HiPPI Protocol Support Services, Version 4.5.0 Release Notes

The following versions of the HiPPI LPP 5765-E40 are currently available:

- HiPPI Protocol Support Services, Version 4.3.2 is an enhancement to early releases that incorporates PTF's (code changes and fixes) into a formal release. The HiPPI protocols supported in this level include IPI-3, Framing Protocol, and NDA.

- HiPPI Protocol Support Services, Version 4.5.0 contains enhancements for use with IBM eServer pSeries 690 servers and special features for AIX 5L for POWER Version 5.1 with the 5100-02 Recommended Maintenance package. The HiPPI protocols supported in this level are IPI-3 and Framing Protocol. It does not support NDA.

If migrating from HiPPI 4.3.x to HiPPI 4.5.0, hippi.nda must be deinstalled. Any HiPPI disk array devices should be removed first. This can be done manually before the migration or it will be done as part of the migration.

This release contains the latest version of the adapter resident flash images. To determine if the latest flash image is installed on the HiPPI adapter, run the following script:

```
/usr/bin/hippi/flash/flash_check hippi0 (assuming hippi0)
```

If you have more than one HiPPI adapter, run the above script for each adapter. If the firmware is not current, instructions on how to update the adapter will be provided as output of the **/usr/bin/hippi/flash/flash_check** command.

Appendix. Notices

This information was developed for products and services offered in the U.S.A.

IBM may not offer the products, services, or features discussed in this document in other countries. Consult your local IBM representative for information on the products and services currently available in your area. Any reference to an IBM product, program, or service is not intended to state or imply that only that IBM product, program, or service may be used. Any functionally equivalent product, program, or service that does not infringe any IBM intellectual property right may be used instead. However, it is the user's responsibility to evaluate and verify the operation of any non-IBM product, program, or service.

IBM may have patents or pending patent applications covering subject matter described in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to:

IBM Director of Licensing
