

Automate and ensure compliance

Remove compliance friction

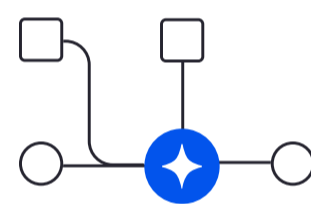

The cloud has enabled every organization to innovate faster and with more agility. As environments grow more complex (new workloads, architectures, roles, users, etc.), answering questions like “what databases are exposed to the internet” is painfully difficult. Maintaining a strong security posture and ensuring that security can scale with developers and DevOps is hampered by fragmented tooling and limited context.

The Wiz security stack includes a full-fledged compliance solution for security and GRC teams to automatically and continuously assess the compliance status of their cloud environment across a wide range of built-in or custom frameworks. Wiz simplifies compliance tracking within a single framework or crossframeworks through all business units or applications in your cloud environment.

Out-of-the-box automated compliance assessments

Continuously assess the compliance of your cloud environment across 140+ different built-in frameworks, including NIST, HIPPA, CIS, HiTrust, SOC2 and more

Implement custom frameworks

Create custom frameworks from scratch or by duplicating a built-in framework to align your compliance posture with your organization’s unique needs.

Granular and flexible reporting

Assess the compliance posture per framework for different business units or applications. Generate a detailed per assessment report, or a high-level executive report.

Trusted by the world’s best brands

Morgan Stanley

LVMH

A unified cloud security platform providing a simple way to assess threats in context and rapidly respond to minimize impact

Continuous assessment

- Wiz automatically assesses your compliance posture against more than 140 industry compliance frameworks or your custom frameworks. Eliminate the manual effort and complexity of achieving compliance in dynamic and multicloud environments.

Executive reporting

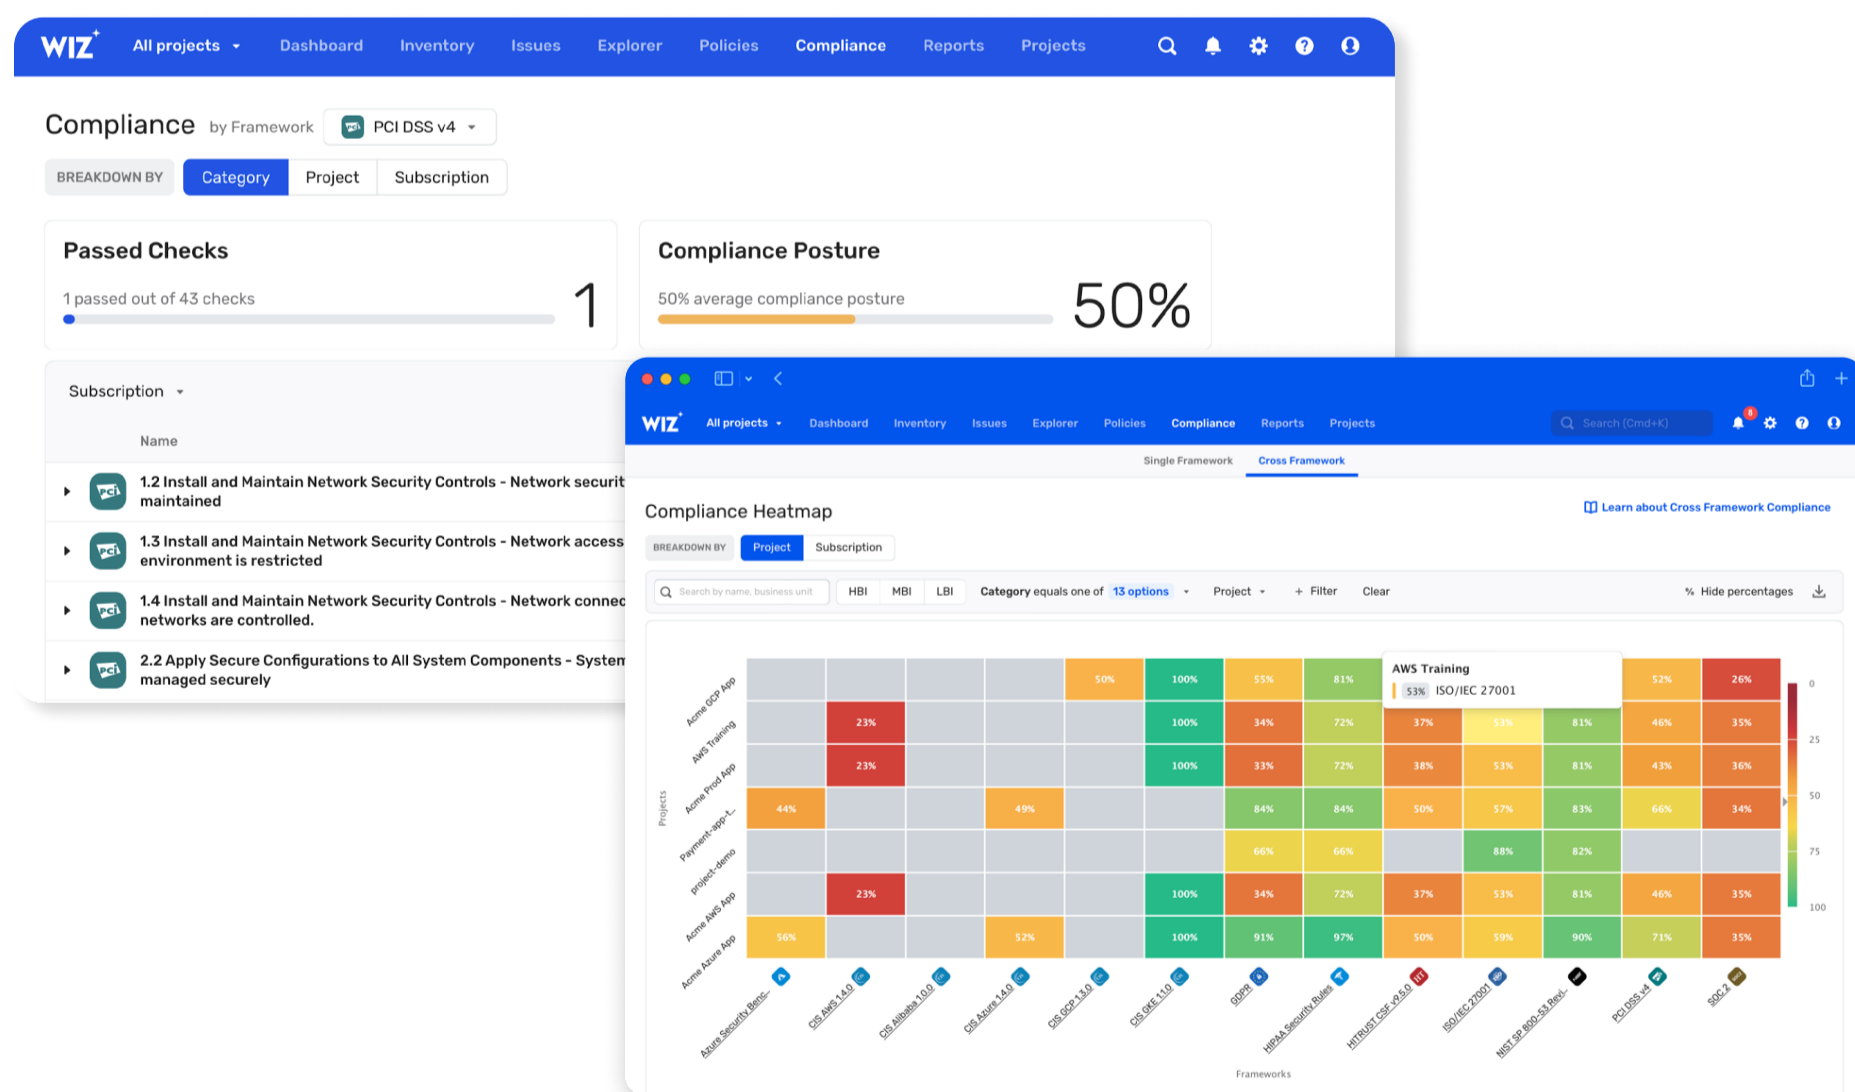

- Generate executive reports, on-demand or periodically, to provide a high-level posture assessment for the stake holders.

Custom frameworks

- Create custom frameworks from scratch or use our built-in framework template to align Wiz assessments of your compliance posture with your organization's unique needs.

Cross-framework, cross-application heatmap

- The compliance heatmap enables you to survey your cloud environment across all compliance frameworks, including CIS and NIST, from a bird's eye view and quickly determine where your security teams should focus.

Wiz secures everything organizations build and run in the cloud. Founded in 2020, Wiz is the fastest-growing software company in the world, scaling from \$1M to \$100M ARR in 18 months. Wiz enables hundreds of organizations worldwide, including 35 percent of the Fortune 100, to rapidly identify and remove critical risks in cloud environments. Its customers include Salesforce, Slack, Mars, BMW, Avery Dennison, Priceline, Cushman & Wakefield, DocuSign, Plaid, and Agoda, among others. Wiz is backed by Sequoia, Index Ventures, Insight Partners, Salesforce, Blackstone, Advent, Greenoaks, Lightspeed and Aglaé. Visit <https://www.wiz.io/> for more information.

Wiz came into the picture to allow us to feel secure and confident in how fast we're moving, even as our cybersecurity challenges keep changing.

Melody Hildebrant
CISO, Fox

Wiz is an easy to use, easy to set up, incredibly powerful solution that is becoming one of the main toolsets in our belt. The volume and information we get from Wiz helps steer our focus moving forward.

Brad Abe
Enterprise and Principal Security Architect,
ASOS

Wiz gives me a complete, detailed map to understand what needs to be done to achieve compliance. It's my checklist.

Omri Nachum,
CISO, Lili Bank

If you're deployed in the cloud, right now, and you need to close down your issues, go talk to Wiz.

Igor Tsyganskiy
CTO, Bridgewater Associates
