Financial Services

Enhance data security and maximize mobility with Android Enterprise

Android Enterprise is built to help financial services organizations stay ahead of the curve in the digital age. With a secure platform that is easy to manage and optimized for productivity, Android Enterprise can help your organization stay agile in the face of technological change and industry disruption.

According to a recent survey by Accenture*:

2/3

of financial services executives said the change of pace in their businesses has never been greater.

58%

of financial services employees are expected to work remotely in the next two years.

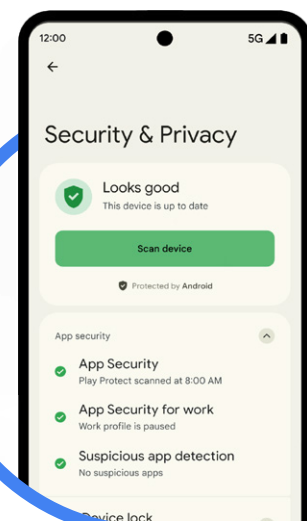

48%

of financial services decision-makers rank security at the #1 tech priority.

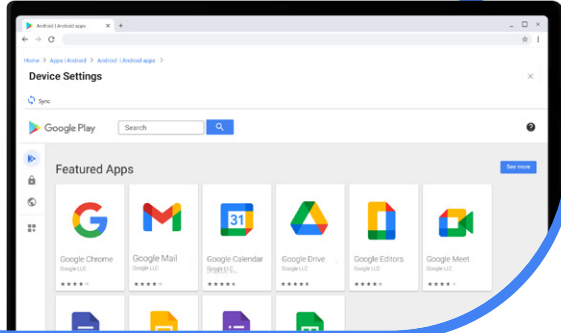

Android Enterprise helps financial services organizations secure and optimize their mobile strategy

Built-in, proactive security

- Protect data and devices with multi-layered security spanning hardware, operating system, Google Play Protect, and EMM-enforced policy controls.
- Ensure app security with Google Play Protect that helps secure over 2.5 billion Android devices, scanning more than 125 billion apps each day.
- Get on-device protection with critical capabilities such as verified boot, device encryption, and a trusted execution environment (TEE).

android

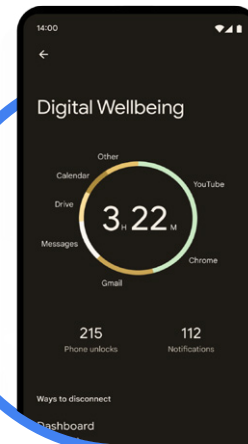

Easy management and fast deployment

- Customize company policies to fit business needs with granular controls and comprehensive management capabilities.
- Secure central app management and distribution via Managed Google Play.
- Configure devices quickly and remotely with zero-touch enrollment.

Powerful employee experiences

- Offer separate work and personal profiles on Android devices, helping employees feel more comfortable switching their devices to personal use and knowing that their privacy is respected.
- Help employees remain at their very best and stay productive when at work, reducing notifications and erroneous alerts with 'focus mode'.
- Improve employees' work-life balance with 'pause work apps' to help them pause work app notifications when they're done working.

Open platform with innovative devices

- Leverage out of the box solutions from leading enterprise mobility developers, with an open development platform for fast, simple and deep technology integrations.
- Choose from a wide variety of premium and ruggedized Android smartphones, foldables and tablets, or customized hardware tailored to your specific needs.
- Meet your business needs with platform flexibility and OEM customization that provide premium user experiences.
