PureOHS™ Incidents Module
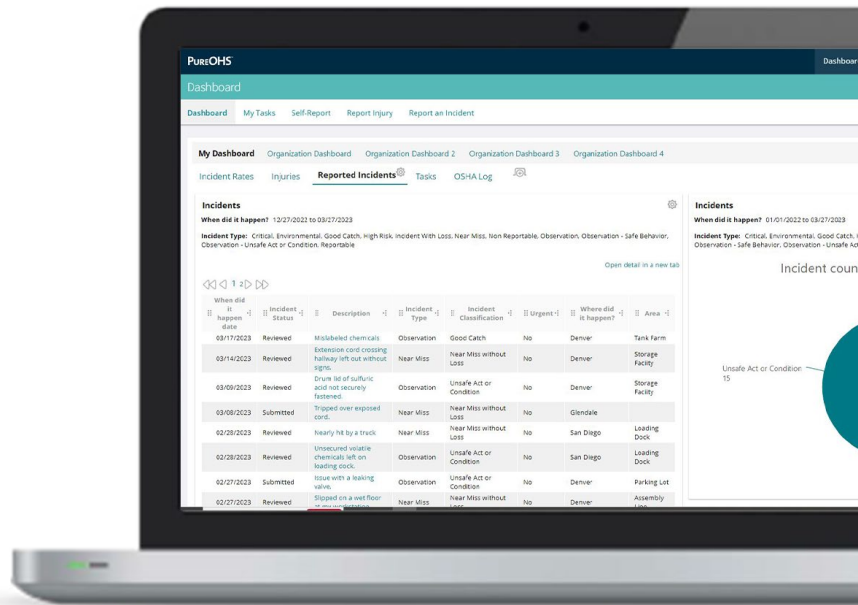

Promote workplace health and saftey

The PureOHS Incidents module simplifies safety management with the functionality your team needs. Allow managers, supervisors and other employees to easily submit incidents, near misses or other conditions that could lead to injury. Quickly review data to assign follow-up tasks and take action to mitigate future risks.

Not every safety program is the same. Incidents is built with highly configurable forms, reports, graphs and real-time dashboards to give users the information they need in the format best suited for your organization.

Key benefits

- Scalable platform that can grow across multiple sites

- Customizable forms, reports and dashboards

- Full integration with other PureOHS modules

- Mobile accessibility

- Automatic notifications for new or updated incidents, investigations and injuries

Reporting to OSHA or other regulatory bodies?

The PureOHS Incidents module keeps all your data stored in one place so you can analyze and report efficiently while meeting compliance requirements from the Occupational Safety and Health Administration (OSHA), International Organization for Standardization (ISO), Occupational Health and Safety Assessment Series (OHSAS) and others.

Advantages

- Involve employees in the process of submitting incidents and reporting near misses

- Follow up on incidents immediately by assigning corrective and preventative action to specific users

- Identify trends and implement follow-up steps without delay

- Quickly generate required OSHA reports (300, 300A, 301)

- Evaluate overall safety performance through configurable dashboards and reports

- Increase health and safety accountability throughout the organization

- Integrate health and safety data to improve predictability and decrease incidents

- Receive instant notifications regarding new or updated incidents, investigations and injuries so that immediate action can be taken

Incidents seamlessly integrates with our other PureOHS modules, such as Case Management, to provide a comprehensive solution for managing employee health and safety. By utilizing this robust safety management tool, you can make better-informed decisions that help improve employee health and prevent injuries from occurring in the first place. Accessible on any device, simply open your browser and log in to the application.
