Frequently Asked Questions
Forescout DOD Comply-to-Connect ELA

Who can participate in the contract?

Any DoD Component on operational networks NIPR, SIPR, DREN, or S-DREN.

What is the contract?

It is a Joint Enterprise License Agreement allowing DoD components access to up to 5 million endpoints of Forescout's core platform (eyesight & eyeControl), all Forescout eyeExtend products, and Forescout's Operational Technology Platform, eyeInspect.

- eyeRecover
- eyeExtend for Splunk
- McAfee ePolicy Orchestrator
- Tenable Vulnerability Management
- Open Integration Module
- Advanced Compliance
- CyberArk
- Carbon Black
- Check Point Next Generation Firewall
- Check Point Threat Prevention
- CrowdStrike
- FireEye EX, HX, & NX

- Fortinet
- HP ArcSight
- IBM BigFix
- IBM QRadar
- Palo Alto Networks Next Generation Firewall
- Palo Alto Networks WildFire
- Qualys Vulnerability Management
- Rapid7 Nexpose
- ServiceNow
- Symantec Endpoint Protection

Where can I go to access resources or request licenses?

Direct links to the license request form, the DoD site for License Authority Requests, and the Carahsoft license portal are coming soon. Please contact our representatives located at the bottom of this page for more information.

When is the period of performance for the contract?

August 31, 2023 - August 30, 2024

Why has the DoD executed this contract with Carahsoft and Forescout?

Comply-to-Connect will ensure all IP-enabled devices are identified, categorized, inspected, and remediated prior to connecting to a DoD Component's network. C2C will provide continuous insight into the security posture of these devices to inform potential defensive cyber activities. This is critical to securing the DoD Information Network (DoDIN), as well as ensuring that connected devices are compliant.

Forescout meets the common C2C technical requirements: device discovery, classification, continuous monitoring and remediation; network access control; authentication; asset management; and active threat detection for users.
