

XtAppAddActions – register an action table

void XtAppAddActions(*app_context*, *actions*, *num_actions*)

XtAppContext *app_context*;

XtActionList *actions*;

Cardinal *num_actions*;

app_context Specifies the application context.

actions Specifies the action table to register.

num_args Specifies the number of entries in this action table.

The XtAppAddActions function adds the specified action table and registers it with the translation manager.
