

PureOHS™ Module: compliance and surveillance

The PureOHS™ compliance and surveillance module makes medical compliance management easier. Whether you're a manufacturer, a healthcare facility, a municipality or any other organization struggling to track employee compliance with OSHA, CDC or internal regulations, PureOHS™ can help.

Oversee the compliance rates of your most complicated surveillance programs, including respirator fit testing, hearing and vision testing, immunizations and many others. Quickly understand which employees are in and out of compliance at a glance and take action to fill the gaps.

PureOHS™ is a web-based system available on most devices and can be used anywhere with an internet connection. Installation involves simply opening your browser and logging into the application.

Key benefits

- Customized dashboard tailored to your specific reporting needs
- Flexible filters that provide current status across the company, such as by department, location or supervisor
- Email reminders for upcoming or past-due mandatory surveillance, vaccination or other testing requirements
- Simplified encounters log for easy viewing and reporting
- Event management for rapid entry of encounters
- Configurable encounter screens to support streamlined workflow
- Electronic forms that employees or clinic users can complete and sign, eliminating paper documents
