EU Fire & Security

Product Catalogue Issue 5

Welcome

Since the last issue of our product catalogue, EU Fire & Security has seen some important and beneficial changes, the biggest being the acquisition of the business by Norbain Holdings Ltd in April 2018. Becoming a trading division of this well-established parent company has provided EU Fire with the support needed to further strengthen and expand its position in the market.

We have continued to expand and refine our supplier and product portfolio, which now includes the Hochiki Ekho and Smartcell wireless detection ranges, FireRay One beam detection, Yuasa Batteries and MAUS extinguisher products amongst others. We always strive to keep ahead of the curve with new technologies, offering our customers the latest and best choice in products available across the fire alarm and life safety systems industry.

Whilst continuing to expand our reaches in the UK, there has been further growth into the worldwide market, extending our trading out to the Middle East, Mediterranean, Africa, Southeast Asia, United States, and Southeast Europe.

Our ethos has always been to provide our customers with a service above and beyond that of a standard distribution company – offering designs, quotes, training, and technical support. This unique combination of services makes EU Fire stand out as a leading fire alarm distributor.

The Company

Located in the North West of the UK with regional offices in the Midlands, EU Fire & Security is a progressive company, specialising in high quality & innovative fire systems for the UK and International Market.

Our success is based on a strong and highly customer focused strategy driven by a team of experienced industry professional's sensitive to customer needs.

Our Policy is to provide a "one stop shop" for all our customers' needs, offering a wide selection of products and services with the aim of promoting a professional status and service throughout the UK and beyond.

Design

From initial enquiry, our dedicated system designers will undertake a full evaluation of your exact requirements, carry out a site survey where required, produce a detailed report, design specifications and quotations together, if necessary, with any associated drawings.

We are constantly looking at better ways to support you the customer, in all aspects of design, and can now offer Design to BAFE SP203 accreditation.

Commission

BS5839-1:2017 recommends that a fire alarm installation should be fully commissioned to ensure satisfactory operation and the commissioning should be carried out by a competent person with detailed experience of the standards and the products installed.

EU Fire & Security provide an in-depth knowledge of the products, and a wide experience of its applications that would ensure compliance with the code, together with a service that is both cost effective and reliable. In addition to the standard commissioning services, we also offer 3rd Party accreditation to BAFE SP203.

Training

We want our customers to get maximum benefit from the systems we offer and consider support and training an essential element of our services. We offer hands-on supplier product training at various venues around the UK.

FC-60-2000 & FC-60-2010 Wireless Door Control with Conventional Wireless Dual I/O Unit & Conventional Wireless Communicator for any Fire Alarm System

The Ziton ZCR452 is an interface between a conventional fire detection zone and a range of wireless, 868 MHz field devices. It provides a method of interfacing any conventional system with a zone of wireless field devices in areas where the installation of system wiring is not an option.

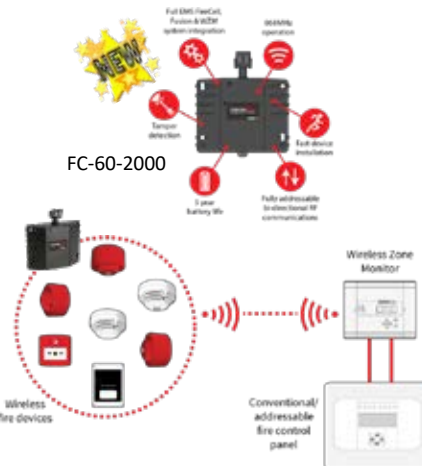

The Ziton ZCR452 allows for any compatible conventional fire detection zone to be connected directly to the unit. The Ziton ZCR452 in turn provides fire and fault notifications from the wireless field devices to these conventional circuits.

In addition any conventional notification circuit may also be wired to the Ziton ZCR452, allowing wireless notification devices to be controlled from the conventional notification controller in a similar way to any hardwired conventional notification device.

ZCR452

ZCR868-C

Life safety it's in our DNA.

- Wireless system integration
- 3rd party certified
- No messy cables
- Long battery life
- Improved safety
- Faster installation
- Trusted provider
- Cost saving

A world-leading life safety solutions manufacturer

Kentec Electronics is an end-to-end manufacturer of conventional, analogue addressable fire detection and extinguishant control panels, with everything sold being made in the UK. Committed to meeting customer needs, Kentec's global reputation means their life safety systems are used to protect prestigious sites all over the world.

Kentec manufactures products approved to EN54, EN12094, UL, FM, NFPA and marine classification societies.

www.kentec.co.uk

Be less conventional

BiWire Flexi two-wire fire system

Eaton's BiWire Flexi fire system can use two-wire technology to reduce wiring requirements by up to 50%, or conventional four-wire technology making new builds and system extensions simpler and faster.

The ability to run both two-wire and conventional zones from the same panel provides a flexible solution for offices, small warehouses, retail stores and schools. It is a quick to install, commission and maintain system with an easy-to-use interface and range of devices including EN54-23 VADs.

BiWire Flexi is part of Eaton's comprehensive range of intelligent addressable, conventional and UL listed fire systems.

Fike Multi-Function Detectors: The alternatives don't stack up!

or...

The ASD Multipoint detector from Fike Safety Technology combines 7 modes detection - all available at the flick of a switch - with optional integral sounder and strobe.

Helping you meet a range of specifications with a single device and allowing you to address future changes in room use with ease.

Meaning you only need to stock one product, which in turn means more shelf space - and less financial outlay.

The ASD Multipoint detector from Fike.

It's all the detector you'll ever need.

C-TEC DOMESTIC FIRE ALARM SYSTEMS

HUSH ACTIV

GRADE C DOMESTIC FIRE ALARM SOLUTION

A new range of BS 5839-6 Grade C compliant residential fire detection and alarm solutions specifically designed to better protect people and property.

- ▶ Can be used in any situation where Grade D Mains/Battery Alarms are specified
- ▶ Supplied in three cost-effective kit formats for ease of specification and installation
- ▶ Monitored for head removal, wiring, PSU and battery faults
- ▶ Easily accessible HUSH and TEST buttons
- ▶ Low-level system controller facilitates compliance with the Equality Act and comes with non-latching fire & fault outputs, a trigger input, a rechargeable 72 hour standby battery and a separate mains power supply unit
- ▶ Simple to install 24V systems that include all of the devices you need to create a typical LD2 dwelling system

Providing quality today but developing technologies for tomorrow

FFE is a global innovator in the design and manufacture of world-class fire detection solutions, trusted by installers, distributors and organisations world-wide. Our commitment to fire detection and prevention led to the development of our **Fireray**® smoke detection beam which has since been the favoured choice of many of the world's leading smoke detection distributors and installers. Our **Talentum**® range was later developed, providing unmatched fire protection for high value industries where fast flame detection is critical.

- Works in direct sunlight.
- Protects large spaces of up to 120m.
- Available as a projected or reflective smoke detection solution

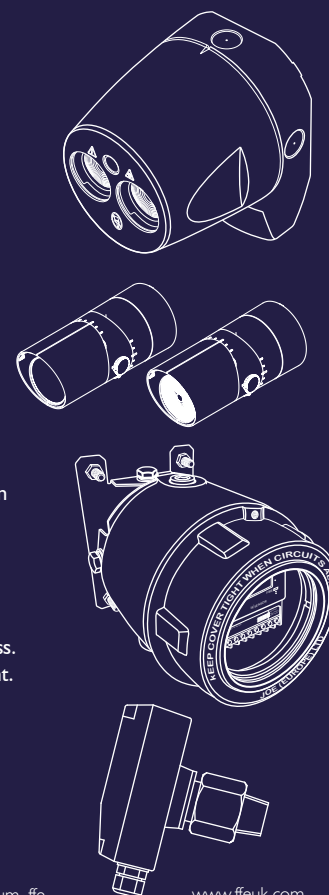

- Detects flames through dust, steam, smoke and glass.
- Immune to the effects of wind, draughts and sunlight.
- High resistance to false alarms.

CONVENTIONAL FIRE ALARM EQUIPMENT

thefirebeam™
protectionsystemXtra

how far do you want to go?

← **70 metre range** →

the standard firebeamXtra uses one reflector and will cover up to 70 metres

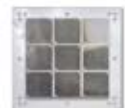

← **140 metre range** →

add the 70KIT140 to thefirebeamXtra and cover distances between 70 and 140 metres

← **160 metre range** →

add the 140KIT160 to thefirebeamXtra and cover distances between 140 and 160 metres

the industries favourite beam detector is now the worlds **longest reaching reflective beam** meaning less beams and **less expense** not only in hardware but also in **reduced installation costs**
add to this intelligent **self-aligning motorisation** and the ease of a **ground level controller** thefirebeamXtra really is the go to beam if ease of use, proven reliability and cost reduction initiatives are required

Visit the website for the latest information and technical details:

ANALOGUE ADDRESSABLE FIRE ALARM EQUIPMENT

MxPro⁵ High-performance multiprotocol fire panels

Whatever the scale of site and fire protection challenge, Advanced delivers unrivalled solutions.

MxPro 5 puts you in complete control of your fire protection.

- Easy to install and configure – saving you time and cost
- Compatible with four leading detector protocols – for maximum flexibility
- Comprehensive cause and effect options – to meet the needs of your site
- Powerful networking, false alarm reduction and BMS integration capability – for complete fire protection peace of mind.

Advanced – made in the UK. Trusted around the world.

ANALOGUE ADDRESSABLE FIRE ALARM EQUIPMENT

NITTAN

One Source. One Loop. **One Solution.**

Nittan evolution 1 Touch Screen Single Loop Addressable Fire Alarm Panel

- 254 devices on the loop, 254 zones available
- EN54 Part 2 and Part 4
- Interactive 4.3" touch screen
- Intuitive and easy to use menu structure
- Fully programmable from touch screen or PC tools
- Built in network capabilities, allowing 16 panel networking with no additional hardware

The evolution 1 panel is a cost effective, one source solution, fully compatible with Nittan's award winning evolution device range.

Allowing up to 254 devices on the loop, with a touch screen and intuitive menu structure enabling everything from a simple stand-alone panel to multi-panel networked systems - the evolution 1 is the only one loop solution that you need.

For further details, please contact:

NITTAN email: sales@nittan.co.uk | tel: +44 (0) 1483 769555 | www.nittan.co.uk

ANALOGUE ADDRESSABLE FIRE ALARM EQUIPMENT

FIKE SAFETY TECHNOLOGY LTD.

CIE-A-200

Single Loop Addressable Panel

- Easier installation
- Faster installation time
- Fire and fault event log up to 1000 events
- Easier to use OSP software

- Enhanced reporting options
- Intuitive End User interface
- Improved service & fault finding tools
- Powerful Multipoint ASD Multi-Criteria detector

- 1 Loop
- 2KM loaded loop length
- Max 200 devices
- 32 Fire Zones and
- 32 I/O Zones
- Up to 8 repeaters

- 2 Monitored Inputs,
- 2 Monitored Outputs,
- 3 Relays
- 7A/H Max battery capacity
- 12 A/H with separate enclosure

Fike ASD Multi-Function All In One Detectors,

The alternatives don't stack up!

**Sophisticated
functionality,
Simple
operation**

Intelligent addressable
fire systems

The CF3000 series are high specification intelligent addressable control panels that are fully certified to EN54 parts 2 and 4.

The large capacity, ability to support complex cause and effect programming and wide range of user controllable functions make the system suitable for diverse projects.

Each panel is networkable with up to 126 other Eaton addressable control panels with the addition of just one of our network cards.

ANALOGUE ADDRESSABLE FIRE ALARM EQUIPMENT

SmartCell

SmartCell, the latest innovation in wireless fire detection systems developed by EMS.

Optional "on-board" communications module for "Smart Services" and remote connectivity, wherever you are. Connect SmartCell to compatible non-fire devices such as flood alarms, CO detection, heating and cooling systems and receive texts and emails should there be an issue.

Imagine all this, and then imagine SmartCell
www.mysmartcell.com

Wireless smoke and heat detector with 32 tone sounder & EN54-23 visual alarm device (VAD)

Arrow Door Closers

ELECTROMAGNETIC CLOSERS & HOLDERS

The Ultimate Solution for Fire Safety and Ease of Access

Electromagnetic door closers and door holders are directly linked with a buildings fire detection system providing superior fire protection and unhindered Ease of Access; making them the ideal solution for any building type.

BSEN 1634   BS8300  
Approved Document M 

ARROW ELECTROMAGNETIC 623/4/5/6 – UNIVERSAL

Electromagnetic Hold Open or Swing Free for ease of specification.

- > **Specification:** Scissor arm, Hold Open or Swing Free, Universal Fitting (Fig. 1,6 & 61).
- > **Door Weight:** 60-120kg
- > **Power Size:** Fixed Power 3-6
- > **Fire Tested:** 120 minutes
- > **Standards:** BSEN 1154 (Mechanical), BSEN 1155 (Electrical)
BSEN 1634 (Fire), BS8300 (Ease of Access)
- > **Material:** Manufactured from British Extruded Aluminium

ALSO AVAILABLE

Choosing your Closer

HOLD OPEN MODE

Hold open mode can be used to safely and legally hold open doors throughout a building. They can provide barrier free access for inhabitants, but upon detection of a fire, release the door allowing it to close.

SWING FREE MODE

Swing free mode allows the door to operate as if no closer was fitted by providing virtually no opening resistance. Again linked to the buildings Fire Detection system, the closer releases the door automatically upon first detection of a fire.

NEW – BM3SE ELECTROMAGNETIC SLIDE ARM

NEW

The newest addition to the Arrow Electromagnetic family of fire door closers is now available - The BM3SE combines the innovation and durability of our traditional Electromagnetic Closers, but is now available with a slide arm track for unrivalled aesthetics.

- > Available in Hold Open or Swing Free configuration
 - > Slide Track for enhanced aesthetics
 - > Fixed Power 3 – 60kg Door Weight
 - > Fig. 1 Body door mounted on Pull face
 - > Easy Installation
 - > Made in Britain
 - > Ultimate solution for Fire Protection
- > Available in Silver or Stainless Steel
 - > **Standards:**
BSEN 1154 (Mechanical),
BSEN 1155 (Electrical)
BSEN 1634 (Fire Test),
BS8300 (Ease of Access)
 - > **Material:**
Manufactured from British Extruded Aluminium

ELECTROMAGNETIC DOOR HOLDERS

Arrow Electromagnetic Door Holder available in either Concealed or Wall Mounted models for use with existing mechanical closers to maximise fire protection and ease of access.

- > **Specification:** Electromagnetic Door Holder, Manual on/off switch, surface mounted or concealed
- > **Standard Voltage:** 24v DC
- > **Power Size:** 1.75 Watts
- > **Power Range:** 3-7 in accordance with BSEN 1154
- > **Standards:** BSEN 1154 (Mechanical), BSEN 1155 (Electrical)
BSEN 1634 (Fire Test), BS8300 (Ease of Access)

ANCILLARY FIRE PRODUCTS

The Fire Sticker™

The Sticker that puts out fires

Automatic Fire Suppression Sticker for
Electric Cabinets / Apparatus Cabinets / Server Racks/ Electric Boxes

Discharges in
3-5 seconds

5 year protection

Compact size
(10 x 5 cm)

Advantages

- Compact Size 10x5 cm
- Standalone unit
- Non pressurised
- Residue free technology
- Easily assembled
- Maintenance free
- 5 year life span
- Fast response 3-5 seconds
- Non toxic potassium mix
- Extinguishes all kinds of fires*

**is not effective on glowing embers and burning metal*

1 Cover 20% of the upper area for the best protection.

2 At 380°C the fire sticker will activate within 3-5 seconds.

3 The potassium aerosol will float inside the electrical cabinet once it has been discharged and will prevent any new fires that would occur.

For further information go to www.eufireandsecurity.com/fire-ancillaries/fire-extinguisher-equipment/maus-uk

Safety in communication

VoCALL 16 digital voice communication system

Two-way communication between fire fighters and building occupants is critical during an emergency, especially for those occupants who need additional assistance.

Eaton's new VoCALL 16 digital EVC system ensures safety in communication. With cost effective, digital loop cabling and ease of end-user operation, it can easily accommodate future system expansion.

VoCALL 16 is part of Eaton's comprehensive range of voice alarm and refuge systems.

The Lexicomm Network is a comprehensive Emergency Voice Communication System that combines Fire Telephone, Disabled Refuge and Emergency Assistance Alarm Systems in one fully-integrated robust network. The range encompasses compact, elegant touch screen master stations, system expander panels, repeater panels with compatible outstations for all applications.

Design of the products is paramount, with aesthetics and engineering functionality taking precedence.

- Large system capacity with up to 512 lines
- Compact master stations
- Modern touch screen user interface
- Simple configuration and installation
- Dual redundant fault tolerant network
- BS8300 "Acknowledge" function on Emergency Assistance Alarms

EMERGENCY ASSIST ALARM - STAND ALONE KIT

The Emergency Assist Alarm - stand alone kit provides the perfect solution for conformity with the Building Regulations Document M and Equality Act 2010.

This is a simple 2 wire system that has been specifically designed to meet the needs of disabled service users and conforms to all the relevant requirements: Disability Rights Commission code of practice, English Tourism Council Recommendations and RNIB signage guidelines.

Benefits

- » Quick and simple installation, with limited cabling requirements
- » High contrast printing for increased visibility
- » Tactile Braille signage to assist partially sighted people to easily operate the cancel plate
- » Additional plate can be added to give system flexibility

Kit contains :-

- 1x Power Supply Unit**
- 1x Over Door Indicator**
- 1x Cancel Button**
- 1x Pull Cord Unit**
- 1x Disabled Sticker**

C-TEC CALL COMMUNICATION EQUIPMENT

800 SERIES

CONVENTIONAL CALL SYSTEM

A versatile conventional call system ideal for use in hotels, leisure centres, care homes, shops, offices & more

- ▶ Extensive range of system ancillaries including:-
 - 1-40 zone indicator panels
 - ceiling pulls
 - monitoring points
 - water resistant alert points
 - overdoor lights & sounders
 - wall-mounting call points
 - infrared ceiling receivers
 - stainless steel call points
 - relays & call latch modules
 - accessible toilet alarms
- ▶ Simple to install 12V system (wire zones in 4-6 core security cable)
- ▶ Two levels of call - standard and emergency
- ▶ Range includes the best-selling NC951 accessible toilet alarm kit

QUANTEC

ADDRESSABLE CALL SYSTEM

A powerful addressable call system offering flexible call routing, a data protocol that works down just two wires and a laptop programmable system controller. Key features include:-

- ▶ Multiple call levels (standard, ensuite, help required, emergency, infrared staff attack, presence & attendance)
- ▶ Wide range of call points, ceiling pulls, corridor displays, monitoring points, overdoor lights and ceiling receivers
- ▶ Call accept, call divert and 'attendance' functions
- ▶ Ideal for nursecall, staff attack and other applications

Ask about our new Surveyor 2

data management software with configurable dashboards, KPI settings & remote access capabilities

C-TEC DISABILITY EQUIPMENT

SigTEL

1-224 LINE DISABLED REFUGE SYSTEM

An easy-to-install emergency voice communication system that meets the demand for BS 5839-9 compliant disabled refuge, fire telephone and stadium marshaling systems.

- ▶ New-look 4, 8 & 16 line system controllers now with semi-recessed handsets
- ▶ Enhanced networking facility allows up to 14 system controllers to be interlinked to form systems of up to 224 lines
- ▶ New optional 224 Line Desk Controllers allow communication with up to 224 outstations from a single accessible point
- ▶ Wide range of 'Disabled Refuge' & 'Fire Telephone' outstations

PDA

HEARING LOOP SYSTEMS

Under the Equality Act, anyone offering goods or services to the public must make 'reasonable' adjustments so they do not discriminate against the hearing impaired. The installation of a hearing loop system is one way service providers can comply.

- ▶ The UK's widest range of hearing loop equipment
- ▶ Systems work by transmitting amplified sound to hearing aids
- ▶ Available in a variety of cost-effective kit formats
- ▶ Designed to meet the requirements of BS7594 and EN60118-4 when correctly installed
- ▶ FPROK1 hearing loop test kit (c/w headphones, calibrated signal generator and handheld tester) also available

Get your ducks in a row with Norbain e-source!

The Norbain e-source website has been developed to allow users to explore thousands of leading security products, organise their research and then buy online. The site has been designed to make research as effective as possible with the use of Project Folders. These folders allow visitors to compile lists of products for an unlimited number of projects, keep notes and request advice.

MAIN FEATURES INCLUDE:

- Project Folders
- 'Request Advice' option to take advantage of Norbain's expert support
- Thousands of the industry's leading products and solutions
- Customer-specific pricing on log-in
- Access to special offers and promotions
- Online order placement

Simply visit www.norbain.com today to sign up and take advantage of all the great benefits on offer.
