

# 2024 CUSTOM GUITAR

DESIGN GUIDE

LIMITED EDITION 70TH ANNIVERSARY  
1954 STRATOCASTER® JOURNEYMAN RELIC®  
9236091143

## FOREWORD

A Fender Custom Shop instrument is extraordinary. You know it when you play one—it's definitely more than the sum of its parts. It's filled with intangible, electrifying elements that add a new dimension to your playing experience. It's as if the instrument itself is imbued with history, alive with the spirit of the place where it was built and the devotion of those who crafted it.

The Custom Shop is home to Fender's most skilled and talented builders. It's a bustling, noisy and creatively volcanic place that re-earns its nickname—the Dream Factory—every day. Custom Shop builders are completely dedicated to their art—part craftsman, part artist, part music fan and, more often than not, part mad scientist. They're the best at what they do, and they pour all of their passion, hard-earned knowledge and skill into every instrument they build. It's no ordinary place and the creations that come from it are no ordinary instruments. Welcome to the Fender Custom Shop.

For players who wish to create a completely custom instrument—anything from a humbucking pickup-equipped banjo to a custom-engraved aluminum-bodied Strat®—we offer Masterbuilt, a singular experience working one-on-one with one of our Master Builders. Custom-Built is for those who prefer to start with one of our time-honored models and personalize the specifications to meet your specific needs. Use this guide to design your very own Masterbuilt or Custom-Built Fender guitar and make your dreams come true.

**HOW  
TO****USE THIS GUIDE**

Is there a special Fender instrument that you have been dreaming of your whole life? We have some good news for you! The Fender Custom Shop can take your dreams and shape them into a tonal reality. The process is simple:

- 01 SELECT A BUILD LEVEL**  
Masterbuilt or Custom-Built
- 02 SELECT A CUSTOM SHOP BASE MODEL**  
Choose from a wide range of guitars and basses
- 03 SELECT AN AGING PACKAGE**
- 04 SELECT YOUR OPTIONS**  
Choose your custom options from our extensive menu of offerings
- 05 ADDITIONAL NOTES**  
Use the "additional notes" section if your desired options are not listed
- 06 SUBMIT YOUR ORDER**  
Take this completed design guide to a Custom Shop Showcase Dealer which you can find at [www.fendercustomshop.com/dealers/](http://www.fendercustomshop.com/dealers/)

01

## BUILD LEVEL: MASTERBUILT

In every art form there are those who have mastered their craft so thoroughly, through years of training and experience, their work routinely commands extra acclaim and admiration, not to mention outright awe. These astonishing artisans are the Master Builders of the Fender Custom Shop; a select group of the most talented builders recognized around the world for their matchless skill, limitless imagination and utter devotion to their art.

Crafting a guitar with a Custom Shop Master Builder is the ultimate artistic partnership—simply put, no idea is too crazy and no job too large or too small. They'll walk you through everything—body design, neck shape, tonewoods, pickups, hardware and more—to give you the look, feel and sound that you're searching for. From start to finish the Master Builder will personally ensure that each guitar is built with the highest possible quality and to your exact specifications. Additionally, it's about more than just specifications, it's about making the instrument of your dreams a concrete reality.

# MASTER BUILDERS

Imagine the greatest artists in history gathered under one roof: Michelangelo, DaVinci, Picasso and Dali working next to each other, sharing pigments, knowledge and expertise. The Fender Custom Shop is exactly that, the world's most esteemed luthiers gathered together to create peerless instruments that are astounding works of art—the Master Builders. They are known the world over for their skill and have built instruments for Jeff Beck, Ritchie Blackmore, Eric Clapton, Dick Dale, Mike Dirnt, Bob Dylan, Robben Ford, Buddy Guy, Merle Haggard, Reggie Hamilton, Mark Hoppus, John 5, Keith Richards, Sting and U2... just to name a few!

## PAUL WALLER

Paul Waller is a Southern California native with woodworking and luthiery in his blood. He built his first guitar at age 14 in his high school woodshop, joined a cabinet shop right out of high school and, after a stint at a small Southern California guitar maker, enrolled at the acclaimed Roberto-Venn School of Luthiery in Phoenix, from which he graduated in spring of 2000.

Waller joined Fender in 2003. He spent two years working closely with master archtop craftsman Bob Benedetto, and became steeped in the many facets of building techniques from all the Custom Shop's Master Builders. After an extensive seven-year apprenticeship, Waller became a Master Builder in 2010.

His Fender Custom Shop work includes bass guitars for U2's Adam Clayton, a custom Thinline Telecaster for U2 vocalist Bono, Telecaster guitars for the Rolling Stones' Keith Richards and co-work on a Stratocaster for fellow Stones guitarist Ronnie Wood, Stratocaster guitars for Buddy Guy, the Nile Rodgers "Hitmaker" Stratocaster, a custom double-neck Jazzmaster for Queens of the Stone Age guitarist Troy Van Leeuwen, the George Harrison Tribute Rosewood Telecaster, and the George Harrison Rocky Stratocaster.

## DALE WILSON

Dale Wilson arrived at Fender in 2003, joined the Custom Shop in 2005 and became a Master Builder in 2011. Building guitars has been a driving passion for the California native since childhood. "Ever since I can remember, I've always loved guitars," he says. "I didn't dream of being a rock star; I dreamt of building the ultimate guitar. I was equally enthralled with the guitars just as much as I was with the players."

Woodworking runs in the Wilson family, and the requisite Custom Shop zeal for outstanding craftsmanship has long been part of Dale's DNA. He did repair work and mods in a small guitar shop right out of high school in the late 1980s; subsequently, he moved on to stints at Dobro and Rickenbacker before arriving at Fender, where he worked on Guild, Gretsch and Benedetto guitars before beginning his apprenticeship with various Custom Shop Master Builders.

He enjoys calling upon his extensive and varied experience as a craftsman to create highly distinctive guitars such as the Resophonic Thinline Telecaster®. Wilson also built five beautiful custom guitars for the January 2011 NAMM Show while still an apprentice and was asked to sign the back of the headstocks, garnering him his Master Builder status.

## JASON SMITH

A Custom Shop veteran and son of longtime Fender R&D legend Dan Smith, Jason Smith grew up on Fender—"It has always been in my family," he says, "And I was always extremely interested in everything my father did."

Born in Rochester, N.Y., and raised in California, Smith remembers meeting guitar greats from about age 5 on through his father's work with Fender—Eric Clapton, Yngwie Malmsteen, Jeff Beck and Robben Ford, to name only a few. He went to his first big rock concert at age six—Rush—and remembers going backstage with his dad and meeting Geddy Lee after the show. Before he was even

in his teens, Smith was going to see Pink Floyd, ZZ Top and many other major artists. Rock music and Fender are part of Smith's DNA. He joined the Fender Custom Shop in 1995 and in 2006 completed a five-year apprenticeship under acclaimed Senior Master Builder John English. Among many diverse projects with English, Smith worked on a pair of double-neck Stratocaster guitars for Stone Temple Pilots guitarist Dean DeLeo. He has since crafted fine instruments for players and acts including John 5, Michael Landau, Flea, Josh Klinghoffer, Steve Harris, Reggie Hamilton, Linkin Park, Kenny Wayne Shepherd, Neon Trees and many others.

## TODD KRAUSE

Todd Krause has built exquisitely crafted custom instruments for many of the world's greatest artists, including Jeff Beck, Eric Clapton, Bob Dylan, David Gilmour, Robbie Robertson, Kenny Wayne Shepherd, Robin Trower, Roger Waters and many others.

His guitar-building apprenticeship began in early 1981 at Jackson/Charvel guitars. Krause arrived at Fender in 1991 and steadily rose through several roles, including one-off instrument builder, R&D model maker and woodworking machinist. He became a Custom Shop Master Builder in 1997 and has created countless distinctive instruments, all of which embody his personal design philosophy: "Form and function are the biggest part of it," he says. "It's about the way an instrument sounds and feels. It has to look cool, and it has to compel you to play."

## YURIY SHISHKOV

From handcrafting many of his own woodworking tools to showcasing his world-class luthier skills and custom inlay work, Yuriy Shishkov is truly one of the last of the renaissance guitar builders. It was in the small confines of a root cellar in his hometown of Gomel in the former Soviet Union that Shishkov got his start building guitars for friends and colleagues.

When he arrived in the United States in 1990, Shishkov settled in the Chicago area and collaborated with a range of top artists, including late shredder Dimebag Darrell, Jimmy Page and Robert Plant, Nuno Bettencourt and Paul Stanley of Kiss. Shishkov joined the Fender Custom Shop's Master Builder team in 2000, and continues to craft truly magnificent instruments featuring exquisite detail and inlay work as the Fender Custom Shop's Principal Master Builder.

## GREG FESSLER

Greg Fessler came to the Fender Custom Shop in 1990, working his way up through the ranks as an apprentice. He assisted with the Robben Ford signature line of guitars, eventually becoming the sole builder of those instruments and, later, Ford's personal builder. Fessler has built one-off Stratocaster and Telecaster models for a host of players, including Joe Bonamassa, Jeff Healey, Hank Marvin, John Mayer, Rhonda Smith, Neil Schon and Pete Wentz, to name a few.

Fessler's remarkable abilities as a Master Builder have earned him accolades from many Fender artists and from discerning customers worldwide. His meticulous attention to detail is exemplified in every instrument he creates, each of which is a perfect example of the intense commitment it takes to earn the title of Master Builder.

## VINCENT VAN TRIGT

Originally from the Netherlands, Vincent moved to California in 2005 and began working for Fender immediately. After wearing a variety of hats in different departments, he started in the Custom Shop in 2012.

A two-year assistant role with Stephen Stern at the Gretsch Custom Shop was followed by a five-year apprenticeship with John Cruz. During this time, he worked on many prestigious guitars, including the replica of Gary Moore's '61 Stratocaster, a 30-piece run of the Jimmie and Stevie Ray Vaughan 30th anniversary Stratocasters, and most recently the Phil Lynott Precision Bass.

## DENNIS GALUSZKA

Like Fender itself, Dennis Galuszka is a Southern California native. Combining his dual passions for music and woodworking, he began building high-end acoustic guitars during his 13 years as a cabinetmaker. As a working drummer, it was a 1999 audition with one of the Fender Master Builders that led to a job interview and a new kind of steady gig—as an apprentice at the Fender Custom Shop.

After only eight months there, Galuszka was promoted to Master Builder. He has since built finely crafted instruments for influential players including Paul McCartney, Andy Summers, Johnny Marr, Patrick Stump, Mike Dirnt, Sting and many others. He has lent his expertise to a number of truly distinctive instruments, including double-neck guitars and unusual takes on classic Fender designs along with several artist models. "It's all about the feel and sound of an instrument," Galuszka says. "Those things are number one with me, above everything else."

## KYLE MCMILLIN

Kyle McMillin brings 15 years of musical instrument experience to the Fender Custom Shop. McMillin recently finished a five-year apprenticeship under Principal Master Builder Yuriy Shishkov—working on nearly 1,000 guitars while learning from the esteemed builder. As a newly-minted Master Builder, McMillin is now part of a team of the finest guitar builders—the Fender Custom Shop.

## AUSTIN MACNUTT

Canadian born in a family of performing musicians, some of Austin's earliest memories contain acoustic and electric guitars, including his father's 1963 Custom Color Black Fender Jaguar with matching headstock that is still in the family. Following in his parents' footsteps, he took up guitar playing at the age of 10 and soon found himself tinkering on it to improve playability and tone. Throughout his teens, Austin developed his building and repair skills and became the local go-to repair tech for many of the bands passing through.

After graduating high school in Saskatoon, Austin saved up and enrolled himself at the Guitar Craft Academy in Hollywood to further his skills and passion for guitar

building. Recognizing his talents, immediately after completing the course the school offered him a position as one of their teachers. During these five years of teaching guitar building, he met Ron Thorn during an inlay seminar, and shortly after was offered a position at Thorn Guitars. For 11 years Austin crafted boutique electric guitars under the Thorn brand. From raw lumber selection, millwork, CNC operation, fretwork and final assembly, Austin did it all and once again is working shoulder to shoulder with his old friend, crafting Fender's finest.

When Austin is not building guitars, he enjoys spending his time with his girlfriend, playing music and going camping whenever and wherever he can.

## ANDY HICKS

*Andy Hicks*

Andy Hicks grew up in a household filled with music lovers. He received his first guitar on his 11th birthday—a gorgeous 3-Tone Burst Fender Stratocaster. Andy spent his teenage years playing along with his favorite Nirvana, Black Sabbath and Metallica records. He played in local rock bands and by his early 20s he became increasingly interested in experimenting with guitars by modifying pickups and wiring.

In 2009, Andy decided to take this passion for guitar building seriously by enrolling in the Guitar Craft Academy in Hollywood, a six-month program focused on electric guitars. Within a week of graduating, he started working at Fender in the Jackson Custom Shop, dressing frets. From 2013 to 2018, he worked as an assistant to Gretsch Custom Shop Senior Master Builder, Steve Stern. Andy worked with various artists during this period and is very proud of his involvement with the Malcolm Young “Salute” Jet. In 2018, Andy seized the opportunity to become the lead builder and production manager for a high-end boutique guitar company and was subsequently recruited by James Tyler to oversee

production for his shop in the San Fernando Valley.

On his return to Fender, Hicks said, “coming back to Fender, becoming part of the most prestigious custom shop in the industry, and being around so many talented builders is incredibly exciting and humbling. It also feels like I have returned home.”

When it comes to guitars, Andy incorporates his two passions: playing and building guitars. He firmly believes that these two passions are deeply connected, uniting Andy’s core approach to creating guitars. “I love interacting with guitarists,” Hicks says. “Bridging the gap between builder and player, listening to their desires and implementing them into my builds is incredibly rewarding. Nothing could be better.”

When not building guitars, Andy plays in an epic doom metal band, Stygian Crown, enjoys playing Dungeons and Dragons and goes on incredible Disneyland trips with his wife and three boys.

## DAVID BROWN

*David Brown*

David Brown’s music adventure began in the late ‘70s while he was in middle school. By the time he was in high school, he was playing in bands and working at a local store in Anaheim where he learned guitar repair and construction. By the mid ‘80s, he was working for Yamaha Music Corp. in Buena Park as a guitar technician. In 2000, David got the opportunity to work at Fender and thus began his career with the company. By 2006, he received a degree in marketing from California State University at Fullerton and was now working in the Fender Custom Shop building new models as well as making instruments for various artists.

“I hope to bring a perspective that takes into account all of my previous experiences in guitar building and construction,” he says. “I hope to create these instruments that are the industry standard when it comes to accuracy and feel for the musician. Becoming a Master Builder for the Fender Custom Shop means that you’ve arrived. There is no higher pinnacle than this.”

In 2009, David and Fender parted ways only for him to return two years later to manage the new Fender Visitor Center which was located next to the Corona manufacturing facility. While in this position, David was the first point of contact with the company’s customer base as they toured the factory and participated in building their own custom-made instruments. In 2016, the FVC closed and David departed from Fender once more. By 2017, he was managing the new G&L Custom Shop in Fullerton, California where he was the principal builder until 2020. David returned to school to pursue a teaching credential in math, but the opportunity to work once again in the Fender Custom Shop altered his course.

Apart from electric guitars being his passion, David enjoys designing and building tube amplifiers and playing original music with his classic rock band. He and his wife enjoy traveling abroad as well as rescuing and fostering dogs and cats. He also enjoys black and white landscape photography.

## LEVI PERRY

Levi Perry started at Fender’s U.S. production final assembly department in 2012, fresh out of high school in Riverside, California, where he was born and raised. He moved to the Custom Shop three years later in 2015, as a Relic artisan and tune tester and soon moved to service repair. After another three years he was promoted to Masterbuilder Apprentice in 2018.

While an apprentice Perry served as a “floater,” which meant that he worked with and learned from each Masterbuilder individually. He worked on many prestigious builds during this period, including the

Game of Thrones series, the Limited Edition Phil Lynott Precision Bass, the Limited Edition George Harrison Rocky Strat, the Limited Edition El Mocambo Heavy Relic Stratocaster and Telecaster models, and many other collections and artist instruments.

“For me, what’s important is to always be learning and growing, and to remain a student of the craft,” Perry says. “Fender has such a deep and rich history to glean from, and when you allow that history to teach and guide you while continuing to be creative and push the boundaries, you’ll be amazed at what you can create.”

## BUILD LEVEL: **CUSTOM-BUILT**

Your dreams are what make the Fender Custom Shop the reality that it is today. From its inception in 1987, the Custom Shop has grown from two builders to today's more than 50 artisans—a veteran band of builders, each a specialist dedicated to their own area of expertise—working together to build your ideal Fender to your exact specifications. From neck shaping and fretwork to finishing and aging—every step of creation—each Custom Shop craftsman brings years of hard-earned skill and dedication to bear on your Custom-Built guitar with one goal in mind: to create an instrument and playing experience that can only come from the Fender Custom Shop.

A Fender Custom-Built guitar lets you define your ideal instrument. Begin with one of our base models and choose from our vast selection of options to customize it as little or as much as you want to meet your personal needs, aesthetic taste and playing style.

Whatever shape your dream may be, our luthiers stand ready to craft an instrument that will unlock your utmost creativity and self-expression. Their passion is bringing your dreams to reality, to create the ultimate instrument—one personally customized exclusively for you.

# 02

## SELECT A BASE MODEL

Each base model includes specifications listed as period accurate but can be customized based on the player's playing style and taste.

## 03

SELECT AN  
**AGING STYLE**

**TIME CAPSULE**

SHOWN IN VINTAGE CUSTOM 1968 TELECASTER IN AGED NATURAL

Combining our original "No Buff" NOS Flash Coat Lacquer finish with Closet Classic hardware, the Time Capsule package grants these instruments the charming appearance, authentic sound and genuine mojo of an extremely lucky vintage find.

**NEW OLD STOCK (NOS)**

SHOWN IN 1956 STRATOCASTER IN WHITE BLONDE

Models from the past that have survived to the present day looking brand new. An all-lacquer finish that looks as if it hasn't aged at all—as if you went back in time and bought it.

**CLOSET CLASSIC™**

SHOWN IN LIMITED EDITION 1958 JAZZMASTER IN 2-COLOR SUNBURST

No real playing wear, but more subtle indications of the ages, such as a finish that has lost its sheen, mild discoloration of plastic parts, metal hardware showing slight oxidation, mild finish checking and minor surface scratches on the body and headstock.

**DLX CLOSET CLASSIC™**

SHOWN IN POST-MODERN TELECASTER IN FADED FIREMIST SILVER

Well taken care of and religiously polished throughout the years. The owner of this guitar took pride in keeping it clean and shiny. Over time, the finish started showing age and like a fine wine it evolved into something complex and refined. Moderate finish checking, oxidation of hardware and mild discoloration of parts give this finish its distinct look and feel.

## JOURNEYMAN RELIC®

SHOWN IN 1959 JAZZMASTER IN AGED FIESTA RED

Handed down or changed hands through the years, but mostly played around the house, with the occasional jam session or weekend gig. Has been well taken care of over the years but has finish checking, some friendly down-to-the-wood nicks and dings, dullish hardware, and moderate playing wear—a very lucky find.

## RELIC®

SHOWN IN 1960 STRATOCASTER IN AGED DAPHNE BLUE

The authentic worn-in wear of a guitar that has experienced many years of regular use in clubs and bars. Marks that tell a story, finish checking all over the body; scars, dings and dents from bridge to headstock.

25

## HEAVY RELIC®

SHOWN IN 1953 TELECASTER IN BUTTERSCOTCH BLONDE

The heaviest of the relic treatments, designed to evoke decades of the most punishing play and touring. From serious dings and wear to intensely discolored hardware and finish; the true battle-hardened workhorse.

## SUPER HEAVY RELIC®

SHOWN IN LIMITED EDITION RED HOT STRAT IN SUPER FADED AGED LAKE PLACID BLUE

The heaviest of our aging treatments, showcasing extreme wear and tear. Worn down to the wood in all the right places, broken in and comfortable like it was well-loved for decades.

## 04

SELECT  
**YOUR OPTIONS**

# TONewood OPTIONS

## BODY WOOD OPTIONS

### ALDER

A fantastic tonewood long used by Fender for their electric guitar bodies, alder is noted for bright, balanced and resonant tone with pronounced upper midrange, excellent sustain and sharp attack. It also features large, swirling grain patterns.

### ASH

Strong and dense, ash is a longtime Fender classic for electric instrument bodies. Notably resonant and sweet sounding, it's characterized by well-defined midrange and strong low end.

### PINE

Used by Fender in the early '50s, pine is a lightweight tonewood with well-balanced tone and beautiful resonance. Its grain pattern has defined swirls, making it a perfect choice for transparent finishes.

### OKUME

A warm-sounding tonewood with figured grain patterns that make it an excellent choice for a guitar body spread.

### MAHOGANY

A dense, dark tonewood that yields warm tone and midrange bite, mahogany is a great option that adds a unique and complex sonic and visual twist to your build.

### ROASTED ALDER

The roasting process will darken the wood while keeping it very stable and durable. As with a slab of wood that has dried over the years, the properties change slightly and add to the richness and depth of tone.

### ROASTED ASH

Strong and ultra-stable, a roasted ash body is a thing of beauty. Not only does the roasting process accentuate the figuring of the wood, it also crystallizes the sap, giving it the sound of old wood.

### ROASTED PINE

Roasting pine brings out all the best parts of the wood—it's full of rich harmonics with piano-like sustain. The dark caramel color and striking grain patterns match its complex and musical tonal qualities.

# QUILT/FLAME TOP OPTIONS

## QUILT MAPLE TOP

A beautifully figured wood, quilt maple works especially well with transparent and natural finishes that allow the flowing grain to show through.

## AA FLAME MAPLE TOP

AA flame maple features tiger-like striping in the wood grain. Many believe that this is caused by the tree swaying in the wind, the minerals in the ground and other ephemeral variables. We aren't positive about that, but we do know it provides a strikingly beautiful look to any instrument neck or body.

## AAA FLAME MAPLE TOP

AAA flame maple sorts a more intense concentration of figuring than AA Flame. The bold stripes are always a beautiful touch in natural and transparent finishes.

## SPALTED MAPLE

Spalted maple combines excellent strength and bright, crisp tone with incredibly unique and captivating figured lines and streaks to give your instrument an elegant look and sound.

## KOA

Beautiful and highly stable tone-wood prized for its resonance, workability and attractive figure.

## MAPLE BURL

Highly figured maple top used on our Artisan models with a gorgeous marbled swirl.

## ZIRCOTE

Known for its unique, swirly figuring with streaks of dark brown, zircote-topped instruments not only offer gorgeous aesthetics, but clean, crisp high end with fast attack when paired with ash or alder bodies.

## COCOBOLO

Used in combination with mahogany, ash or alder bodies, cocobolo combines striking highly-figured, reddish-brown grain patterns with rich, warm resonance.

# NECK WOOD OPTIONS

## MAPLE NECK

Light in color, with a bright, chimy tone, maple is a favorite amongst many Fender players for its look, feel and tone.

## FLAME MAPLE

With its strong, vibrant figure, flame maple is one of our favorite ways to liven up the look of a maple neck.

## BIRDSEYE MAPLE

Small round figuring in the wood which produces small "birdseye" markings. Used on many Custom Shop guitars, a birdseye maple neck will add a unique and striking look to your guitar.

## ROASTED MAPLE NECK

Roasted maple creates an aged and dark look to the wood as well as making it more resonant and slightly lighter in weight.

## ROSEWOOD NECK

Darker in color and warmer in tone than maple, rosewood can be specially sorted for a darker color. In 1959, all Fenders were outfitted with rosewood fingerboards, which was a significant departure from the look and tone of the previous maple boards.

## ROASTED FLAME MAPLE

Roasting maple brings out the figure and creates a caramelized dark tiger striping.

**NECK SHAPE**

## GUITAR NECK SHAPES

# GUITAR NECK SHAPES (CONT.)

# BASS NECK SHAPES

## SELECT A FRET WIRE

Custom Shop frets are made from only the highest quality nickel and can be made in a variety of different heights and thicknesses. Larger frets tend to account for easier string bending. Smaller frets are “true to vintage” in many cases and facilitate easier chording.

Medium jumbo frets are designed to be the perfect marriage between small vintage frets and modern jumbo frets. Keep the following examples in mind when choosing the frets that you want on your guitar.

### VINTAGE 45085

H: 0.045”  
W: 0.085”  
Our smallest wire, slightly larger than Fender’s original wire.

### MEDIUM VINTAGE 47095

H: 0.047”  
W: 0.095”  
Slightly lower than 6105.

### MEDIUM JUMBO 6150

H: 0.047”  
W: 0.104”  
A popular middle of the road wire, not too wide, not too tall.

\*Also available in Stainless Steel on Master Built guitars only.

### NARROW TALL 6105

H: 0.055”  
W: 0.095”  
Our most popular wire. A good alternative if vintage wire feels too small for you.

### JUMBO 6100

H: 0.057”  
W: 0.110”  
Our largest wire that gives an almost scalloped feel.

\*Also available in Stainless Steel on Master Built guitars only.

## SELECT A PICKUP OPTION

**Hand-Wound:** True to Fender history prior to 1965, hand-wound or “scatter-wound” pickups are distinctly unique in character. Each pickup has its own subtle nuances and personalized character which is what made the original Fender pickups so sought after and prized.

**Machine-Wound:** Each pickup is consistent and even in winds making each one sound and respond relatively the same. Though most of the Custom Shop pickups are hand-wound, some players prefer the consistency of machine-wound pickups, so we are happy to offer both options.

## STRATOCASTER PICKUPS

### '50S STRAT

Crafted to faithfully replicate the cutting tones reminiscent of 1950s Stratocaster® guitars. Alnico 5 magnets, vintage stagger and formvar wire.

### FAT '50S STRAT

1950s Stratocaster sound you know and love. Hot-rodDED wiring design delivers enhanced bass response and an extra shot of 21st-century attitude.

### '60S STRAT

Classic 1960s design with alnico 2 magnets, formvar wire and a vintage stagger. Strat sound with glistening highs and warm, punchy lows.

### TEXAS SPECIAL™ STRAT

Characterized by their midrange chirp, crystalline highs and tight bass, Fender Texas Special™ Strat pickups feature an overwound single-coil construction that produces big Texas-blues tone.

### DUAL-MAG STRAT

Vintage style calibrated pickup set with unbeveled alnico 5 magnets on the bass side and beveled alnico 2 magnets on the treble. The two magnet types create balance and consistency in tone and allow for improved clarity string to string.

### EL DIABLO STRAT

Overwound and dipped in the special sauce for a big open sound. Slightly hotter than the Ancho Poblanos with calibrated alnico 5 pickups with custom low G (middle and neck) and flush with high D (bridge) pole pieces.

### ANCHO POBLANO STRAT

Simmered in a secret Custom Shop sauce and then individually calibrated from neck to bridge. Uniquely overwound by hand for a wide range of high-output tones—from blistering-hot output to sizzling vintage warmth—with plenty of tonal flexibility.

### VINTAGE NOISELESS™ STRAT

Produce all the brilliant clarity, definition and harmonic attributes of vintage single-coil Strat tone without the hum.

### TOMATILLO STRAT

Cousins to the Ancho Poblanos, dipped in the same secret sauce. Alnico 2 magnets will simulate what an older alnico 5 might sound like today for a sweeter, more flavorful tone.

# TELECASTER PICKUPS

### '51 TELE/NOCASTER

Created with the original design in mind to accurately mimic the twang and shimmer of the originals. These period-correct single-coil pickups impart tight low end and clear, balanced midrange.

### '51 LOADED NOCASTER

Extra winds of #43 gauge enamel wire give these pickups fat, juicy tone. Perfect for driving a preamp into gritty overdrive, these high-output pickups burn with vintage-inspired tone, thanks to the bridge pickup's alnico 3 magnets and neck pickup's alnico 5 magnets.

### '56/'57 TELECASTER

An accurate 1:1 recreation of the Tele pickups we constructed during '56/'57. These pickups have all the grunt and snarl of the originals, thanks to the unbeveled, staggered alnico 5 magnets and enamel-coated wire.

### '63 TELE

A true replication of the original '63 Tele Pickups with all the bite and warmth to spare. Alnico 2 magnets, vintage stagger and enamel wire.

### '67 TELE

Lower output Tele pickups with grey bobbins and copper baseplate with a vintage stagger, alnico 5 magnets and enamel wire for crystal clear Tele twang.

### TWISTED TELE

High-output Telecaster guitar tone with a dash of sparkling Stratocaster® guitar character.

### TEXAS SPECIAL TELE

Fender Custom Shop Texas Special Tele pickups are built to produce blistering hot output, along with noticeable presence and midrange.

# BASS PICKUPS

### '64 JAZZ BASS

These vintage-style pickups produce warm, clear and articulate tone, with great low-end definition, up-front midrange punch and singing high end.

### '75 JAZZ BASS

Vintage bobbin construction, Alnico 5 magnets, flush mounted pole pieces and enamel wire provide warm tones, enhanced dynamics and even string response.

### NOISELESS JAZZ BASS

Fender Noiseless Jazz Bass pickups produce all the brilliant clarity, definition and harmonic attributes of a vintage Jazz Bass without the hum.

### HAND-WOUND P-BASS

Alnico 5 magnets and enamel wire, hand-wound just like we did in the '50s and '60s. The most iconic bass pickup in the world.

# HUMBUCKER PICKUPS

### SHAWBUCKER

Full of multi-dimensional tone with well-defined overtones, this open-coil pickup complements and balances your guitar's natural voice while playing well with other pickup designs.

### CuNiFe® WIDE RANGE

The look of the famous Fender pickup design of the early 1970s with period correct magnets, as used on original-era Telecaster Thinline, Telecaster Custom and Telecaster Deluxe models.

# P-90 PICKUPS

### CSP-90

This classic design sings with pure Fender tone, bringing clear articulation to every note you play, from delicately nuanced cleans to snarling, spitting means.

## STRATOCASTER BRIDGES

### VINTAGE SYNCHRONIZED TREMOLO

Original Stratocaster tremolo made using original die-cast moulds and punch presses.

### 2-POINT CLASSIC PLAYER TREMOLO

Polished steel two-point synchronized tremolo bridge assembly.

### 2-POINT CUSTOM CLASSIC TREMOLO

Polished steel two-point synchronized tremolo bridge assembly with polished-steel block saddles.

### RSD STRAT TREMOLO

Vintage style with improved pivot geometry, plating tolerances, string spacing and arm tension adjustment.

### FLOYD ROSE® ORIGINAL

Double-locking tremolo bridge, recessed for pick hand comfort providing laser-accurate intonation and ultra-stable tuning when combined with the Floyd Rose R3 locking nut.

### VINTAGE HARD-TAIL

Original hard-tail Strat bridge made using original die cast moulds and punch presses.

## TELECASTER BRIDGES

### '51-'53 TELECASTER - BRASS SADDLES

Telecaster ashtray bridge plate with original tooling marks, serial number and three brass saddles.

### '54-'57 TELECASTER - STEEL SADDLES

Period correct ashtray bridge plate and steel barrel saddles for bright Tele® twang.

Period correct ashtray bridge plate and threaded steel saddles for bright Tele® twang.

Vintage style ashtray bridge plate with notched steel saddles.

### RSD TELE

Low profile bridge plate, compensated brass saddles with refined look and feel.

### CUSTOM DELUXE TELE

Modern six-saddle bridge assembly with string-through-body plate and polished steel saddles.

### VINTAGE RSD TELE

Vintage style ashtray bridge plate with compensated RSD saddles.

## BASS BRIDGES

### VINTAGE THREADED SADDLES

Genuine Fender bass bridge assembly with nickel-plated steel bridge plate and four threaded barrel saddles.

### VINTAGE GROOVE SADDLES

Vintage Fender bass bridge assembly with nickel-plated steel bridge plate and four grooved barrel saddles.

### AMERICAN DELUXE BASS BRIDGE

Chrome plated steel bridge plate with partially threaded stainless steel saddles and string through body or top load option.

### RSD BASS

Hi-Mass bridge constructed from a solid brass billet with threaded steel saddles.

## JAZZMASTER/JAGUAR BRIDGES

### RSD J-BRIDGE

Two movable brass saddles bolted to a cold rolled steel base provides an articulate tone with more punch, attack and continuity than its predecessor. The J-Bridge lets the sound of the guitar ring through and gives a stronger primary note.

### VINTAGE JAZZ/JAG

Nickel-plated bridge assembly with six adjustable threaded saddles.

- 7.25" TO 12" COMPOUND RADIUS
- 9.5" TO 12" COMPOUND RADIUS
- 9.5" TO 14" COMPOUND RADIUS
- 9.5" TO 16" COMPOUND RADIUS (BASS ONLY)
- SCALLOPED FINGERBOARD

### WIDTH AT NUT

- BASE MODEL WIDTH AT NUT
- 1.625"
- 1.650"
- 1.685"
- 1.6875"

### NUT MATERIAL

- BASE MODEL NUT MATERIAL
- MICARTA
- BONE
- GRAPHITE
- LSR ROLLERNUT - 1.6875" NUT (RH ONLY)

### NUMBER OF FRETS

- BASE MODEL NUMBER OF FRETS
- 22 FRETS (STRAT®/TELE®)

### FRET WIRE

- BASE MODEL FRET WIRE
- VINTAGE STYLE
- MEDIUM VINTAGE 47095
- NARROW TALL 6105
- MEDIUM JUMBO 6150
- JUMBO 6100
- OTHER FRET WIRE \_\_\_\_\_

### POSITION & SIDE MARKERS

- BASE MODEL DOT MATERIAL
- BLACK
- WHITE
- VINTAGE CLAY
- MOP WHITE
- ABALONE
- BLACK OPAQUE BLOCK INLAY
- BLACK POLY PEARL BLOCK INLAY
- WHITE POLY PEARL BLOCK INLAY
- WHITE MOP BLOCK INLAY

### 12<sup>TH</sup> FRET DOT SPACING

- BASE MODEL DOT SPACING
- WIDE 12TH FRET DOT SPACING
- NARROW 12TH FRET DOT SPACING

### TRUSS ROD

- BASE MODEL TRUSS ROD
- BI-FLEX™ (STRAT®/TELE® HEADSTOCK ADJUST)

### HARDWARE COLOR

- GOLD

### NECK PLATE

- BASE MODEL NECK PLATE (R SERIAL)
- V-LOGO NECK PLATE
- F-LOGO NECK PLATE
- F-LOGO NECK PLATE (CONTOURED HEEL)

### BRIDGE

- BASE MODEL BRIDGE

### STRATOCASTER® BRIDGE

- AM VINTAGE SYNCHRONIZED TREMOLO
- CUSTOM SHOP VINTAGE STRAT TREMOLO
- 2-POINT CLASSIC PLAYER TREMOLO
- 2-POINT CUSTOM CLASSIC TREMOLO
- RSD STRAT® TREMOLO
