LUCARIS

Lucaris stemware is meticulously designed and crafted from the finest materials.

World Class Design

The design of Lucaris is a collaborative achievement between Ocean Glass, Toyo-Sasaki Glass and Martin Ballendat.

Inspired by modern Asian cities, Lucaris is an award winning glassware series designed specifically for sommeliers and wine enthusiasts.

Expert Manufacturing

Ocean Glass has manufactured quality glassware since 1979 and has grown to an annual capacity of 160 million pieces, which are sold in more than 90 countries all over the world.

Lucaris emerged from the determination and passion to manufacture the highest quality glassware.

Quality Construction

Our lead-free, titanium infused crystal provides exceptional clarity and brilliance, with added strength and durability. Machine blown and hand inspected, each glass is checked to ensure the best quality.

No details are overlooked in the construction process of our glassware.

Laser Cut Rim

Provides a sharp look that enhances drinking experience and presentation.

Colorless & Transparent

Lead-free composition reinforced with Titanium produces a stunning clarity that is pure and colorless.

Oversized Bowl

An oversized bowl enables the wine to fully develop its taste and aroma.

Seamless Stem

A seamless stem is the mark of excellence. It creates a smooth and elegant transition from base to bowl.

Dishwasher Safe

Lucaris Stemware & Barware are commercial dishwasher safe to ensure long lasting clarity.

Flat Base

Our flat base provides greater strength and extra stability to reduce spills and breakage.

Aerlumer is integrated into the base of the bowl to promote micro-oxidation and softens the wine when swirling. This subtle action allows for the wine to be aerated within your glass, while retaining the wines integrity and true color.

Aerlumer is a proprietary feature exclusively found in the Desire Collection.
