# ENTERPRISE CHALLENGES

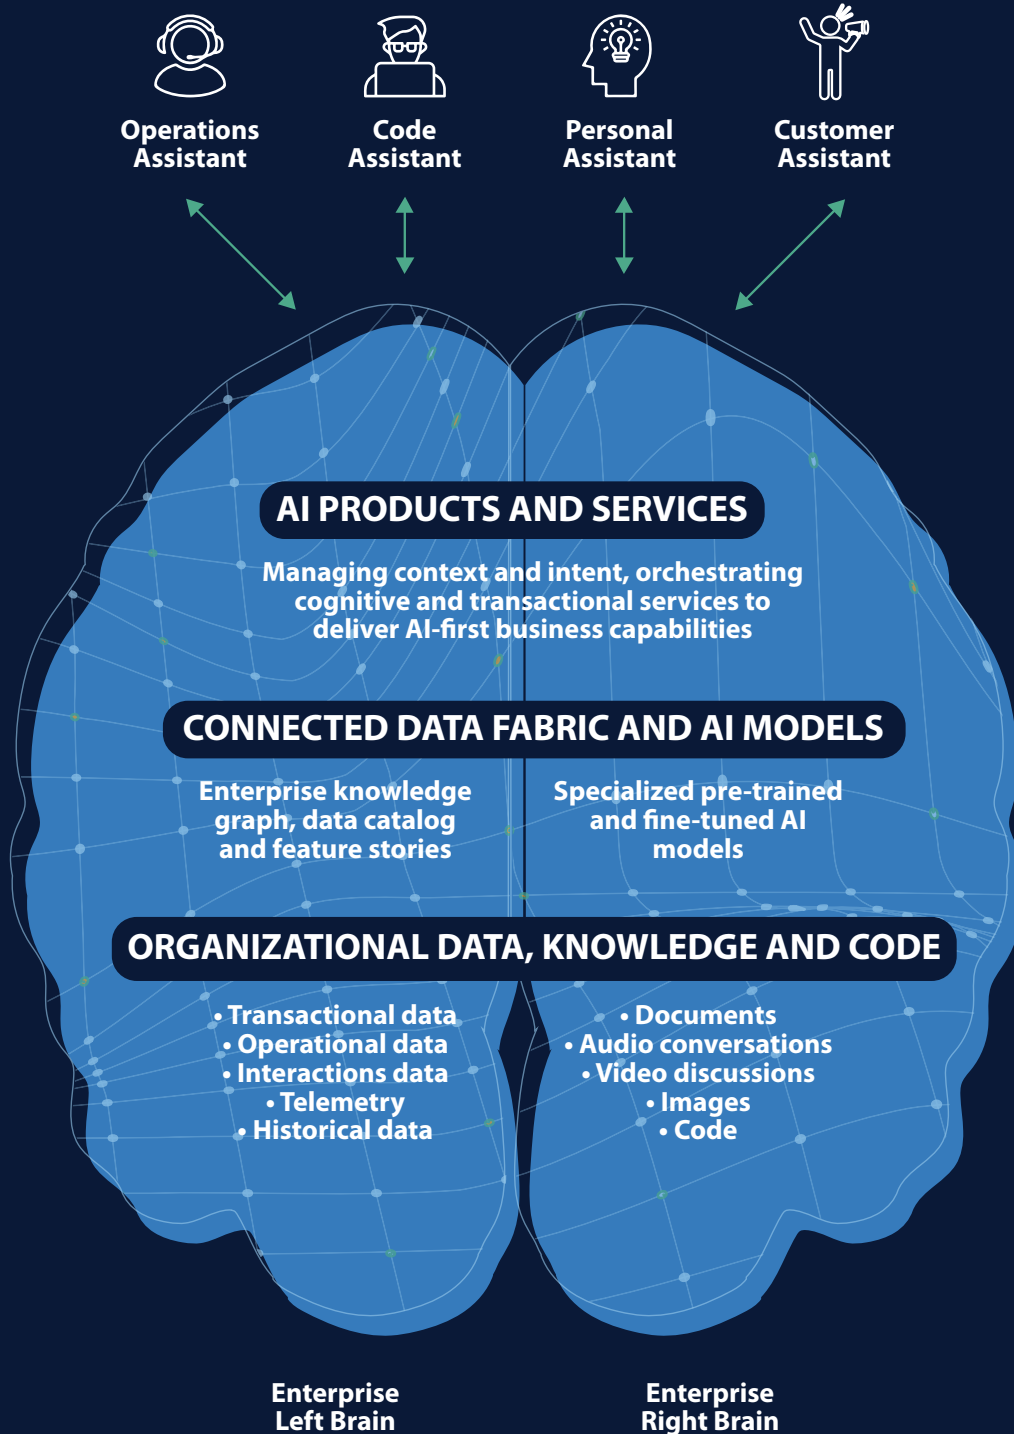

Large enterprises face several challenges from inherent legacy systems to limited data availability, and culture. In addition to navigating the complexities of scaling AI, bias and ethics also require careful consideration. As smaller enterprises and startups turn to reimagined models, the intensified competition makes the task of navigating the existing hurdles even more difficult.

A strategic shift to an AI-first approach can help address these challenges in enterprises that are building an AI core.

## AN AI-FIRST ARCHITECTURAL APPROACH

Enterprises today have fast-tracked their AI adoption, moving from generalized to specialized capabilities. This shift is marked by distinct evolution patterns, striking a balance between factors such as business impact and value against time, cost, and complexity. From consumer-centric personal AI assistants to industry-specific AI applications using specialized pre-trained models, the journey includes the adoption of AI across various industry domains.

# Unifying the left and right sides of the enterprise brain can bring structural ambidexterity to unlock the full potential of an AI-first approach

## AN AI-FIRST OFFERING FOR BUSINESS VALUE ACCELERATION LEVERAGING GENERATIVE AI

Businesses today need a comprehensive solution that enhances human potential, elevates individual and organizational capabilities, and establishes an interconnected ecosystem of innovation and efficiency. At Infosys, we understand this need and go beyond traditional solutions.

Infosys Topaz helps amplify the potential of humans, enterprises, and communities to tap into the next generation of opportunities. It helps create value from unprecedented innovations, pervasive efficiencies, and connected ecosystems. Infosys Topaz leverages Infosys' applied AI framework to build an AI-first core that empowers enterprises to deliver cognitive solutions and accelerate value creation.

It capitalizes on more than 12,000 AI assets, over 150 pre-trained AI models, and 10+ AI platforms steered by AI-first specialists and data strategists. Incorporating a 'responsible by design' approach, it ensures an uncompromising commitment to ethics, trust, privacy, security, and regulatory compliance.

With its AI-first strategy, Infosys Topaz brings together transformative services, predictive intelligence models, and highly adaptable platforms to drive growth and unlock efficiencies at scale. It helps enterprises tackle their immediate challenges and drive sustainable growth. It also helps conceptualize incremental value from micro-changes within organizations, service and process improvements, and engineering and productivity enhancements.

# MAXIMIZING THE VALUE OF AI FOR ENTERPRISES WITH INFOSYS TOPAZ

Infosys Topaz seamlessly integrates our insights, best practices, and resources to accelerate AI strategies for enterprises.

## INFOSYS TOPAZ SUCCESS STORIES

A food and beverages giant leveraged Infosys Topaz to seamlessly integrate disparate data signals from new partners to enhance the out-of-store customer experience with a remarkable precision of more than 95%.

A leading British bank used Infosys Topaz to transform over 2,000 customer service processes to operate in near-real-time, saving a week's worth of time and effort.

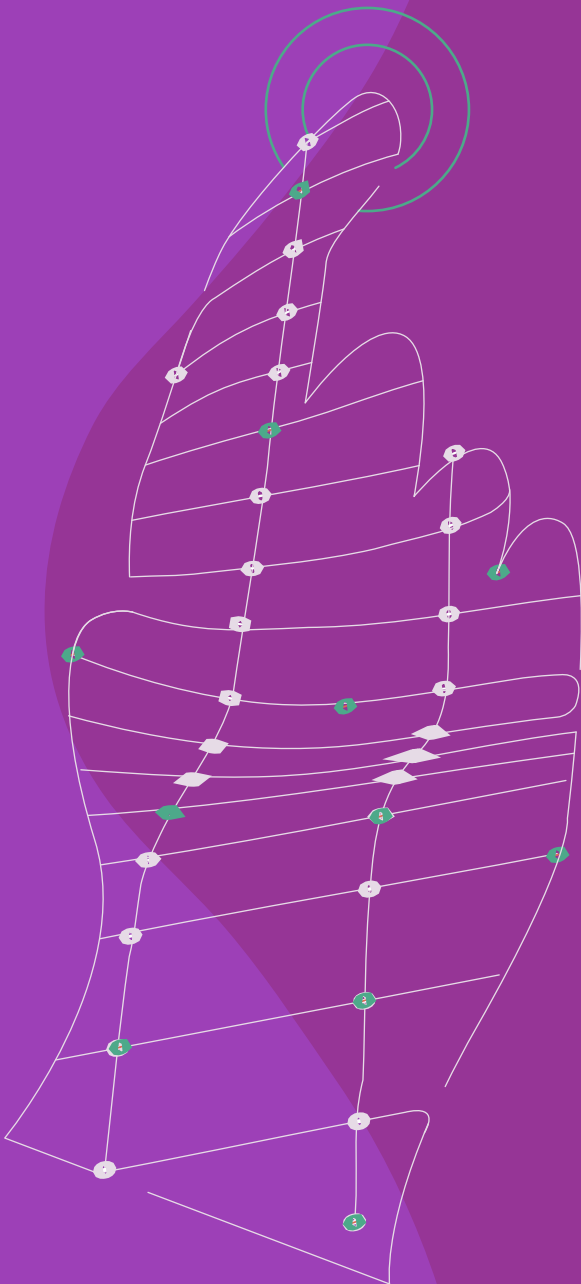

One of the world's leading national railway companies worked with Infosys Topaz to build profitable agile value chains with best-fit partners from the market. This smart hub helped enhance various functions, including first and last-mile logistics.

# LEADING BY EXAMPLE

# BEING AI-FIRST WITH INFOSYS TOPAZ

We are taking an AI-first approach to our own transformation. Leveraging Infosys Topaz and the power of generative AI, analytics, and cloud, we are accelerating the evolution of our own market offerings and enterprise transformation, responsibly. We are building incremental value from micro changes, to enhance client service, reimagine business processes, improve software engineering, and boost productivity.
