FIXED AND MOBILE HIGH-SPEED BROADBAND
MAY 2019

High-speed broadband leader SFR continues its roll-out:
4G : nearly 99% of the population covered
Fiber[1] : more than 13 million Fiber connections

Mobile high-speed broadband

- **57 new 4G sites deployed until end of May 2019**
- **In the month of May, 4G coverage was brought to 196 towns and 4G+ coverage was brought to 590**
- **4G+ 300 Mbits/s was deployed in more than 1,500 towns**
- **Rennes and Bayonne-Anglet-Biarritz: news cities in which 4G+ 500 Mbit/s is being deployed**

Fixed high-speed broadband

- **France's first Fiber[2] infrastructure provider, with 13.1 million eligible FTTx connections**
- **149,251 new connections across 154 towns in May 2019**

Mobile high-speed broadband:

57 new 4G sites deployed until end of May 2019

In May 2019, SFR continued the extension of its 4G network by bringing 57 additional sites into service. SFR has now 40,146 antennas. In the first quarter of 2019, SFR covered 98.7% of the population in 4G

Furthermore, 3 years ahead of schedule, SFR has achieved its target of 90% coverage of populations in Lesser Populated Zones, as stipulated by the obligatory requirement of 17th January 2022.

In the month of May, 4G coverage was brought to 196 towns and 4G+ coverage was brought to 590

2 Fiber with optical or coaxial termination, according to elibility

In May, SFR brought 4G to 196 additional towns, and 4G+ to 590 towns. For example, *La Turbie (06), Cuise-la-Motte (60)* and *Cugand (85) have* enjoyed the arrival of 4G, and *Brignoles (83), Cerelles (37), Cours (46)* have benefited from 4G+. *(See lists below).*

4G+ 300 Mbits/s was launched in 1,537 towns

SFR continues its investments which will bring 4G+ of up to 300 Mbit/s to its clients, allowing a theoretical maximum speed 3 times faster than 4G. This technology is already being rolled out in 33 major urban centres (of more than 100,000 residents) across a total of 1,537 towns *(See lists below).*

Rennes and Bayonne-Anglet-Biarritz: news cities in which 4G+ 500 Mbit/s is being deployed

In the first quarter of 2019, SFR took an important new step. After *Bordeaux, Lyon, Saint-Etienne, Marseille, Toulon, Nice, Montpellier, Avignon, Nantes, Tours, Paris, Strasbourg, Clermont-Ferrand, Angers* and *Rouen* SFR continues its deployment in the 4G+ 500 Mbit/s with the launch this month of *Rennes and Bayonne-Anglet-Biarritz*

Therefore, customers using a fixed rate 4G plan and a compatible device will benefit from considerably increased data rates at no extra cost and will thereby be able to increase, as they wish, their digital usage when mobile.

4G+ up to 500 Mbit/s is a progression from the standard 4G. Thanks to the aggregation of 4 x 4G frequency bands, 4G+ up to 500 Mbit/s is capable of providing a theoretical maximum speed of 593 Mbit/s, thereby offering unequalled comfort and navigation speed for the user on the go.

Fixed mobile high-speed broadband:

France's first Fiber[3] infrastructure provider, with 13.1 million eligible FTTx, SFR deployed 149,251 new connections across 154 towns in May 2019

In May 2019, SFR continued its deployments across the country, and 149,251 residences and local professionals were made Fiber-connectable in 154 towns.

Among those, 100 have received Fiber for the first time, for example *Trévoux(01), La Sentinelle(59), Saint-Léger-du-Bourg-Denis(76)* and *Soisy-sous-Montmorency(95),* and 54 have enjoyed an extension of their Fiber coverage, such as *Châteauneuf-les-Martigues (13), L'Isle-d'Abeau (38), Margny-lès-Compiègne (60),* and *Draveil (91), (See lists below).*

Currently, SFR's Fiber[4] services are available in more than 3100 French towns and more than 2,200 towns enjoy speeds of up to 1Gbit/s.
