

Dailymotion's Partners List

The present document lists entities that may process your personal data in relation to your use of the Dailymotion Service. The actual identity and number of Partners collecting your personal data at any given time depend on how you use our Service and what content and ads you watch. By processing your personal data, these Partners act in their capacity of Independent Data Controllers. They process your personal data for the Purposes they declared, pursuant to legal basis they established and by using Features they deployed. For those of our Partners who participate in the IAB Framework the information about Purposes, legal basis and Features is available directly in the Partner List. To learn more about Purposes, legal basis and Features of the non-IAB Partners please refer to their respective privacy policies by following the links available within the Partner List.

A "Feature" is a method of data use or data sourcing that overlaps across multiple purposes. Some of our Partners, who are members of the IAB Framework, may use one or several of the following Features:

- "Matching Data to Offline Sources": Combining data from offline sources that were initially collected in other contexts"
- "Linking Devices": "Allow processing of a user's data to connect such user across multiple devices"
- "Precise Geographic Location Data": "Allow processing of a user's precise geographic location data in support of a purpose for which that certain third party has consent".

We inform you that, for reasons inherent to the dynamic and highly automatized character of online activities, the present list may evolve. We will update it periodically and invite you to consult it on a regular basis.

For more information, please refer to our [Privacy Policy](#).
