NAVITEL®
Products

NAVITEL® – MORE THAN NAVIGATION!

Since 2006 NAVITEL® offers world leading expertise on automotive electronics market. Our GPS navigators, portable digital cameras, tablets, and combo devices are produced at our own manufacturing plant, so that we are able to control devices at every stage. NAVITEL® team creates state-of-the-art solutions for your business, your family and friends.

NAVITEL® provides precise navigation solutions for our users all over the world. 66 countries with detailed map coverage are available both in Navitel Navigator App and on personal GPS devices developed by NAVITEL®. In 2011 the first GEO-car started our own trekking fleet that is expanding annually. The geographical data is carefully checked by our professional mapping specialists and combined with the latest SpeedCam, 3D objects, and POI databases.

– Customer experience is our key priority.
High quality is our signature sign.

A. Kazakov

Mr. Alexander Kazakov
Founder and President of NAVITEL®

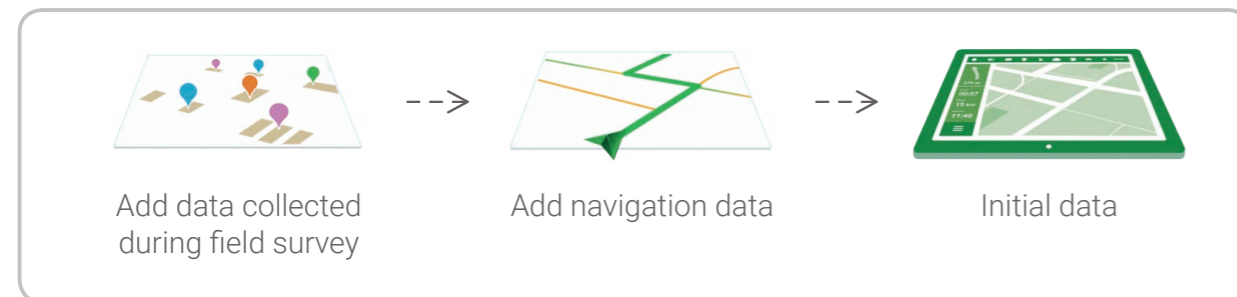

Creation of Maps & Map Coverage

The process of digital map creation is based on data collected by our own Geo-Analytical Department, which implements cutting-edge technologies and procedures.

- Special equipment of geodesic crews to create footage of location with GPS data
- Software that processes and stores data gathered by geodesic crews
- Satellite images
- Digital processing of the cartographic basis
- Geographic information system developed by NAVITEL®

The DVR NAVITEL R200 Night Vision is equipped with the high-quality GC2053 sensor and a 4-layered glass lens. You will get a high-quality and detailed image even in low light.

NAVITEL R200 NV will be your reliable assistant on any road at any time. The DVR records Full HD (1920x1080) video at 30 frames per second, and a panoramic 140° angle allows recording of a wide portion of the road ahead of a car, including neighboring lanes and the roadside.

The H.264 codec is used for compression and preserves an excellent image quality in a small file size. All video footage is recorded in cyclic mode and stored on a microSD of up to 64 GB.

This little device will come in handy both on the road and on the parking lot. If your DVR is connected to power supply it will start recording automatically after you have switched on the ignition. Thanks to parking mode NAVITEL R200 NV can detect vibrations and start recording even when the car is parked, the driver is absent, and the device is turned off.

NAVITEL R300 GPS is a dashboard camera that combines features of a video recorder, digital speed counter and GPS informer.

The DVR NAVITEL R300 GPS is equipped with the high-quality GC2053 (night vision) sensor and a 4-layered glass lens. You will get a high-quality and detailed image even in low light.

Because of a built-in GPS antenna and up-to-date database, a driver receives relevant and updated information on enforcement cameras, potentially risky areas and service facilities. The intelligent system provides the driver with visual and audio notifications, which activate 450m before a camera location or other road restriction.

Your personal witness in case of an incident on the road: DVRs record and safely store road events and accidents. Protect yourself from dishonest drivers: footage taken with a DVR is evidence in many cases, such as attempts to extort compensation or to reveal who the real perpetrator of an accident was.

When there are no witnesses of the accident, NAVITEL R650 NV will become your most valuable proof.

Thanks to the SONY STARVIS sensor device is recording footage in the highest quality even at night or in bad lighting conditions.

NAVITEL R1050 consists of a 3M adhesive mount that attaches firmly to the windscreen of your car and a camera connected to the mount with a magnetic bracket. This allows for easy 360° rotation of the camera. With NAVITEL R1050, you can record critical footage of events happening in front of you or inside of your car, capture passenger's seat as well as driver's side door. Use it to protect yourself against acts of dishonesty or corruption.

With the help of the device the user will not only record high-quality videos, but also receive notifications about traffic cameras along the way together with information about car speed.

The latest software allowed combining the functionality of 3 devices – a dashboard camera, a digital speedometer and a GPS informer.

Auto cup holder

NAVITEL TC500

Auto cup holder is a device for keeping temperature of the drinks ideal. Thanks to the two operation modes – "Heating" and "Cooling" – your favourite coffee will stay hot even in winter, and chilly summer drinks will not get heated in summer time. This useful car accessory is a perfect present for the near and dear as well as a great device for those who value their time.

The auto cup holder is suitable for any cars as it powers from 12 V. The device can be connected to the cigarette lighter outlet and the driver can be sure that a cup of hot tea or cooling juice will keep a great company even in a long trip.

Power controller

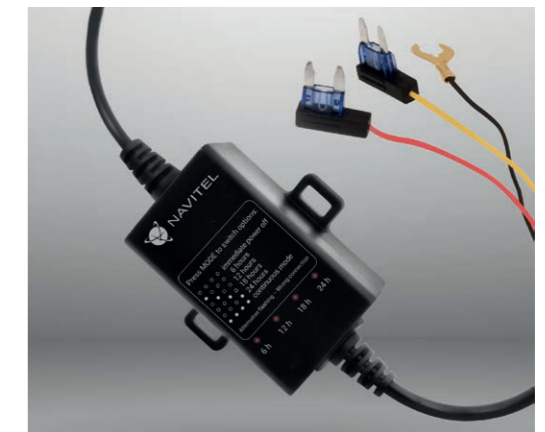

NAVITEL SMART BOX MAX

Why do you need a NAVITEL SMART BOX MAX?

With NAVITEL SMART BOX MAX you can power a dashboard camera or any other device even when the car is parked and the ignition is off.

NAVITEL SMART BOX MAX protects your vehicle battery from discharge based on the voltage or preset time. The power controller will automatically turn off the power of the DVR when car battery voltage drops below a determined value or the configured timer elapses (whichever occurs first). Also, NAVITEL SMART BOX MAX protects your DVR against power surges.
