

INFOSYS IDENTITY AND ACCESS MANAGEMENT (IAM) SERVICES

Infosys Identity and Access Management (IAM) Services built on the foundation of Infosys' **S34D principle**, assures **digital trust** and **cyber resilience** at scale to its customers through **innovation, service excellence** and **competence**.

Infosys IAM Services: Protecting millions of identities for global enterprises

Our Partner Ecosystem for Next Generation Identity Solutions

Identity-as-a-Service

End to end protection and management of enterprise identity life cycle and associated governance processes.

-
-
-

Identity Management and Governance

Securing and empowering enterprise and workforce with next generation, AI powered identity and access governance platform.

-
-
-

Access Management

Securing the enterprise digital journey of end customers, partners and employees with NextGen authentication and identity management solution.

-
-
-

Privilege Access Management

Managing, securing, and monitoring privileged accounts and their accesses across the enterprise IT landscape with zero trust access principle.

-
-
-

Cloud Infrastructure Entitlement Management

Securing the enterprise cloud fabric by leveraging AI-powered cloud identity access for enhanced visibility of identity risk posture and risk remediation recommendations.

-
-
-

Password Less Authentication

Securing the enterprise digital journey of end customers, partners and employees with futuristic, decentralized identity management and password less authentication approach.

-

Client Testimonials

“

This was one of the smoothest projects at Equatex, completely managed by Infosys. They analyzed and understood the challenges in our in-built IDAM tool and proposed the right solution to address all our concerns! A big shout-out to the Infosys team who implemented the solution and brought it to life. Their vision for our access management system helped us focus on our core business while Infosys took care of the processes.

They were instrumental in enhancing our identity and access management system. They implemented access review, optimized processes, and onboarded applications seamlessly. Currently, the team is focused on RBAC (role-based access control). I am sure there is much more to come as the system gets better every day.

_____ **Martin Wuethrich**
CTO, Equatex

“

Our partnership with Infosys goes back to 2009 and has been proven to be critical to our success in building up our cyber capability and IAM in recent years. They've consistently provided excellent services and outcomes, especially by staying close to our needs and working to proactively ensure that we have what we need. Infosys' commitment to our success has been meaningful, consistently offering a fusion of capability, talent, a track record of exemplary delivery and a steadfast focus on our leadership. Infosys demonstrates excellence with delivering seamless experiences, operational efficiency, personalization, and a paramount customer experience.

As we continue our journey with Infosys, we're really confident that in our capacity to continue to improve on our IAM security portfolio, we will also enhance our client experience through Infosys' unparalleled expertise.
