

INFOSYS STRATOS: A HOLISTIC BUSINESS CAPABILITY PLATFORM FOR HIGH-TECH ON ORACLE CLOUD

Infosys and Oracle transform your environment
into a cloud-connected enterprise

The high-tech industry today faces multiple challenges, including the unprecedented uncoupling of the supply chain, a highly competitive mergers and acquisitions (M&A) climate, product proliferation across several endpoint industries, and rising eco-consciousness. The emergence of digitally reliant business models and the evolution of innovative technologies and automation can be a help or a hindrance as enterprises search for solutions to guide them into the future.

Infosys and Oracle are committed to helping your company overcome these challenges and transform your business into a resilient, cloud-connected enterprise with the agility to adapt to ever-changing circumstances. Through next-generation technology, empowered and design-thinking-enabled talent, and unique commercial models, we help you increase efficiency, maximize productivity, minimize risk, accelerate time to market, and continuously improve the user experience.

A seamless cloud migration designed specifically for high-tech enterprises

Infosys and Oracle have a proven track record of helping high-tech organizations thrive and grow. With [Infosys Stratos](#), a holistic business capability platform uniquely designed for high-tech enterprises, we drive digital transformation and value realization for core business systems on Oracle Cloud. Powered by [Infosys Cobalt](#), the Infosys Stratos ecosystem offers industry-specific assets and cloud solution blueprints to help you smoothly migrate your business applications.

The platform makes migrating to Oracle Cloud seamless through plug-and-play functionality for every sub-segment of the high-tech industry, including original component manufacturers, fabless IP providers, semiconductor and original equipment manufacturers, integrated device manufacturers, and more.

Industry-specific preconfigured solutions, prebuilt connectors, and process flows addressing product white spaces minimize adoption risk and ensure as much as 30-40% reusability¹. Further, the Infosys managed services and enterprise resource planning as a service (ERPaaS) subscription model significantly reduces your total cost of ownership (TCO) by allowing the bundling of licenses, implementation, and postproduction maintenance services.

An American computer hard disk drive manufacturer and data storage company used Infosys Stratos on Oracle Cloud to execute an enterprise resource planning (ERP) modernization and data unification initiative. The project involved:

harmonizing more than

150 processes

consolidating

140 business units

resulting in a

**43% reduction
in suppliers²**

Amplify your organization's competitive advantage with Infosys Stratos

The Infosys modular Stratos platform uses artificial intelligence (AI) and machine learning (ML) to enhance enterprise capabilities such as procurement, maximize manufacturing efficiency, and support strategic outsourcing and subcontracting decisions. Infosys Stratos combines the power of strategic tools, automation, prebuilt core business capabilities, and innovation accelerators to improve performance across your enterprise while delivering at least 30% savings in time and effort for Oracle Cloud implementations³.

Optimize manufacturing execution: Increase uptime, improve costing accuracy, and reduce inventory with a full, self-reliant, out-of-the-box manufacturing execution system that features near real-time cost information, a real-time production dashboard, and minimal operator training. Reduce operations time and improve transparency and tracking through automation.

Drive greater profitability with automated procurement: Garner higher cost savings and predictability through a single source of truth for cost data. Predictive analytics and an accelerated analysis cycle time enable "what-if" simulations that help you make faster, better procurement decisions based on more granular levels of reporting.

Build a self-curating supply chain: Boost revenue by leveraging data and AI for real-time recommendations that help you improve on-time delivery to your customers and provide end-to-end visibility across the supply chain. Reduce costs by anticipating potential disruptions, optimizing sourcing, and eliminating excess inventory.

Let us help your high-tech business become a resilient, cloud-connected enterprise

Our goal is to help high-tech companies transform their businesses into resilient, cloud-connected enterprises through comprehensive and accelerated transformation solutions. Simplify your journey to the cloud with flexible deployment models and segment-specific offerings, and connect better with your customers, employees, and partners by using Oracle Cloud to enhance the data-driven, real-time decision-making that fuels business agility.
