

Mphasis Javelina selects HPE GreenLake cloud with HPE Alletra Storage to Accelerate IT Transformation and Strengthen Security environment for its Healthcare Clients

New York, June 11, 2024

[Mphasis](#), (BSE: 526299; NSE: MPHASIS), an Information Technology (IT) solutions provider specializing in [cloud](#) and [cognitive](#) services, today announced that it has adopted HPE GreenLake cloud with HPE Alletra Storage to accelerate IT transformation for its healthcare clients. This technology aims to accelerate the company’s cloud journey while strengthening security environment to improve healthcare operations, ensuring high performance, reliability, and scalability.

[HPE Alletra](#) enables enterprises to run every workload without compromise through a cloud operational experience, whether at the edge or in the cloud. HPE technologies host Mphasis's [Javelina](#) platform, which houses provider and member data. Mphasis’ Javelina offers a comprehensive healthcare solution tailored for payer core administrative processing. This solution equips the back-office operations of healthcare payers, including health plans, self-insured third party administrators, and government programs.

HPE Alletra has helped Mphasis expand storage capacity with improved performance and enhanced flexibility in migrating customer workloads with encryption at rest, while advanced management tools have increased process efficiencies for IT and infrastructure. These tools also improve storage facility management and monitoring. Additionally, utilization insights gained from these tools support better future planning and optimization.

“Through the implementation of HPE Alletra, Mphasis has significantly enhanced its monitoring capabilities and access to critical information. This advancement empowers us to better serve our clients, fostering increased trust in us. We are genuinely enthusiastic about this partnership and collectively aim to deliver substantial business outcomes for our clients,” **Elango R, President – Enterprise 5, North Americas, Mphasis**

“Data growth continues to explode across industries and healthcare is no exception. The challenge for enterprises is to simplify management and scale their infrastructure to meet demand. With HPE Alletra Storage managed through the HPE GreenLake cloud, Mphasis can run their Javelina platform and business-critical workloads on-prem with cloud agility and simplicity,” said **Patrick Osborne, senior vice president of product, HPE Storage**.

About Mphasis

Mphasis’ purpose is to be the “*Driver in Driverless Car*” for Global Enterprises by applying next-generation design, architecture, and engineering services, to deliver scalable and sustainable software and technology solutions. Customer centricity is foundational to Mphasis, and is reflected in the Mphasis’ [Front2Back™](#) Transformation approach. Front2Back™ uses the exponential power of cloud and cognitive to provide hyper-personalized (C=[X2C2™](#)=1) digital experience to clients and their end customers. Mphasis’ Service Transformation approach helps ‘shrink the core’ through the application of digital technologies across legacy environments within an enterprise, enabling businesses to stay ahead in a changing world. Mphasis’ core reference architectures and tools, speed and innovation with domain expertise and specialization, combined with an integrated sustainability and purpose-led approach across its operations and solutions are key to building strong relationships with marquee clients.
