

FRONT

PICTURE 1

September 25, 1990

This pamphlet contains procedures for isolating problems to a FRU, a Symptom-to-FRU Index, and a parts listing for the IBM Personal System/2 Model 80.

This pamphlet is intended to be used with the IBM Personal System/2 *Hardware Maintenance Reference* manual (part number 15F2190, form number S15F-2190-00) and the IBM Personal System/2 *Hardware Maintenance Service* manual (part number 15F2200, form number S15F-2200-00).

Part Number 84F8547

Form Number S15F-2199-01

FRONT_1 Safety Information

Refer to the *Hardware Maintenance Service General Information* pamphlet for the following information:

- General Safety
- Electrical Safety
- Safety Inspection Guide.

Second Edition (September 1990)

The following paragraph does not apply to the United Kingdom or any country where such provisions are inconsistent with local law:

INTERNATIONAL BUSINESS MACHINES CORPORATION PROVIDES THIS PUBLICATION "AS IS" WITHOUT WARRANTY OF ANY KIND, EITHER EXPRESS OR IMPLIED, INCLUDING, BUT NOT LIMITED TO, THE IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. Some states do not allow disclaimer of express or implied warranties in certain transactions, therefore, this statement may not apply to you.

This publication could include technical inaccuracies or typographical errors. Changes are periodically made to the information herein; these changes will be incorporated in new editions of the publication. IBM may make improvements and/or changes in the product(s) and/or the program(s) described in this publication at any time.

It is possible that this publication may contain reference to, or information about, IBM products (machines and programs), programming, or services that are not announced in your country. Such references or information must not be construed to mean that IBM intends to announce such IBM products, programming, or services in your country.

Requests for technical information about IBM products should be made to your IBM Authorized Dealer or your IBM Marketing Representative.

IBM may have patents or pending patent applications covering subject matter in this document. The furnishing of this document does not give you any license to these patents. You can send license inquiries, in writing, to the IBM Director of Commercial Relations, IBM Corporation, Purchase, NY 10577.

1.0 General Checkout

The advanced diagnostic tests are intended to test *only* IBM (*) products. Non-IBM products, prototype cards, or modified options can give false errors and invalid system responses.

(*) Trademark of the International Business Machines Corporation.

Subtopics

- 1.1 How to Diagnose Combined FRUs
- 1.2 How to Use Error Messages

1.1 How to Diagnose Combined FRUs

If an adapter or device consists of more than one FRU, an error code may be caused by any of the FRUs. Before replacing the adapter or device, remove the FRUs, one by one, to see if the symptoms change.

+----+

- Remove the Reference Diskette and restart the system.

DID THE ERROR REMAIN?

Yes No

| |
| |
| +----+
| |012|
| +----+
| If you suspect another problem, or want to run system checkout,
| continue with Step 014.

+----+

|013|

+----+

Go to "Symptom-to-FRU Index" in topic 12.0.

+----+

|014|

+----+

- Insert your Reference Diskette.
- Press Ctrl+Alt+Del and check for the following responses:
 1. One or two short beeps.
 2. IBM logo screen appears.

DID YOU RECEIVE THE RESPONSES LISTED ABOVE?

Yes No

| |
| |
| +----+
| |015|
| +----+
| Go to "Symptom-to-FRU Index" in topic 12.0.
| - or -
| If that does not correct the problem, go to "Undetermined Problem" in
| topic 4.0.

+----+

|016|

+----+

- Advance to the Main Menu.
- Press Ctrl+A and run system checkout.

Notes:

1. If the system has incorrect keyboard responses, go to "Keyboard" in topic 9.0.
2. If the printer has incorrect responses, go to "Printer" in topic 10.0.
3. If the display has problems such as jittering, rolling, shifting, or being out-of-focus, go to "Display Self-Test" in topic 7.0.
4. If a minimum of 512KB of memory is not active, the diagnostic tests cannot be loaded.

IS THE LIST OF INSTALLED DEVICES CORRECT?

Yes No

| |
| |
| +----+
| |017|
| +----+
| Go to "Installed Devices List" in topic 2.0.

+----+

|018|

+----+

- Run the diagnostic tests.

DID THE TESTS IDENTIFY A FAILURE?

Note: If the test stops and you cannot continue, replace the last device being tested.

Yes No

| |
| |
| +----+
| |019|
| +----+
| **Note:** If you noticed an error symptom or if you received any POST
| error codes when the system was powered-on, go to
| "Symptom-to-FRU Index" in topic 12.0.
|
| You may have an intermittent problem:
| Check for damaged cables and connectors.

IBM PS/2 Model 80 HMS
How to Use Error Messages

- Reseat all adapters, drives, and modules.
- Check the system unit fan for proper operation.
- Start an error log and run the tests multiple times.

+---+

|020|

+---+

Follow the action described on the screen. If that does not correct the problem go to "Symptom-to-FRU Index" in topic 12.0.

2.0 Installed Devices List

If an adapter or device is missing from the list, you may have one of the following conditions:

- Your Reference Diskette does not contain the module of code required to support that device.
- The missing device is a 5.25-Inch 360KB External Diskette Drive adapter or another unrecognizable adapter.
- The missing device is defective.
- An adapter is defective.

Subtopics

- 2.1 Automatic Configuration
- 2.2 Device Type
- 2.3 SCSI Devices
- 2.4 Non-SCSI Devices

2.1 Automatic Configuration

Warning: A customized setup configuration (other than default settings) may exist on the system you are servicing. Running Automatic Configuration may alter those settings. Note the current configuration settings (using the View Configuration option) and verify that the settings are in place when service is complete. (For more information about configuration, refer to the *Hardware Maintenance Reference* manual.)

2.2 Device Type

Run **Automatic Configuration** (see "Automatic Configuration" in topic 2.1 before continuing) and determine which type of device, SCSI or non-SCSI, is missing from the Installed Devices List, in Advanced Diagnostics, then continue with the following steps. (If SCSI and non-SCSI devices both are missing, go to "Undetermined Problem" in topic 4.0.)

2.3 SCSI Devices

The adapter supporting the missing device may be defective. If more than one SCSI adapter is installed, isolate them one at a time.

1. Power-off the system and disconnect all internal and external cables attached to the SCSI adapter.
2. Terminate the adapter, as required.

Warning: See "Automatic Configuration" in topic 2.1 before continuing.

3. Power-on the system and run **Automatic Configuration**. If the adapter is not on the Installed Devices List, in Advanced Diagnostics, the adapter is defective. If the adapter is on the list, run the adapter diagnostic tests.
4. If the adapter fails the tests, replace it. If the adapter passes the tests, a different adapter may be defective.
5. Reconnect the cables to the SCSI adapter, then terminate the adapter, as required.
6. Go to "Undetermined Problem" in topic 4.0 to find the problem.

2.4 Non-SCSI Devices

The missing device is defective. If that does not correct the problem, go to "Undetermined Problem" in topic 4.0.

Note: If the number of diskette drives shown on the list is incorrect, an error can occur during the tests. Restart the system and verify that the drive information on the **Set Configuration** menu is correct, then continue testing.

3.0 Power-On Password

To service a system with an active, unknown, power-on password, do one of the following, depending on which battery and speaker assembly is installed:

- On the type with two pins on the side of the speaker assembly, short the pins together.
- On the type with no pins, insert a meter lead into the connector (protruding from under the battery) and short the other end of the lead to frame ground.

Power-on the system and leave the assembly shorted until completion of POST. This deactivates the password.

4.0 *Undetermined Problem*

1. Power-off the system.
2. Remove or disconnect one of the following adapters or devices:
 - Non-IBM devices
 - Any external device (modem, printer, or mouse)
 - Math coprocessor
 - Any adapter
 - Fixed-disk or diskette drive
 - Memory-module kits.
3. Power on the system.
4. If the symptom remains, repeat steps 1, 2, and 3 until you find the failing adapter or device.
5. If all adapters and devices have been removed and the problem remains, check the power supply voltages. If the voltages are correct, replace the system board. If the voltages are not correct, replace the power supply.

5.0 Power Supply Voltages / Fan

If the voltages are not correct, or if the fan is not running, replace the power supply.

Vdc Minimum	Vdc Maximum	-Lead Pin	+Lead Pin
-9.0	-15.0	2	9
+9.0	+15.0	2	3
+3.7	+6.2	2	1
+3.7 *	+6.2 *	B	D
+9.0 *	+15.0 *	C	A

* Disconnect the 15-pin connector from the system board before taking this reading.

PICTURE 2

6.0 *Enable and Disable Settings*

To verify that the "Enable" and "Disable" settings are correct, select **Set and View SCSI Device Configuration** from the **Set Configuration** menu, and determine if there are any "Presence Error Reporting" devices listed. The settings must be as follows:

- Devices connected to the system must be set to "Enabled."
- Devices listed but not connected must be set to "Disabled."

Change the settings by pressing the F5 key; then save them by pressing the F10 key.

7.0 *Display Self-Test*

1. Power-off the system unit and display.
2. Disconnect the display signal cable.
3. Power on the display.
4. Turn the contrast to its maximum position.
5. Turn the brightness control detent to the center position.

The screen should be white with a black margin, as described below (some shading may occur near the edges). If the screen differs, replace the display. If the display passes the test, replace the display adapter or the system board.

- 8503, 8512, 8513, 8514, 8515:** 2-20 mm (0.08-0.79 in.) wide on one or both sides.
- 8506:** 2-50 mm (0.08-1.79 in.) wide on the top, or bottom, or both.
- 8507, 8508:** 2-20 mm (0.08-0.79 in.) wide on the top, or bottom, or both.

8.0 Display Adapter 8514/A

PICTURE 3

9.0 Keyboard

+---+
|001|
+---+

- Power-off the system.
- Disconnect the keyboard cable from the keyboard.
- Power-on the system and check the keyboard cable connector for the voltages shown. All voltages are $\pm 5\%$.

PICTURE 4

ARE THE VOLTAGES CORRECT?

Yes No

```
| |
| |
| +---+
| |002|
| +---+
| Possible failing FRUs are:
| 1. Keyboard cable
| 2. System board.
```

+---+
|003|
+---+

Replace the keyboard.

10.0 Printer

1. Make sure the printer is properly connected and powered-on.
2. Run the printer self-test.

If the printer self-test does not run correctly, the problem is in the printer. Refer to the printer service manual.

If the printer self-test runs correctly, install a wrap plug on the parallel port and run the advanced diagnostic tests to determine which FRU failed.

If the advanced diagnostic tests do not detect a failure, replace the printer cable. If the problem remains, replace the system board.

11.0 Memory

Note: Power-off the system before removing or replacing parts.

00011000 indicates a system-board parity-check error. If two system-board memory-expansion kits are installed, remove the kit in the connector labeled either J15 or J8. If the problem disappears, replace the kit. If the problem remains, replace the kit in the connector labeled either J16 or J9. If that does not solve the problem, replace the system board.

00011100 indicates a memory-adapter parity-check error. Remove the memory adapters from the expansion slots, one at a time, until the error goes away. Remove the memory-expansion kits from the last adapter removed. Install the memory-expansion kits, one at a time until the error returns. Replace the last memory-expansion kit installed. If that does not solve the problem, replace the adapter.

00021500 indicates a failing system-board memory-expansion kit in the connector labeled either J15 or J8. Replace the kit. If that does not solve the problem, replace the system board.

00021600 or 00022100 indicates a failing system-board memory-expansion kit in the connector labeled either J16 or J9. Replace the kit. If that does not solve the problem, replace the system board.

12.0 Symptom-to-FRU Index

Error symptoms and the FRUs that might be responsible for the failure are listed in the "Symptom- to-FRU index." The most-likely failing FRU is listed first. If you are unable to correct the problem using this index, go to "Undetermined Problem" in topic 4.0.

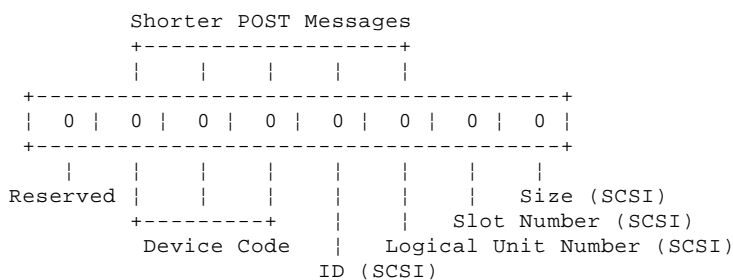

If the system displays an error message and gives an incorrect audio response, start with the FRUs listed for that error message. An "X" in an error message can be any number.

Note: If an error message is not listed, there is a device installed that requires an additional diskette or service manual. Refer to the diskette or service manual for that device.

How to Read POST Error Messages

POST error messages are displayed on the screen as three, four, five, or eight digits. The error messages that can be displayed as shorter POST messages are highlighted in this index. Some digits will represent different information for SCSI errors versus non-SCSI errors.

The following example shows which digits display the shorter POST error messages and also defines the SCSI information in an eight-digit error message.

All SCSI devices are set to a different SCSI ID. Duplicate SCSI ID settings can generate a false error message. Use the SCSI ID to determine whether the error message is coming from an internal or an external device.

Symptom/Error	FRU/Action
One or more keys do not work	Keyboard Keyboard Cable System Board
Changing Colors	Display
No beep and system is otherwise functional (See "Undetermined Problem" in topic 4.0 before replacing any FRUs.)	Speaker System Board
No beep and system is nonfunctional (See "Undetermined Problem" in topic 4.0 before replacing any FRUs.)	System Board Power Supply
Continuous beep (See "Undetermined Problem" in topic 4.0 before replacing any FRUs.)	Power Supply System Board

13.0 How To Use This Parts Catalog

INDEX REFERENCE NUMBERS: Refer to the illustrations for index reference numbers listed in the left margin of the parts listing.

SIMILAR ASSEMBLIES: If two assemblies contain a majority of identical parts, they are broken down on the same list. Parts peculiar to one or the other of the assemblies are listed separately and identified by description.

AR: (As Required) indicates that the quantity is not the same for all machines.

R: (Restricted) indicates that the part has a restricted availability.

INDENTURE: The indenture is marked by a series of dots located before the parts description. The indenture indicates the relationship of a part to the next higher assembly. For example:

Indenture Relationship of Parts

(No dot) Main Assembly
(One dot) □ Detail parts of a main assembly
(One dot) □ Subassembly of the main assembly
(Two dot) □ □ Detail part of a one-dot
 subassembly
(Two dot) □ □ Subassembly of a one-dot

1/3-High 1.44MB Diskette Drive	33F8211
Diskette Drive Slide (for 33F8211)	64F0156
5.25-Inch Diskette Drive:	
360KB External (4869-001)	72X6759
360KB External (4869-501)	72X6768
360KB Feature Group with Adapter	72X6758
1.2MB Internal	15F6912
Cable (for 15F6912)	15F6914
1.2MB External (4869-002)	15F7993
1.2MB External (4869-502)	15F7994
1.2MB Adapter/A	15F7996
Diskette Drive Cable (see DASD Cables)	

Fixed Disk Drive

44MB Fixed Disk Drive ST506	72X8541
70MB Fixed Disk Drive ESDI	72X8519
115MB Fixed Disk Drive ESDI	90X7392
314MB Fixed Disk Drive ESDI	90X8745
60MB Fixed Disk Drive SCSI	6128296
80MB Fixed Disk Drive SCSI	56F8854
120MB Fixed Disk Drive SCSI	6128298
160MB Fixed Disk Drive SCSI	56F8851
320MB Fixed Disk Drive SCSI	33F8453
Fixed Disk Drive Slide Tray (SCSI)	34F0031
Fixed Disk Drive Cable (see DASD Cables)	

CD-ROM

Internal CD-ROM Drive	81F7930
Terminators Kit (for 81F7930)	59F3530
Rail Kit (for 81F7930)	34F0041
Power Cable (single)	72X8521
Signal Cable (single)	34F0043

DASD Cables

Options and Adapters

Display Adapter 8514/A	1887971	
□ Memory Module (for 1887971)	1887708	
Dual Async Adapter/A	34F0008	
Fixed Disk Drive Adapter (ESDI)	90X9063	
Fixed Disk Drive Adapter (ST506)	72X8540	
Internal Tape Backup Unit	30F5273	
Adapter Cable (34 pin)	34F2990	
Tape Cover Plate	30F5275	
Formatted Blank Tape	30F5277	
Multiprotocol Adapter/A	90X8995	
Realtime Interface CoProcessor Multiport/2	09F1888	
□ 8-port RS232-C Electrical Interface Board		09F1889
□ 4-port RS232-C Electrical Interface Board		09F1957
□ 4+4-port RS232-C RS422-A Electrical Interface Board	09F1890	
□ 512KB Memory Module Package	16F2267	

Parts

Multiprotocol Interface Cable (for 09F1888)	00F5524
Screen Reader Keypad	1393515
Screen Reader Keypad Cable	72X8537
SCSI Adapter/A (with cache)	85F0000
Terminator, External (for 85F0000)	33F8464
Terminator, Internal (for 85F0000)	34F0025
SCSI Adapter/A (without cache)	85F0002
Terminator, Internal (for 85F0002)	57F2870
Token-Ring Network Adapter/A	83X7488
Token-Ring 16/4 Adapter/A	16F1144
Token-Ring Adapter/A RPL	83X9180
300/1200 Modem Adapter/A	34F0006
Communications Cable (for 34F0006)	8285985
300/1200/2400 Modem Adapter/A	65X1253
Communications Cable (for 65X1253)	94X1540
3270 Connection	74F3464
36/38 Emulation Adapter	69X6281
5.25-Inch Diskette Adapter/A (1.2MB or 360KB)	15F7996
5.25-Inch External Diskette Adapter/A (360KB) - Included in Feature Group	72X6758
6157 Tape Adapter	92X1459
80386 Memory-Expansion Adapter	72X6671
□ Memory-Expansion Kit (for 72X6671)	72X6672
2-8MB 80386 Memory Expansion Option	90X9556
□ 1MB Memory Module (for 90X9556)	90X8624
□ 2MB Memory Module (for 90X9556)	90X8625
