BLAZUN

WHY USE UNBREAKABLE DRINKWARE?

ZERO BREAKAGES

Using unbreakable drinkware, the average hospitality business will save 25-40% a year on glass replacements! Blazun has a guaranteed useful lifespan, as opposed to glass.

SAFETY

Polycarbonate is completely shatterproof, ensuring a higher level of safety for staff, customers, children and all members of the public. It can be used safely in parks, pools, on beaches, rooftops, boats and any outdoor areas.

SUPERIOR THERMAL RETENTION

Polycarbonate has superior insulation properties to glass, keeping cold drinks cold, and hot drinks hot, for longer.

ECO FRIENDLY

Polycarbonate is 100% recyclable and has a carbon footprint almost one tenth the size of the glass equivalent. It uses half as much energy and creates seven times less carbon dioxide during its production, compared to glass.

BLAZUN CRACKING GUARANTEE

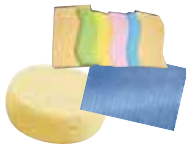

Blazun is guaranteed against cracking and stress fracturing. See our video that demonstrates the superior quality of Blazun.

MAINTAINING YOUR DRINKWARE HOW TO CLEAN

THE GOOD

Hand wash & machine wash using Polyclean by Blazun. For heavy soiled glasses use Revive the polycarbonate soak exclusive for Blazun products. When hand washing, only use a soft sponge and avoid repetitive movements like twisting whilst cleaning.

THE BAD

At all cost, avoid scourers or cleaning clothes that are abrasive. These will make your polycarbonate glasses appear scratched and cloudy. Do not use these on polycarbonate drinkware!!

THE UGLY

Glass scrubbers are also damaging to polycarbonate surfaces. However it is recommended that if you need to use these cleaning devices, that you fold a kitchen cloth over and place it on the brushes to create a protective barrier.
