

F-500 EA Fire Extinguishers

The F-500 Encapsulator Agent (EA) Fire Extinguisher brings the rapid knockdown and superior cooling power of F-500 Encapsulator Agent to a portable, stored-pressure fire extinguisher that is ideal for first response for Class A and B fires.

The F-500 EA Fire Extinguisher provides the security of an effective agent in a quick-response delivery system. The 2.5-gallon supply of 3% F-500 EA solution provides enough protection to prevent a small fire from becoming a large problem.

Product Features:

- Quality, stainless steel 2.5-gallon (9.46L) extinguisher
- Includes wall mounting bracket and user instructions
- Rechargeable, using standard air compressor
- Dimensions: 9" x 24.5" x 7" (23cm x 63cm x 18cm)

Nozzle Options:

- Smooth Bore - Single, straight stream for penetration
- Water Mist Wand - Fog mist for broadest coverage with limited fuel disturbance

Smooth Bore Nozzle

Water Mist Wand

F-500 EA Charging Options:

- 10 oz. (0.3 liter) F-500 EA Recharge Kit for rapid refills (3% solution)
- F-500 EA in 5-gallon (20-liter) pails, 55-gallon (210-liter) drums and 250-gallon (1,000-liter) totes.

To protect larger areas, ask about HCT's F-500 EA fixed and portable agent delivery solutions. From 26-gallon F-500 EA carts to 10,000 gallon fixed concentrate control systems, HCT can provide the fire protection system your application demands.
