**Fibreware™** is our bespoke product line which takes spent fibre from sugarcane and turns it into foodware you love. Our quality weight can hold even your wettest meals for takeout.

- Made from renewable sugarcane fibre (bagasse)
- Perfect for hot and cold takeout
- Freezer friendly to -13°C (-25°F)
- Oven and microwave friendly in temperatures to 100°C (210°F)
- Compostable and biodegradable
- Available in commercial and retail packaging
- Bagasse is processed with non-elemental Chlorine, and finished product sterilized by temperature and UV light

PLA Lid for 32oz Burrito Bowl*	WC-BOLCSUBB-32	300

For additional bowls, please see pages 15 and 24

\* Special Order. Please contact your sales representative for further details.

### Quality Weight Products

BSIbio's quality weight sugarcane offers a thicker and more durable product than typical sugarcane containers on the market. Our quality weight products are also less prone to heavy "sweating" when used with hot saucy items. Custom economy weights are possible if high performance is not required.

\*At BSIbio, "sweating" refers to the presence of moisture on the outside surface of your Fibreware™, which is minimized through our quality weight products. Heavy sweating experienced with lower quality products can compromise performance.

For additional trays, please see page 25 and 31

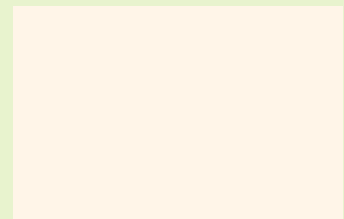

### Want the 'Natural Look'?

Our Fibreware™ products are manufactured with bleached fibres using non-elemental chlorine, producing a soft and smooth ivory colour product. If a container with an unbleached 'kraft'-style colour is more your style, a number of our Fibreware™ products can be custom ordered in the unbleached form.

Please note there is a minimum quantity for custom orders - contact us for more information.

Unbleached Fibre

Bleached Fibre

**We have multiple product lines made with poly-lactic acid (PLA), a versatile polymer derived from corn, a renewable resource.**

- High vapour barrier with high clarity for great visuals
- Containers and cups are suitable for cold to room temperature food and beverages (Below 55°C)
- Store in a cool dry place where temperatures will remain below 40°C / 105°F
- PLA manufactured in the United States and converted into your products worldwide

 Custom Printing available. Please contact your sales representative for further details.

### Heat Stability and Sensitivity of PLA

PLA (or poly-lactic acid) is a versatile polymer made from corn. Amorphous PLA products (clear containers and cups) have a low melting point around 65C (114°F) and so are great for cold or room temperature foods and beverages only. PLA must be transported and stored below this melting point.

## Straws + Cutlery

### Drinking Straws

Description	SKU	Quantity Per Case
15cm PLA Straws	WM-S-15	1000
20cm PLA Straws	WM-S-20	1000
Jumbo PLA Straw 12mm diameter	WM-SJumbo-20	2000
9.5" PLA Wrapped Straw	EP-ST990	300

### Heat Stable Cutlery

Fork (Crystalized)	Fork-CPLA-6.5	1000
Spoon (Crystalized)	Spoon-CPLA-6.5	1000
Knife (Crystalized)	Knife-CPLA-6.5	1000
Tasting Spoon (Crystalized)	Spoon-C-CPLA-006	2000

For additional cutlery, please see [page 26](#)

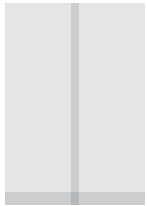

**We supply a broad range of products based on tree fibre converted into either paper or cellulose. Our paper and cellulose based products are 100% compostable and biodegradable. We preferentially supply product which use plant material harvested from sustainably managed forests.**

- Cellulose bags have fantastic clarity and are heat sealable
- Options available which are ideal for greasy and oily products
- Regular or breathable films
- Our PLA lined paper products are suitable for warmer food and beverages, while maintaining 100% compostability

# Product and Material Comparisons

Fibreware™ vs Foamed Polystyrene ('Styrofoam')

Conventional Plastics vs PLA

Product Attributes

## Fibreware™ vs Foamed Polystyrene ('Styrofoam')

	Polystyrene (Styrofoam)	Sugarcane Fibre
Main Raw Material	<ul style="list-style-type: none"> <li>- A petroleum by-product (benzene + ethylene)</li> <li>- Made from a limited, non-renewable fossil fuel resource</li> </ul>	<ul style="list-style-type: none"> <li>- A natural post-harvested non-GMO farming plant discard</li> <li>- Made from an abundant, annually renewable agricultural resource</li> </ul>
Intended Use	<ul style="list-style-type: none"> <li>- For both hot and cold food/beverage</li> <li>- For both solid and liquid food</li> </ul>	<ul style="list-style-type: none"> <li>- For both hot and cold food/beverage</li> <li>- For both solid and liquid food</li> </ul>
Thermal Properties	<ul style="list-style-type: none"> <li>- Excellent thermal insulation at temperatures below melting (55°C)</li> <li>- Freezer friendly</li> <li>- Not microwave or oven safe; potential release of Styrene and Benzene gases</li> <li>- Temperature sensitive</li> </ul>	<ul style="list-style-type: none"> <li>- Good thermal insulation</li> <li>- Freezer friendly</li> <li>- Microwave and oven safe up to 100°C</li> <li>- Extremely high temperature resistance</li> </ul>
Other Properties	<ul style="list-style-type: none"> <li>- Fair stain and cut resistance</li> <li>- Good grease resistance</li> <li>- Excellent water and oil resistance</li> <li>- Susceptible to acidic foods, may cause breakdown</li> </ul>	<ul style="list-style-type: none"> <li>- Good cut and grease resistance</li> <li>- Good water and oil resistance</li> <li>- Acid resistant</li> </ul>
Waste Considerations	<ul style="list-style-type: none"> <li>- Non-biodegradable</li> <li>- Recyclable where facilities exist</li> <li>- Hazardous to incinerate</li> </ul>	<ul style="list-style-type: none"> <li>- 100% Biodegradable and compostable</li> <li>- Recyclable in conventional paper stream</li> </ul>

## Conventional Plastics vs PLA

	Plastic	PLA
Main Sources	<ul style="list-style-type: none"><li>- Petroleum-based</li><li>- Non-renewable</li></ul>	<ul style="list-style-type: none"><li>- Corn-based</li><li>- Annually renewable</li></ul>
Thermal Properties	<ul style="list-style-type: none"><li>- Resistant to heat of ~120°C</li></ul>	<ul style="list-style-type: none"><li>- Resistant to heat of ~40°C</li></ul>
Disposal Considerations	<ul style="list-style-type: none"><li>- Non-biodegradable</li><li>- Not Compostable</li><li>- Risk of releasing carcinogens when incinerated</li></ul>	<ul style="list-style-type: none"><li>- Compostable</li><li>- Resin is certified compostable by BPI</li><li>- Recyclable where facilities exist</li><li>- Low risk when incinerated</li></ul>
