Costs associated with production downtime, product scrap/waste equipment/process performance or premature equipment failure continue to plague companies across a multitude of industries and sectors. Many of these issues can be traced back to the challenge of regular maintenance and in particular drive systems.

We believe that both service and support are fundamental in the performance and reliability of systems and as a result Can-Technologies have developed an innovative Planned Preventative Maintenance (PPM) Program designed to provide it's subscribers with regular and pre-planned service and 24/7 support coverage of VFD's within the facility.

Highlights of Program

- Planned/Scheduled Maintenance Calls
- Multipoint Inspection/Adjustments
- Replacement Part Sourcing/Fitting
- Life Cycle and Condition Assessments
- Testing & Optimization
- Programming (if applicable)
- Full Service Report of Findings/Actions
- Training (General/On-Site)
- Provision for Priority Emergency Service Calls
- Safety, Upgrade or Obsolescence Notifications

Benefits of Program

- Increase in System Dependability
- Increase in Equipment Service Life
- Increase in Equipment Performance
- Decrease in Downtime and Stress
- Decrease in Total Cost of Ownership
- Reduction of Safety/Obsolescence Risk
- Increase in Operational Knowledge

Local Service and Experience

Our certified drive service team is able to provide local service support competently and with an in depth and unparalleled knowledge both in terms of domain and technical proficiency - an unbeatable combination.

To request more information about our drive support services or to arrange for a consultation or evaluation contact us at the number below.

Can-Technologies is an Engineering Services and Software Products company specialized in providing Intelligent Solutions in domain of Power Distribution, Energy Management, SCADA, Safety, Automation and IT Systems
