

SMT Aluminum Frame

19 Years Experience

The vast majority of today's SMT stencils are mounted inside a aluminum stencil frame, which is characterized by stable and robust production handling requirements. The aluminium frame must be strong and non-pliable, allowing tensile forces above 40N/mm^2 . To meet a higher aluminium frame stability, Doyan also manufactures cast aluminum aluminum on request.

- Stable handling
- Longevity and durability
- High tensile strength
- Low net weight
