## New course: ABR/S Development and Customization II

This course **continues from the ABR/S Development and Customization I course** where we look at the way security is implemented in ABR/S and the relationship to organizational entities. We will cover how ABR/S makes use of **spreadsheets for applying configuration** to the systems, **bootstrapping in relation to data management**, **how this interacts with the different phases of a client's implementation**, and **how reports are customized within the ABR/S framework**.

## New course: Avaloq Message Interface (AMI Messaging)

Ever heard of the **Avaloq Message Interface, or AMI** for short? It's a crucial part of the Avaloq Open Interface concept. Essentially, it's a **highly flexible infrastructure** that supports complex message structures, allowing **Avaloq Core** to **send and receive structured, text-based and standardized messages**. Why is this so important? Well, it **enables Avaloq Core to be integrated with third-party systems (TPS)**. AMI is the component of the Avaloq Message Engine that **builds outgoing messages and interprets and processes incoming ones**. Sign up now!
