hardware RAID technology that's not upgradeable or expandable.

NEW! SOFTRAID LITE RAID 0, 1 | MAC & WINDOWS NOW AVAILABLE! SoftRAID comes to Windows

For the first time ever, you can use SoftRAID on your Mac and your PC. SoftRAID Lite brings incredible speed, security, and shareable cross-platform RAID access to macOS and Windows.

SoftRAID Lite gives you the ability to create super-fast RAID 0 sets or ultra-secure RAID 1 sets. It also protects your data with extensive drive health monitoring.

With the new Windows version of SoftRAID Lite, sharing data has never been easier. Built with MacDrive technology, SoftRAID Lite allows you to create and use HFS+ RAID sets in both macOS and Windows computers, so you'll never have to worry about disk formats again.

SOFTRAID RAID 0, 1, 4, 5, 1+0 (10) | MAC ONLY

SoftRAID gives you all the features found in SoftRAID Lite, plus three additional, advanced RAID levels to offer more protection and security options. In addition to RAID 0 and 1, SoftRAID adds RAID 4, 5, 1+0 (10) for even more speed, security, and flexibility when working with larger RAID sets.

SoftRAID takes data security to the next level. It keeps you in the loop with custom email notifications that let you know immediately when there is a disk error so you can take immediate steps to protect your data.

- Flexible: create RAID 0 and 1 volumes with SoftRAID Lite (Windows and Mac)
- Advanced: create RAID 0, 1, 4, 5, 1+0 (10) volumes and get email notifications for drive and RAID volume health with SoftRAID (Mac only)
- Validate: volume validation ensures sectors can be read, parity is correct, and any potential volume failure is minimized
- Certified: drives are validated before use to ensure they are safe for data storage
- Vigilant: predictive warnings help protect against unexpected drive failure
- Cross-platform ready: built-in MacDrive technology lets you read/write SoftRAID RAID 0 and RAID 1 arrays, and use them interchangeably with Windows and macOS computers
- Outperforms: up to 86% faster than AppleRAID
- Thorough: full TRIM support improves internal and external SSD performance in all RAID levels
- Risk-free: 30-day free trial of fully functional application

With breathtaking performance, multi-enclosure capability, advanced drive monitoring, and downloadable updates, OWC SoftRAID is data center level software for your desktop.

A BEGINNER'S GUIDE TO UNDERSTANDING RAID

When it comes to your photos, videos, and other valuable files, you don't want to skimp on data security and management. Whether it's past archives, existing projects, or future jobs, RAID storage solutions are vital to optimize and protect your digital work.

WHAT EXACTLY IS RAID?

RAID commonly stands for "Redundant Array of Independent Disks." Simply put, a RAID puts two or more separate drives together to act like one. The benefits of this are to keep your data safe, to access your data faster, or some combination of the two. A RAID distributes data across volumes (or drives) in several different ways, depending on the "level" of RAID you choose.

WHAT ARE THE DIFFERENT RAID LEVELS?

There are multiple levels of RAID and each has its own pros and cons regarding the balance of speed and security. RAID levels are denoted by different numerical values (RAID 0, RAID 1, etc.), but these are only for identification and do not signify number of disks, performance or any other metric.

RAID 0	RAID 1	RAID 4	RAID 5	RAID 1+0 (10)
RAID 0: Stripes	RAID 1: Mirrors	RAID 4: Stripes with Dedicated Parity	RAID 5: Stripes with Distributed Parity	RAID 1+0 (10): Stripes and Mirrors
<ul style="list-style-type: none"> • Fastest RAID • No protection from disk failure • Best for scratch storage when editing digital video/photos/media • Requires 2 or more disks 	<ul style="list-style-type: none"> • Safest RAID • Highest level of disk failure protection • Best for critically important data where access speed is not an issue • Requires 2 or more disks 	<ul style="list-style-type: none"> • Fast and safe • Best for general use on SSDs • Super-fast read/write of large files used for video, animation, photography, and graphics • Requires 3 or more disks 	<ul style="list-style-type: none"> • Fast and safe • Best for general use on HDDs • Super-fast read/write of large files used for video, animation, photography, and graphics • Requires 3 or more disks 	<ul style="list-style-type: none"> • Fastest and safest RAID option • Best for businesses or those needing high performance with increased reliability • Requires 4 or more disks

STRIPES? MIRRORS? PARITY? WHAT?!

Striping spreads the data from one volume over multiple drives. Each drive contains only part of the volume.
Mirroring uses multiple drives to create a volume. Each drive contains a copy of the entire volume.
Parity computations are used for fault tolerance by calculating the data in two drives and storing the results on a third. *Dedicated Parity* is when this information is all stored on a single drive. *Distributed Parity* spreads the data across all the drives in the array.

What You Do	What You Need	What We Suggest
Photography, video, and audio editing	Lightning-fast access for scratch disk use	• RAID 0 for data access speed (Caution: RAID 0 gives no protection against disk failure)
Run a data server	Speed, safety, and flexibility	• RAID 5 to give flexibility along with fast data access and full protection from disk failure
Run a business with critical data	Complete protection against disk failure	• RAID 1 for maximum protection against disk failure
Design work, photography, animation, etc.	Fast access, safe storage, and meet deadlines	• RAID 5 (or RAID 4 with SSDs) for great speed, data safety, and the ability to work through disk failure • RAID 1+0 if you have four or more disks and need to write many small files to your disk
Use your computer for work and play, and for storing music, photos, and other important file	Fast access and protection against disk failure	• RAID 5 (or RAID 4 with SSDs) to give fast data access and keep files safe from disk failure • RAID 1+0 if you have four or more disks and need to write many small files to your disk

MACDRIVE

Access Mac Disks on Windows

MacDrive lets you seamlessly access Mac-formatted disks, drives, SoftRAID sets, and AppleRAID sets on a Windows PC. Just connect your drive to a PC, and Windows uses the disk as if it were Windows formatted.

- Straightforward: access almost any direct attached internal or external Mac-formatted disk including hard drives, CDs, DVDs and more
- Pliant: supports read/write HFS+, read APFS
- Mighty: create and partition Mac disks direct from Windows
- Cutting-edge: repair errors on Mac disks – browse Time Machine backups and copy files and folders
- Compatible: works with Apple's Boot Camp and VMware and Parallels

ACRONIS TRUE IMAGE 2021

Complete Cyber Protection | Mac & Windows

Acronis True Image is a powerful backup and antimalware solution that protects you from today's threats. Make accidents, failures, and attacks a thing of the past.

- Flexible backups: from full system images to individual files
- Recoveries: fast and reliable, quickly restore your entire system to the same or new hardware
- Disk cloning: all-in-one recovery drives, end-to-end encryption ensure your data is always safe
- Antivirus: on-demand scans of your full system or those files typically targeted by malware

Free Acronis Data Protection with all OWC external storage solutions

Buy or upgrade to advanced Acronis solutions and cloud backup from \$37.99 visit www.macsales.com/acronis2021forholiday specials

Advanced Antimalware Protection

Easy backup and antivirus protects everything including photos, files, applications, systems, and the devices they're on – through an intuitive interface that's accessible from anywhere.

The Trusted Name in Mac Storage for 20+ Years

OWC MERCURY FAMILY

The OWC Mercury is where we began our rich, storied history of storage solution innovations nearly 20 years ago. It's hugely popular with creative pros, small office/home office use and families with ever-growing storage capacity needs. An incomparable blend of performance, quality, variety, and value.

NEW! OWC MERCURY PRO U.2 DUAL

Up to 2447MB/s | Up to 32TB | Mac & Windows

The perfect combination of blazing-fast NVMe SSD performance and massive capacity in a compact design. It's ideal for routine backups to high-bandwidth pro creative uses.

- Flexible: two drive bays use 2.5-inch or 3.5-inch U.2 SSDs
- Massive capacity: up to eight NVMe M.2 SSDs with OWC U2 Shuttle adapters
- More RAID options: multiple NVMe SSDs offer more RAID choices
- SoftRAID: manages, monitors, and protects your data
- Protected: up to 3 Year OWC Limited Warranty

2.0TB-32TB COMING SOON!

NEW! OWC MERCURY ELITE PRO DUAL WITH 3-PORT HUB

Up to 1000MB/s | Up to 32TB | Mac, Windows, Linux, Chrome OS, & iPadOS

This beautiful solution with a modern design is compact, plug and play ready, and universally USB compatible to handle even the most diverse workflows. The Mercury Elite Pro Dual's convenience, turbo speed, and versatility will quickly make it the centerpiece of your digital lifestyle.

- Universally compatible: works with any USB-equipped computer, tablet, gaming console - anything that supports external storage
- Connect and charge: three USB ports for audio/video mixers, cameras, card readers, tablets, keyboards, mice
- Hardware RAID options: RAID 0 speed, RAID 1 redundancy, span capacity, JBOD/Independent
- Plug and play: no drivers needed and includes USB connecting cables
- Protected: up to 3 Year OWC Limited Warranty

2.0TB-32TB from \$249.00

www.macsales.com/mepdual3port

NEW! OWC MERCURY ELITE PRO DOCK

Up to 773MB/s | Up to 32TB | Mac & Windows

The Thunderbolt 3 do-it-all tool! Ample storage space to create and organize media libraries. The performance you need to work in Adobe Creative Suite, Avid, Affinity Photo, DaVinci Resolve, and others. Connect all your favorite peripherals via USB. Quickly ingest your shoots and drone footage via the frontside card reader. Keep connected at top speed with Gigabit Ethernet.

- Flexible: (2) bays for 2.5-inch or 3.5-inch SATA drives
- Hardware RAID options: RAID 0 speed, RAID 1 redundancy, span capacity, JBOD/Independent
- Easy uploads: frontside SD 4.0 Card Reader
- Visual: dedicated DisplayPort 1.2 for additional up to 4K display
- Connected: (2) USB 3.1 Gen 1 ports
- Protected: up to 3 Year OWC Limited Warranty

NEWERTECH UNIVERSAL DRIVE ADAPTER

Connects to your computer via USB 3.1 Gen 1

The perfect tool to access bare drives via USB - without opening a computer or drive enclosure. Compatible with nearly any 2.5, 3.5, or 5.25-inch drive. It's the go-to access tool for working with bare IDE, ATAPI, and SATA drives.

- Connect: use ANY 2.5/3.5/5.25-inch drive
- All-Purpose: transfer files and access data
- Transform: turn swapped-out drives into external drive
- Expansive: supports hard drives up to 16TB
- Protected: 1 Year Newer Tech Limited Warranty

only \$29.75
www.macsales.com/uda

PRAISE FROM THE PROS

THUNDERBAY FLEX 8 p. 10

"The pandemic has made post-production and working from home feel more isolated than ever, so the Thunderbay Flex 8 has felt like a godsend. With the upper 4 bays configured as an SSD Stripe, it's been perfect as the place to set the WMM Team's Dropbox and Google Drive accounts to, so the Team and I can regularly share files and folders on the cloud without having to worry about running out of space on my computer's internal storage. It's helped me feel more connected with the team, almost as if I'm back in a production company office."

And with the Dock able to quickly access and dump all incoming Shuttle Drives and the Lower 4 bays working as a massive RAID 5 storage set, I am able to use it as the Flex 8 is an All-in-One hub for all of the various projects I have coming in and out with the team."

— **Steven LaMorte**

Director at We Make Movies: A worldwide filmmaking community dedicated to making the movie that you want to see.

THUNDERBLADE p. 15

Chris Vanderschaaf is an award-winning editor, director, & high-speed cinematographer specializing in shooting 1000fps for television shows, commercials, action sports, brand and music videos. As a Phantom camera owner/operator, he lives by the credo "everything looks cooler in slo-mo."

"The OWC ThunderBlade is a game changer! Not only are my offloads and data transfers exponentially faster but I can edit my raw .cine files natively."

— **Chris Vanderschaaf**,
Phantom High-Speed Cinematographer

THUNDERBOLT 3 14-PORT DOCK p. 30

"I'm always striving to make my workflow more efficient and reliable in order to make project deadlines. The more I have to wait for files to transfer, or sessions to load, videos to render, the less time I have for creativity. The Envoy Pro EX drive makes my life so much easier in my studio, or on the road. The Thunderbolt 3 Dock gives me every connection I need and I love that it lets me run my entire home studio off of my Macbook while charging it!"

— **Tony Succar**,

2-time Latin Grammy Awards-winning Artist / Producer

USB-C TRAVEL DOCK p. 31

"Since being at home because of the Pandemic, I'm not traveling to my studio as much. As a producer/engineer/programmer/composer, and software beta tester, I need access to fast and portable hard drives at all times. I need them to be reliable, road worthy, and compact. That's why I choose OWC HDDs, SSDs and peripherals and have done so for the last 16 years. I recently purchased a 2019 MBP to update my portable rig but because this laptop only has USB-C ports, I had to add a device to give me the expandability I need to connect other devices. Of course, I looked to OWC and went with the Travel Dock!

The OWC Travel Dock allows me to quickly connect drives via USB 3 and C, a video monitor via HDMI, and an SD card all with lightning-fast transfer rates! It does all this for an extremely reasonable price."

— **Kwiz Ryan**
Producer, Composer, Engineer, Artist Development

Homeschooling Made Easy

OWC ENVOY PRO EX WITH USB-C

Inside this sleek, award-winning design you'll find a blazing-fast, desktop-class, portable SSD with speeds up to 980MB/s. It's rugged, dustproof, and waterproof to handle life on the go.

All the Thunderbolt You've Always Wanted!

OWC DOCK AND HUB FAMILY

For the first time ever, add more full speed, fully functional Thunderbolt ports to your computer – connect to past, present and future Thunderbolt and USB devices.

NEW! OWC THUNDERBOLT DOCK

11 Ports | Gigabit Ethernet | visit website for latest in compatibility

Add three Thunderbolt/Universal Type-C ports, four USB ports, Ethernet, audio, and an SD card reader to your computer.

- More flexibility: add a mix of up to seven Thunderbolt/USB-C and USB devices
- More reliable sharing and streaming: gigabit Ethernet eliminates low quality patchy Wi-Fi, and is ideal for IP-based workflows and secured networks
- More content: ingest photos and movies at speeds up to 312MB/s via the SD card reader
- More audio: plug headphones and mics into the audio in/out jack

only \$229.00

www.macsales.com/thunderboltdock

NEW! OWC THUNDERBOLT HUB

5 Ports | visit website for latest in compatibility

Add three Thunderbolt/Universal Type-C ports and one USB port to greatly expand the connection possibilities of your computer.

- Plug it all in: same device compatibility and performance whether plugged into this hub or directly into your machine
- More devices: connect more storage, two 4K displays or one 5K/6K/8K display, and accessories
- Powerful: Thunderbolt 4 host port also provides power delivery/charging
- Compatible: Thunderbolt certified for Mac and Windows

only \$149.00

- Up to 10Gb/s transfer speed
- Available in 0.5 m, 0.9 m, and 1.8 m lengths
- Power your laptop, Thunderbolt 3, or USB-C device up to 60W

from \$13.79
www.macsales.com/usbc-cables

OWC THUNDERBOLT 2 CABLES

4K workflow ready

- Up to 20Gb/s transfer speed and Thunderbolt (10Gb/s) compatible
- Available in 2.0 m length
- Available in black

from \$49.99
www.macsales.com/tb2cables

OWC USB TYPE-A TO USB-C ADAPTER

Bridge the technology gaps in your workflow

USB Type-C is the latest USB interface standard, but it isn't backward compatible with thousands of USB Type-A devices still in use. Use this handy adapter to connect your older devices to USB-C-equipped computers, Chromebooks, and docks.

only \$7.99
www.macsales.com/usbc-adapter

OWC CLINGON

Protect Your Cables from Strain/Disconnects

By stabilizing and securing Thunderbolt 3 and USB Type-C cables at the connection point, ClingOn greatly reduces — if not completely eliminates — cable strain and those accidental disconnects that can cause work session interruption and data loss.

only \$7.49 or as low as \$3.86/each in multi-packs
www.macsales.com/clingon

KEEPING YOU IN THE FAST LANE WITH U.2 TECHNOLOGY

You like pushing the limits of your abilities and technology. You depend on OWC products – and knowledge – to keep you pushing ahead in the fast lane. That’s why we’re bringing you up to speed (pun intended) on the emergence of U.2 storage technology and how you can add it to your workflow.

U.2, M.2, NVME, PCIE... MAKING SENSE OF THE TECHNOBABLE

In a nutshell, all those acronyms are about how storage technology has evolved to offer you the best possible performance. Some are communication protocols, while others are physical connections. Together they lead us to where we are today with fastest SSD storage.

LOADING...

LET'S GET PHYSICAL

PCIe SSD performance blew everything else away, so the race was on to incorporate PCIe SSD storage into thin laptops and tablets. Thus, the cost effective M.2 SSD was born. Often referred to as a "blade" or "gumstick" due to their physical shape and size, SSDs with an M.2 connector also became ideal for creating extremely fast pocket-sized drives found in the OWC Envoy line (p. 6) which are powered by the OWC Aura P12 M.2 SSD (p. 44).

EFFECTIVE COMMUNICATION

PCIe SSDs were first used in the enterprise market as add-in cards because they offered a faster path of data transfer, but they were constrained by hardware and software technologies designed for slower hard drive storage. Enter NVMe (Non-Volatile Memory Express), designed from the ground up specifically for PCIe SSD storage.

LOADING...

U.2 (AND OWC) DOES IT ALL

Created as an extremely cost-effective "one-for-all" server and enterprise drive interface, a U.2 connector is designed to work with SATA, SAS, and NVMe drives. Recognizing this was a great opportunity to build upon the proven performance attributes and affordability of M.2 drives, OWC began developing U.2 connector equipped solutions because U.2 drives offer key advantages over M.2 drives:

- 2.5-inch or 3.5-inch form factor for common drive bay installation
- Larger form factor allows higher storage capacities
- Larger form factor provides built-in heat dissipation
- Easy access hot swap support

QUICK REFERENCE GLOSSARY:

M.2: connector type...uses PCIe or SATA communication

PCIe: computer hardware communicationsystem used to transfer data between components like RAM, CPU, & SSD

U.2: connector type...uses PCIe, SAS, and SATA communication

SATA: computer hardware communication system originally designed for HDD data transfer and later used with SSDs

NVMe: optimizes SSD data flow over PCIe

INNOVATIVE OWC U.2 SOLUTIONS FOR YOUR WORKFLOW

Blazing speed, more capacity, and easy hot swap access...just a few reasons why you should consider incorporating U.2 solutions into your workflow. Naturally, OWC offers a variety of groundbreaking ways to immerse yourself in the latest advancement in storage technology. All with proven OWC reliability and pro-level performance.

p. 36

U.2 EARLY ADOPTERS

Does your end-to-end workflow have PCs or enclosures with 3.5-inch drive bays? The innovative OWC U2 Shuttle is the world's first U.2 carrier shuttle for 3.5-inch drive bays that combines four NVMe M.2 SSDs into a swappable high capacity flexible RAID ready storage solution.

How to Use it:

Swap out and ship the compact and lightweight U2 Shuttle to the post lab where it swaps into a 3.5-inch U.2 equipped PC or storage solution quickly and economically.

p. 37

NOTEBOOK/SFF/AIO USERS

Notebook, small form factor, and All-In-One computers typically lack the room for an expansion slot. Now you can add video production, audio processing, data storage, networking, and other pro-level capabilities to your workflow with the OWC Mercury Helios 3S external PCIe expansion solution.

How to Use it:

With the OWC U.2 NVMe Interchange System, you can offload the day's shoot into the OWC Mercury Helios 3S, quickly pull the Interchange System tray-mounted U.2 NVMe SSD, out and send the drive on to post production. Imagine... no more tedious drive enclosure disassembly to access the storage drive or costly shipping of the entire enclosure to the post lab.

p. 21

p. 36

PROS SEEKING FAST & MASSIVE CAPACITY

Looking to add massive – up to 64TB coming soon – fast U.2 storage to your workflow? The compact, dual-bay Mercury Pro U.2 Dual storage solution is your ticket! It offers the flexibility of multiple drive configurations to meet your specific need

- 2.5 or 3.5-inch NVMe U.2 SSD in each bay
- A single NVMe M.2 SSD with a U.2 adapter in one or both bays
- Up to eight NVMe M.2 SSDs via the OWC U2 Shuttle, the world's first U.2 carrier shuttle for 3.5-inch drive bays that combines NVMe M.2 SSDs into a high capacity, flexible RAID ready storage solution

How to Use it:

Mercury Pro U.2 Dual solutions with the OWC U2 Shuttle delivers faster speed and more RAID options than typical dual drive enclosures. You can ingest and edit video footage in real-time or backup large content libraries in a blink. While a performance heavyweight, this storage solution easily fits on a D T cart, in a rack, or on your office desktop. When you need to send your project to the lab, the OWC U2 Shuttle's lightweight design dramatically lowers shipping costs.

p. 10

p. 36

PROS SEEKING A WORKFLOW WORKHORSE

Massively boost your workflow productivity with ThunderBay Flex 8. It's the world's first 3-in-1 Thunderbolt 3 storage, docking, and PCIe expansion solution for digital imaging, VFX, video production, and video editing professionals. Four of its eight 2.5 or 3.5-inch drive bays can use U.2 NVMe SSDs. There's an abundance of ports for connectivity, card readers for fast media ingest, and an expansion slot to expand your capabilities.

How to Use it:

Its four U.2 bays let you use U.2 SSDs by themselves, or put them into an OWC U.2 NVMe interchange system tray for transport/shipping. Or, combine up to 16 M.2 SSDs with the OWC U2 Shuttle for up to 128TB capacity coming soon to create an unbeatably fast RAID volume that's easily swapped and transported. With the PCIe expansion slot, you can add a 4K video capture card for direct ingest of multi-stream high-res footage. Or, add an audio card to record high-quality tracks, then edit and archive tracks.

A Galaxy of Possibilities Awaits

IDEAL FOR MEDIA PRODUCTION WORKFLOWS!

NEW! OWC U2 SHUTTLE

Up to 1556MB/s | Up to 16TB | Mac & Windows

World's first U.2 carrier shuttle for 3.5-inch drive bays that combines four NVMe M.2 SSDs into a swappable, high capacity, flexible and RAID-ready storage solution. Built for OWC storage and PCIe expansion solutions, this innovative carrier shuttle can also be used with U.2 port equipped PCs and servers.

- Configurable: choose a solution or add your own NVMe SSDs
- RAID ready: RAID 0, 1, 4, 5 or 1+0 (10) for speed, protection, or the best of both attributes
- Compatible: use with OWC Helios 3S, ThunderBay Flex 8, Mercury Pro U.2, as well as in a computer with U.2 support and an available 3.5-inch drive bay
- Easy swaps: move between OWC U.2 devices, PCs, enclosures, and servers
- Ideal for media workflows: dramatically lowers production-to-lab shipping costs

OWC MERCURY HELIOS 3S

Up to 40Gb/s | PCIe Expansion | Mac & Windows

Give your slotless Mac, Windows PC notebook, or desktop machine the gift of PCIe card use. You can also add video production, audio processing, data storage, networking, and other pro-level capabilities to your workflow via Thunderbolt 3.

- Lightning-fast: 40Gb/s transfer speeds (2) Thunderbolt 3 ports
- See more: dedicated DisplayPort for adding a high resolution display
- Charge while working: 85W of notebook charging
- Play your card: uses half-length, full-height, single or double-width cards
- Easy card installs: no tools required
- Secure workflow: locking 12V power connector
- Protected: 3 Year OWC Limited Warranty

only \$229.75
www.macsales.com/helios3s

TURN MERCURY HELIOS 3S INTO A BLAZING FAST EXTERNAL SSD!

With the Accelsior PCIe SSD family, you can choose "add your own" single NVMe SSD PCIe cards all the way to four blade configured solutions that deliver over 6000MB/s real-world speed. p. 42-43

OWC U.2 NVME INTERCHANGE SYSTEM

Turns Mercury Helios 3S into a Swappable U.2 NVMe SSD Storage

Revolutionize your data storage. A locking drive bay and protective carrier tray offer the ideal combination of security with easy access, swaps, and transport of U.2 NVMe SSDs up to 16TB. Speeds over 6x faster than SATA drives. Ideal for both production and post-production operations!

- Full speed ahead: up to 2,631MB/s real-world tested performance
- Durable solution: protects U.2 connector for improved drive longevity and investment
- Use anywhere: enables U.2 NVMe drive use in the studio or out in the field
- Designed for global workflows: dramatically lowers production to lab shipping costs

only \$69.75

MAC PRO 2013–2019 MODEL

Any iteration of Mac Pro is a highly productive workhorse, and when purchased through MacSales.com, you can count on all the horsepower at a fraction of the price of buying new. This 2013 to 2019 Mac Pro offers the ultimate in expansion ease and upgradability. Add this Mac Pro powerhouse to your workflow at dramatic savings!

- Memory up to 128GB
- Storage up to 2.0TB SSD
- Up to 2.7GHz 12-Core Intel Xeon E5-2697v2 Processor
- Up to AMD FirePro D700 x 2
- 6 x Thunderbolt 2 Ports
- Built-in 802.11a/b/g/n/ac Wi-Fi
- Built-in 10/100/1000BASE-T Gigabit Ethernet

MAC MINI 2018–CURRENT

The Mac mini packs a powerful computing punch into a small space. When you purchase one through MacSales, rest assured you are getting all that power at huge savings versus buying new.

- Memory up to 64GB
- Storage up to 2.0TB SSD
- Up to 3.2GHz 6-Core Intel Core i7 Processor
- Intel UHD Graphics 630
- 4 x Thunderbolt 3 Ports
- Built-in 802.11a/b/g/n/ac Wi-Fi
- Built-in 10/100/1000BASE-T Gigabit Ethernet

OWC MERCURY ELECTRA 6G

Up to 530MB/s | Up to 4.0TB | 2.5-inch SATA SSD

With burst speeds up to 530MB/s you can dramatically improve everyday computing needs with plug-and-play ease. This SSD delivers the latest in flash NAND and controller technology, utilizing SLC and 3D NAND for long-lasting, power-efficient performance. All that adds up to the performance and reliability needed for demanding everyday computer use.

- Improves everyday computing: fast boots, app loads, and system responsiveness
- Built to perform: latest flash NAND and controller technology
- Dependable: wear leveling automatically distributes data evenly
- Intelligent integrity: manages free space and gradually refreshes data
- Extends battery life: standby power benefits for longer runtimes between charges
- Protected: 3 Year OWC Limited Warranty

120GB–4.0TB from \$31.99

OWC MERCURY EXTREME PRO 6G

500MB/s+ Sustained Over Entire Drive | Up to 4.0TB | 2.5-inch SATA SSD

When you require the fastest peak sustained speed and capacity in a 2.5-inch SATA SSD, only an Extreme Pro will do the job. It suits every use case, from performance enthusiasts to production professionals. If you have a Mac or PC with a 6G SATA drive bay, this is the fastest 2.5-inch SSD available today.

- Game changer: the best performance upgrade for Macs and PCs with SATA drive bay
- No slowdowns: maintains read/write speeds exceeding 500MB/s over the entire drive capacity
- Saves money: get sustained speed instead of replacing a drive that slows down over time
- A/V ready: use with Blackmagic, Sound Devices, Atomos devices
- Universal fit: includes full-sized 7 mm–9.5 mm profile spacer for 100% secure and compatible use
- Protected: 5 Year OWC Limited Warranty

240GB–4.0TB from \$69.00

1TB now only \$179.00

Memory Made for Your Mac!

At OWC, we want your Mac to perform faster and last longer. That's why we engineer memory that is specifically tested and optimized for Mac.

WHY BUY OWC BRAND MEMORY?

- Revolutionary: meets or exceeds manufacturer specification
- Vetted: rigorously lab tested in-house to ensure superior quality, compatibility and reliability
- Supported: backed by industry leading lifetime advanced replacement. If you need your OWC memory replaced, we will ship it to you the same day
- OWC MaxRAM Certification: Max our Mac with up to DOUBLE the factory-supported limit

HELP... IF YOU NEED IT

An OWC Memory upgrade is easy to install yourself. Our library of free installation videos guide you through each step in the process. And our award-winning tech experts are standing by to help walk you through your upgrade via phone, chat, or email.

SUSTAINABILITY IS GOOD BUSINESS

As we grow, so does our commitment to sustainability. We're proud to be a zero-emissions company, and always working towards minimizing our environmental impact. In 2015, we reached our goal of generating more power than we consume. Sustainability can also be economical. We provide customers with products that allow them to maximize the longevity of their technology and we extend this approach to our business operations.

We have worked tirelessly to build sustainable practices into all levels of our company. We currently recycle 97 percent of our solid waste materials. And our efforts haven't gone unnoticed: We're Energy Star certified, and in 2010, we received the LEED® Platinum Certification by the Green Building Certification Institute

SUSTAINABILITY AT-A-GLANCE

- Nearly zero waste with widespread recycling programs
- Eco-friendly, recyclable packaging
- First U.S. technology manufacturer with a fully wind powered on-site turbine
- A LEED Platinum and Energy Star certified building
- Recycle 97% of solid waste materials
- One of the largest privately-owned solar arrays in Illinois

WIND POWER

Clean, limitless, efficient. OWC's wind turbine is the foundation of our environmentally responsible alternative energy efforts. We kicked off our on-site energy program with the installation of a Vestas V39-500kW wind turbine in 2009 at company headquarters in Woodstock, IL. OWC quickly became the first manufacturer/distributor in the U.S. to become 100% on-site wind powered. The wind turbine alone in Woodstock generates more power than is consumed at this location.

GEOHERMAL HEATING AND COOLING

Corporate energy heating and cooling systems pose a large pollution risk for the communities in which they operate, but we aren't going down like that. That's why OWC headquarters in Woodstock utilize a geothermal heating and cooling system. Unlike standard operations, we use an environmentally safe, biodegradable liquid in a closed loop — so there is never any risk of pollution.

SOLAR POWER

Go ahead...call us obsessive. Not content with harnessing the power of the wind and earth, OWC adopted solar power as an energy source at our two largest locations in Woodstock, Ill and Austin, TX. In 2015, we installed and activated a solar power system in Woodstock to augment our existing wind power turbines. The solar system consists of 770 American-made Sun Power solar panels installed on the roof of the building, making it one of the largest privately-owned solar arrays in Illinois.
