

*****Important Custer County Press Release*****

As part of the county's relocation of the dispatch center from Custer County to FreCom located in Canon City, Custer County is joining with Fremont County in implementing a new Emergency Notification System. Residents who were signed up for the old system, Code Red, must now register for Everbridge to be able to receive emergency alerts.

Custer County Keeps Citizens Safe and Informed with Everbridge Resident Alerts

Custer County, CO 2/20/2020 — Custer County is now working with [Everbridge](https://www.everbridge.com), the worldwide leader in unified critical communications, to keep residents, staff and emergency personnel safe and informed with quick and reliable emergency notifications and public service announcements. The county will begin using Everbridge Resident Alerts to communicate with citizens and businesses during emergencies and other critical events. Residents are encouraged to register immediately to receive these alerts: <https://member.everbridge.net/index/355009111785665>

Custer County will use the Everbridge emergency notification system to alert residents about a variety of events, ranging from severe weather, fires, floods and other emergencies, to more routine announcements, such as road closures and water utility maintenance. Messages will be sent to residents on their preferred contact paths—cell phone, SMS, home phone, email, pager and more—to ensure real-time access to potentially lifesaving information. Residents listed in the Custer County 911 database will be automatically subscribed to alerts by phone, but Everbridge allows citizens to self-register, provide additional contact information or opt out.

“We have a commitment to ensure public safety, community awareness and emergency response. To uphold this, when critical information and public service announcements are available, we need to reach our residents as quickly and reliably as possible,” said, Meredith Nichols, Custer County Emergency Manager. “The Everbridge emergency notification system allows the county to disseminate this information across all types of devices, ensuring residents have access to real-time public information when they need it the most.”

“A resilient, comprehensive critical communications system is an essential tool for counties that need to notify thousands of residents and businesses rapidly and efficiently,” said Jaime Ellertson, CEO of Everbridge. “Everbridge is proud to have been selected by Custer County as a critical component of its public safety and emergency response program.”
