

Intelligent Energy Management Software

For the business leaders of our future sustainable world

Monitor, Manage..... Perform and Profit

ENTELEGIS™ is an out-of-the-box energy management software solution that is quick to deploy and yet powerful, simple, easy to learn, use and maintain.

ENTELEGIS™ allows your business to monitor and manage energy consumption costs, regardless of type, across operations in real-time to achieve a level of energy management that brings the increase in financial performance, regulatory compliance and long-term sustainability.

Feature and Value Highlights

Dashboard

Attain visibility of Key Energy Indexes and reports for speedy access to relevant and concise information in an easy to understand format.

Configuration (Out of the Box, Scalable, Secure)

Obtain flexible configuration of parameter variable, security and company structure ensuring fast deployment and ROI, user adoption, and a lower cost of ownership.

Open Integration/Connectivity

Achieve connection and communication to most device types and data sources, including energy suppliers and regulatory bodies for faster implementation, lower cost of capital and the maximization of incentives and profit.

Web Based

Achieve faster user adoption with access to views reports and analyse data anytime, anywhere.

Demand Management/Control

Reduce cost penalties and the financial impact of non-essential equipment use with control of equipment and resource costs

Real-Time and Historical Information

Discover where, when and why energy is consumed relative to processes, operational events and resource costs for faster investment and/or process change decision making.

Abnormality Tracking/Response

Gain immediate notification and tracking of events and issues to maximize performance, profit, compliance, and equipment life.

Adaptive/Intelligent

Make better operational/resource allocation and investment decisions and achieve relevant benchmarking with built-in advanced intelligence to provide consumption data related to events and operational modes.
