Research & Development

We understand that creating or perfecting a product can be a difficult and stressful process, so we strive to provide comprehensive support throughout the entire product development process. Our experienced research and development team is here to help you every step of the way.

We can assist with product ideation and concept development, formulation development, scale-up and manufacturing, shelf-life studies, nutritional labeling, testing, and more. Our team can help you develop a product plan, troubleshoot issues, optimize processes, and ensure that your final product meets all of your needs.

Our team specializes in creating new flavors as well as creating new recipes to flavor match favorite recipes that are already existing. We also focus on performance development such as restricted melt, easy melt and shelf stability. We pride ourselves on the shelf stability and the clean label of our products. We also have many different cuts and packaging options available.

We understand the importance of confidentiality, and all of our processes are designed to protect your product ideas and intellectual property. We are also committed to providing the highest level of customer service, and we will work with you to create a custom product development solution that meets your needs.

If you are looking for assistance with product development, contact us today to learn more about our services and how we can help you. Contact us at: info@dairyfoodusa.com
