

## **XtStringConversionWarning** – issue a conversion warning message

```
void XtStringConversionWarning(src, dst_type)  
    String src, dst_type;
```

*src* Specifies the string that could not be converted.

*dst\_type* Specifies the name of the type to which the string could not be converted.

The **XtStringConversionWarning** function issues a warning message with name “conversionError”, type “string”, class “XtToolkitError, and the default message string “Cannot convert “*src*” to type *dst\_type*”.

**XtStringConversionWarning** has been replaced by **XtDisplayStringConversionWarning**.

**XtAppAddConverter(3Xt), XtAppErrorMsg(3t), XtConvert(3Xt),  
XtDisplayStringConversionWarning(3Xt)**
