

LEAD THE CHANGE TO GREENER

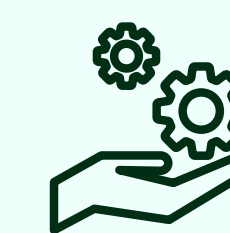

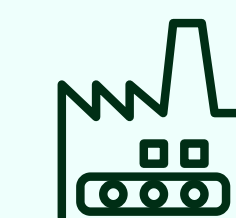

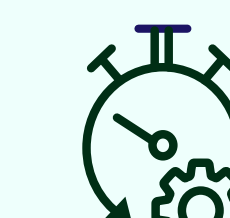

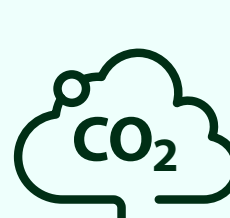

Carbon Management for Energy Transition Now

Carbon management is a necessity for any company looking to remain competitive in today's economy, and meet their net zero goals. Organizations looking to lower their carbon emissions need a partner to create a framework that can help navigate their carbon management journeys.

DECARBONIZATION THAT GOES BEYOND COMPLIANCE

Infosys offers holistic solutions to build your decarbonization program that offers visibility into CO2 emissions from direct and indirect sources so you can devise effective policies to reduce your carbon footprint.

| | | |
|--|---|---|
|  IT-as-a-service for low-carbon ventures |  Carbon capture project management |  Responsible sourcing |
|  Emissions management |  Flaring optimization |  Carbon credit trading |
|  Transportation and logistics optimization |  Climate accounting | |

DIVE DEEP INTO DECARBONIZATION

Our solutions help organizations with their decarbonization efforts at every stage of their journey.

| | | |
|--|--|--|
| Capture and Storage | Operations and Logistics | Measure and Manage |
| Advanced data analysis and robust simulation process to help with sub-surface analysis | Optimize large-scale, multimodal and dynamic networks for CCUS | Emissions measurement, reporting and management capabilities |

REALIZATION OF THE DECARBONIZED AMBITION

| | | | |
|---|--|---|--|
|  Climate Action |  Sustainability Branding |  Corporate Goodwill |  National Leadership |
|  Reduced Inequalities |  Environmental Stewardship |  Profitability |  Social Responsibility |
