

# Life Sciences Online Content and Custom Course Development

**Comprehensive and flexible learning by UL Solutions**

**UL Solutions is a leading provider of compliance-based life sciences training, including health and safety best practices. We offer customized education for organizations of all sizes, so your employees can learn the skills and knowledge they need to be productive and successful on the job.**

UL's learning solutions help you meet your learning needs with our extensive, up-to-date library of hundreds of online courses. Select courses from our catalogs, customize existing courseware or let us create the content you need.

Create courses with our adult learning and subject matter experts. They specialize in research and instruction, stay on top of regulatory changes, and continually build and update online lessons applicable to the life sciences industries. Our course library includes titles in a wide variety of languages to ensure your employees receive a consistent foundation of knowledge worldwide.

- Employees can access and manage their training courses 24/7 from virtually any internet-connected device
- Fully customizable courses feature engaging content and activities to reinforce lessons and optimize learning
- Courses by UL Solutions are SCORM-and AICC-conformant

## Extensive regulatory content catalogs

Regulatory obligations demand a particular set of learning requirements. From pharmaceuticals, medical devices and biologics to data integrity and ethics, our life sciences professionals help ensure that your educational material is up to date and addresses your learners' needs. The UL Solutions course catalog includes:

- Pharmaceutical Good Manufacturing Practices (GMPs)
- Pharmaceutical Clinical
- Pharmaceutical — Sales and Marketing
- FDA Inspections and Enforcement
- HR Compliance and Risk Management
- Ethics and Corporate Responsibility
- Medical Device GMPs
- Medical Device Clinical
- Medical Device — Sales and Marketing
- Global Regulatory
- Data Integrity
- Environment, Health and Safety (EHS) for Life Sciences

## Co-authored courses by the U.S. FDA

Under a co-development agreement, UL Solutions works cooperatively with the U.S. Food and Drug Administration (FDA). The content produced through this collaboration empowers our pharmaceutical, biologics and medical device customers with the same information, level of preparedness and learning the FDA relies on. In addition to the FDA's content, we provide standardized courses on issues regulated by federal agencies, including the International Conference on Harmonization (ICH), Centers for Medicare and Medicaid Services (CMS) and the U.S. Department of Health and Human Services (HHS).

## Create™

UL Solutions provides customers with courses in an editable format so they can modify the content themselves.

Using our Create™ editing and authoring tool, you can:

- Customize a course's logo, text, images and audio
- Develop your own custom content
- Leverage our team to build courses that you can maintain moving forward

## Our learning professionals are ready to help you succeed

An organization's greatest competitive advantages are its processes, systems and procedures, and people.

To capture this knowledge and make it available to employees and outside vendors, companies are packaging their critical methods and techniques into online courses. The challenge is to maximize information retention based on proven principles.

That's why hundreds of companies have partnered with UL Solutions to create effective, customized content.

## Create engaging courses that help address your regulatory and performance-based training needs

- Critical organizational knowledge in a graphic-rich, interactive format
- Mobile-ready player
- Developed using proven adult learning principles to ensure behavior change

## Courses can reside on our ComplianceWire® learning management system (LMS) or yours

ComplianceWire® can host custom courses, or we can package them as SCORM-compliant courses and deliver them to you for hosting on your LMS.

### Choose your course customization level

Our team provides a range of customization options based on your budget and the risks associated with the subject you've targeted.

### Develop a course from existing materials

We'll work with your existing files to develop a course that contains the proper instructional strategy based on the knowledge you want to present (e.g., facts, concepts, principles, problem-solving). The course will build on your existing content to deliver engaging animations and graphics as well as high levels of interactivity to make the material more relevant to the learner.

### Customize one of our standard courses

Choose a course from our standard options and add your branding and unique content.

### Develop a course using new content

Our team can work with your subject matter experts or provide industry specialists to help you develop and deliver relevant training programs to employees and third parties.

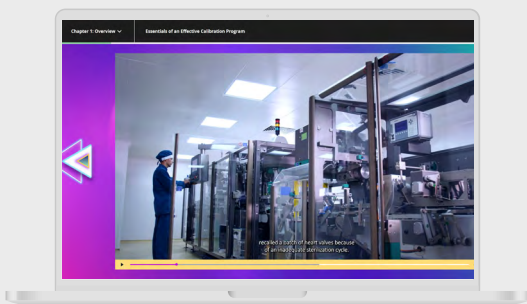

### Maximize training results by incorporating:

- New courses on any topic
- Customized off-the-shelf training
- Performance support materials
- Online learning for legacy classroom topics
- Microlearning courses
- Mobile learning solutions

### Accommodate global learners

Our team provides translation with localization for our global customers' customized course content on a per-project basis. Each professional linguist is a native speaker of the target language experienced in adapting similar material from English.

We deliver these courses to you via our multilanguage capability. Assign once and deliver to all language audiences.

# About ComplianceWire®

ComplianceWire® is an industry-leading compliance training Learning Management System (LMS) designed specifically for highly regulated industries. Our team designed the platform to effectively and efficiently automate the creation, delivery and reporting of role-based training, qualification and compliance programs for the life sciences industry.

U.S. and global pharmaceutical, medical device and biologics companies as well as global regulatory authorities in the United States, China and India use this time-tested technology extensively.

We live in a complex, interconnected world that's on the move. As global and local regulatory requirements evolve, consumers demand transparency and accountability, empowered by new technologies, social media and data. Complexity is increasing—and presenting new business opportunities.
