# Safety you can see!

Our advanced light engine technology has been on the **forefront** of automotive lighting for more than 100 years.

As a **leading supplier** of lighting products to the automotive industry and aftermarket, we combine technical **innovations** with a genuine concern for **safety** and driving **comfort**.

Our automotive lighting is today **the choice** of

consumers and major car manufacturers.

Our **mission** is to introduce **innovative products** that constantly improve **road safety**. Our products are designed to perform **efficiently** and **durably** for continuous **customer satisfaction**.

**High-quality lighting** really does make a **difference**.

That's **safety** you can **see!**

# High manufacturing standards

## Original Equipment Quality

We are committed to producing **best-in-class products** and services in the Original Equipment Manufacturer (OEM) market and automotive aftermarket.

Our products are manufactured from **high-quality materials** and tested to the highest specifications to maximize **safety** and driving **comfort** of our customers.

- We are the **choice** of major car manufacturers
- Our lighting is original equipment on **one in three cars** in the world
- We employ manufacturing processes that **exceed** current industry **specifications**

## Philips anti-UV quartz glass for optimal lighting performance

**Our halogen and xenon headlamps are made with high-quality anti-UV quartz glass**

- **More powerful light**  
Our quartz glass has a high resistance that allows for increased pressure inside the bulb to generate a more powerful light.
- **Better resistance**  
Philips quartz glass lamps (filament at 4,802 °F and glass at 1,472 °F) are capable of withstanding severe thermal shocks.
- **Optimal protection against ultraviolet rays**  
Philips quartz glass lamps are coated with a special anti-UV coating that protects your modern plastic optics from harmful UV rays.

# Is it real? Check the seal.

## Whether you're in the business of selling auto lighting or simply a driver on the road at night, counterfeit bulbs affect you.

Counterfeit Xenon HID bulbs are increasingly available through online and offline channels. But counterfeits can lead to serious safety and performance issues.

And our customers should know that buying, selling, or being in possession of counterfeit products is illegal.

### A threat to drivers

Counterfeit Xenon HID bulbs often result in insufficient illumination on the road and excessive glare directed at oncoming traffic. That puts drivers and passengers in harm's way.

Counterfeit Xenon HIDs can also severely damage vehicle headlamps or electronics. Bulb explosions can lead to catastrophic results, and in some cases, simply switching on the lights could cause the airbags to activate.

### Protecting Xenon HID authenticity

It's not easy for distributors, retailers, or consumers to distinguish between counterfeits and genuine Xenon HIDs by simply looking at the product. That's why we've created the **Philips Certificate of Authenticity (COA)**.

Every genuine Philips Xenon HID package features a COA seal with a label ID and security code.

We've launched a media campaign – **'Is it real? Check the seal.'** – to alert distributors, retailers, technicians, and consumers to the Xenon HID problem and to let them know how they can avoid counterfeits.

Watch for our campaign and count on Philips to protect you, your customers, and your family from counterfeit Xenon HIDs.

Learn more about our new **'Is it real? Check the seal.'** campaign. Visit: [www.philips.com/genuine](http://www.philips.com/genuine)

### Tamper-evident shipping cartons

To help shut down counterfeiters, we've added tamper-evident tape to our shipping cartons.

Unopened

Opened

Tampering is evident

### Tamper-evident packaging

And we've added holographic authenticity labels and tamper-evident seals to our HID packaging.

Unopened

Opened

Tampering is evident

Using the label ID and security code, distributors, retailers and consumers can verify the authenticity of the Philips product by scanning the package's QR code or going to: [www.philips.com/original](http://www.philips.com/original)

## Style & Safety

# Xenon HID

- Philips original equipment quality Xenon technology
- Up to 200% more vision\*

Discover our Xenon lighting solutions, the number one choice in Xenon lighting.

Xenon HID lights **deliver twice as much light** as Halogen bulbs but consume less power. This offers drivers enhanced visibility while allowing the vehicle to save electrical power for other functions. With twice the amount of light, you can see potential obstacles much sooner.

\*Compared to a standard halogen headlight

Available in

# LED

Our LED lighting for cars and trucks is designed and manufactured to deliver high quality products.

## LED

### interior & exterior lighting

Our **LED interior and exterior lighting** illuminates the vehicle with power and precision.

Our **Ultinon LED** range delivers revolutionary lighting technology, with a choice of intense red, intense amber, cool blue, or **6000K** bright white for interior and exterior lighting applications.

Our **X-tremeUltinon LED Fog Lamps** provide superior visibility and up to **6500K** crisp white light.

With over 100 years at the forefront of the automotive lighting industry, Philips expertise guarantees extra long lifetime and superior light performance.

## Bright signaling and stylish driving

Style

## Ultinon LED

Interior & exterior lighting

- **More SKUs** than ever before!
- **White and blue** interior LEDs.
- **White, red, and amber** exterior LEDs.
- **Bright new packaging** with installation tips for polarity and CANbus.

Philips Ultinon LED lights deliver brilliant, **high-tech lighting** with a choice of cool blue, intense red, intense amber or 6000K bright white.

The bright output and intense colors of Philips Ultinon LEDs provide more than just style. They provide excellent light distribution, with a wide angle beam on the road so drivers can see and be seen better.

Philips Ultinon LED lights also deliver **'instant on' performance**. When turning or braking, Philips LEDs allow drivers more time to react safely. Philips Ultinon LEDs are automotive grade quality products, designed and developed for reliability and durability following strict quality control processes.

And Philips Ultinon LED lights serve as **direct replacements for conventional bulbs**.

They're easy to install and are available for a wide range of interior and exterior applications – stop lights, turn signal lights, backup lights, taillights, position lights, hazard lights, trunk lights, glove compartment lights and interior floor lights.

# Philips Ultinon LEDs

Brilliant performance in four colors for interior & exterior applications

## Philips LED CANbus Enabling Adapters

CEAs (CANbus Enabling Adapters) are designed to prevent the warning signals from the dashboard for some 'CANbus system equipped' cars after replacing the original incandescent bulbs with Philips LED bulbs.

CEAs also resolves 'fast flashing' of the turn signals that can also occur with LED replacement.

CANbus 5W is designed for use with Philips T10 & Festoon LED retrofit bulbs;  
CANbus 21W is designed for Philips LED products for T16, P21, P27, and W21 bulbs.  
See Charts on Page 9 for more info.

**Troubleshooting tip:** Some CANbus systems treat low power consumption of bulbs as a sign of a burned-out bulb, which causes a warning on the dashboard. Since LED bulbs consume much lower power than the original incandescent bulbs, they can trigger this warning in some vehicles.

Installing the Philips CEA in the circuit eliminates this problem. Installation takes only minutes and requires only a pair of pliers.

CEA is installed in parallel with the corresponding LED bulb.

**Troubleshooting tip:** If your Ultinon LED bulb doesn't light up when you first install it, take it out, flip it 180° and reinstall it. Some Ultinon LEDs require a specific polarity and you may need to rotate the bulb to get the polarity correct.

1. Remove the LED from the socket
2. Flip the LED 180°
3. Insert the LED back into the socket
4. Check to ensure the LED lights up

Do not force the LED or alter the socket.  
Be sure that you have the right LED for your application.

## HiPerVision™

**Exclusive OE lighting technology** - now available in the aftermarket!

Philips HiPerVision™ bulbs have become a popular OEM choice for DRL, fog, and front and rear signal applications on vehicles since 2004. Now available for the aftermarket, HiPerVision bulbs are a 'must-have' for complete lighting coverage. HiPerVision bulbs are available as an upgrade in SilverVision and now CrystalVision ultra.

The SilverVision bulb gives lighting assemblies the 'all-silver' look that is found on many of today's luxury vehicle brands. Philips CrystalVision ultra provides a bright white light, for a high-tech look. They're a perfect color match for Xenon HID headlights.

### Applications on popular late-model vehicles

- Fog light bulbs on GM full-size trucks and SUVs
- Widely used on Chrysler vehicles, including Jeep fog lamps

### Unique OE technology

- Traditional incandescent appearance that employs a proprietary lighting technology
- Extremely compact bulb with accurate coil positioning, to improve durability

### Available in:

- Standard
- SilverVision
- Natural Amber
- CrystalVision ultra

Less replacement

## LongerLife Miniatures

Longest lasting miniature bulbs

- Twice the life of standard bulbs\*
- Best value
- LongerLife bulbs are for drivers who want the best value for their money

\*Compared to a standard incandescent

Style

## CrystalVision ultra Miniatures

Bright white light

- The bright white look for turn signals, side markers, and taillights

CrystalVision ultra miniature bulbs deliver a **bright white light** that makes your vehicle stand out. These miniature bulbs are ideal for adding style to your vehicle.

# Headlight restoration kit

## Safety

### Restores headlight lenses to like-new condition!

- Less glare and up to 100% brighter lenses
- Provides safer nighttime driving
- Removes haze and yellowing from harmful UV-rays and dirt
- Professional results without power tools in 30 minutes
- High-quality and economical
- 2-year UV-protection guaranteed

Headlight lenses fade and oxidize from constant exposure to the elements and become scratched due to impacts.

Removes the fading and yellowing of headlight lenses and restores them to their original state of **transparency** for **greater safety**.

# 12V and 24V Philips Commercial Products!

**Our Commercial Lighting Portfolio** provides the same OE quality and performance that we provide to car manufacturers around the world. We are committed to developing lighting solutions to meet the needs of light,

medium and heavy duty vehicles on the road.

Our Commercial Lighting portfolio is designed to help shops maximize their opportunities in **creating more lighting sales** and profits.

Value

## Commercial Portfolio

- A full range of headlight bulbs, miniatures, and sealed beams
- Name-brand recognition in commercial packaging

Philips commercial portfolio provides more than just a white box program, you get the brand name recognition that is known worldwide.

The program includes a **complete offering of standard OE replacement lighting**, including a full range of headlight bulbs,

halogen and incandescent sealed beam headlamps, and miniature bulbs for both interior and exterior vehicle applications.

Our entire range of innovative 12V and 24V lighting solutions is engineered to bring more added value to your business while meeting the needs of your customers!

# Motorcycle

and powersports lighting

See and be seen

## MotoVision

up to 40% more vision\*

- Maximum safety
- Up to 50 ft longer beam\*
- Unique orange reflection helps motorcycles stand out from traffic
- Vibration resistant, up to 10G

With up to **40% more vision** and a beam up to 50 ft longer than standard bulbs, MotoVision delivers greater nighttime visibility and safety, allowing cyclists to see and be seen better.

Available in

9003/H4

H7

For greater safety

## Vision Moto

up to 30% more vision\*

- Designed for powersports and scooters
- Greater light-beam projection
- Philips original equipment quality

Producing up to **30% more vision** than a standard lamp, Vision Moto bulbs allow riders to see farther with improved light-beam performance.

Available in

# Sales and marketing **tools**

We've created useful tools to help educate drivers on the benefits of Philips automotive lighting products, and to make stocking and selling Philips lighting easier.

## Countertop Displays

for Halogen upgrade headlights

**More light, more safety, more style.**

Our countertop display helps to drive sales of your Philips Halogen upgrade headlights.

Each corrugated countertop display comes with 4 interchangeable headers:

- VisionPlus
- X-tremeVision
- CrystalVision ultra
- Generic for mix and match

*The display is NOT pre-packed; products are NOT included*

Order Countertop Display:  
**56347C1**

## Philips Upgrade Lighting Floor Display

This versatile interactive display allows you to flip the push-button demo feature to appear on either side of the display unit.

The display **commands attention and helps drive sales** of Philips branded automotive lighting products. Real-life, on-the-road photos reveal the dramatic boost in performance that customers can expect when they choose Philips headlight upgrades.

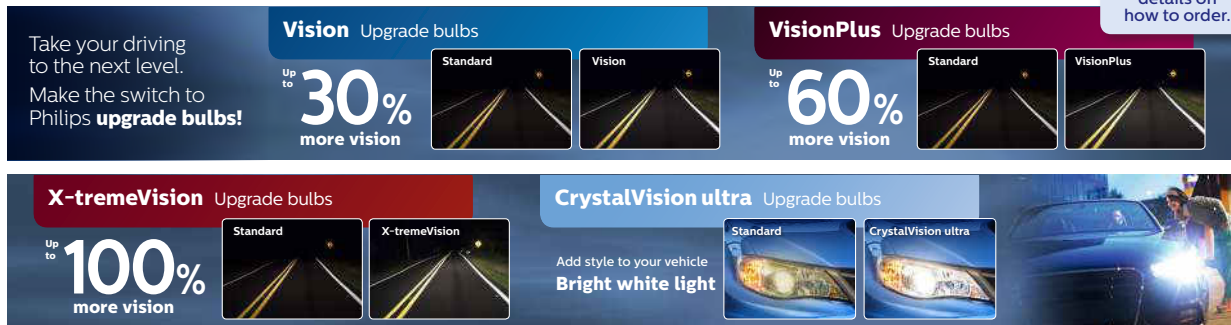

Order Upgrade Lighting Floor Display: **56725ED**

Merchandising display measures 20.5" wide x 62" tall x 18" deep. Weight 18.5 lbs.

The displays are **NOT pre-packed**; products are **NOT included**; stand not included with display

## Custom Headers for Planograms

See sales manager for details on how to order.

Our planogram headers make it easy for consumers to understand our upgrade headlight choices. Our planogram signage can be customized based on planogram size and portfolio.

- Headers featuring each of the upgrades.
- Offers flexibility in setting up store planograms.
- Headers educate the consumer on key features. Before / After photos clearly demonstrate the benefits.

## Bulb Cabinets

Boost service profits with **extra lighting sales**

Keep the right mix of popular bulbs on hand, to avoid delays and take advantage of profitable service opportunities. Both cabinets feature a rugged powder coated finish and easy wall mounting.

Order Premium Cabinet: **PHLPC2**

### Premium Cabinet

25" x 4" x 23"  
Lockable swing out, two-door cabinet

Order Commercial Cabinet: **PHLCC1**

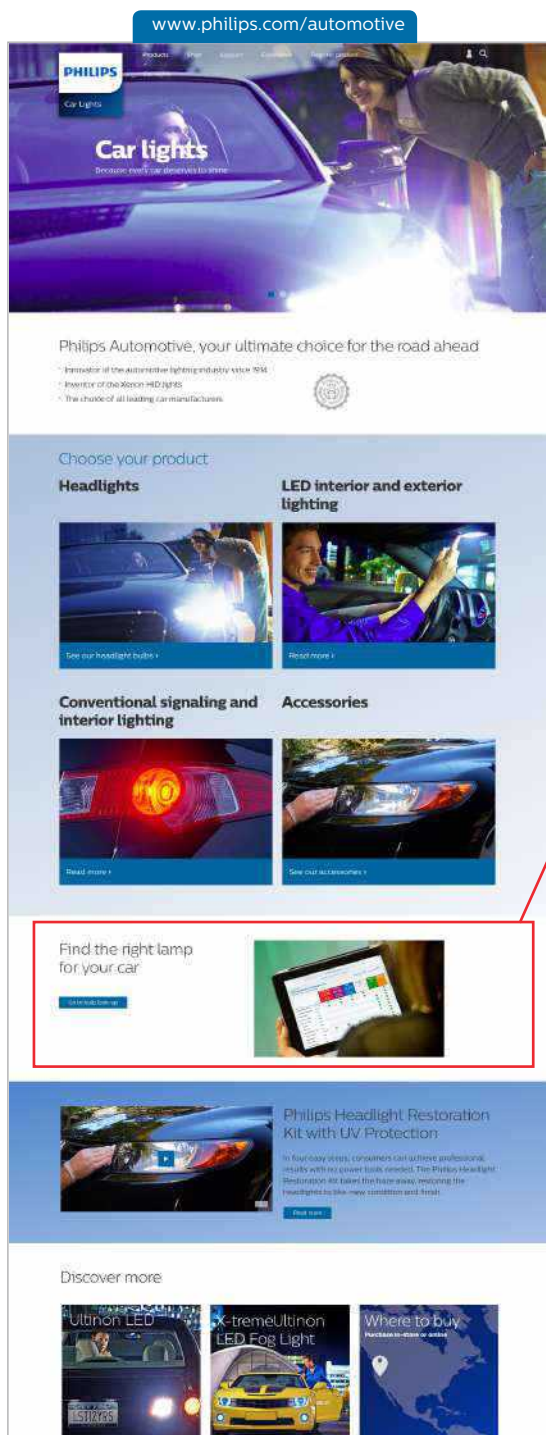

### Commercial Cabinet

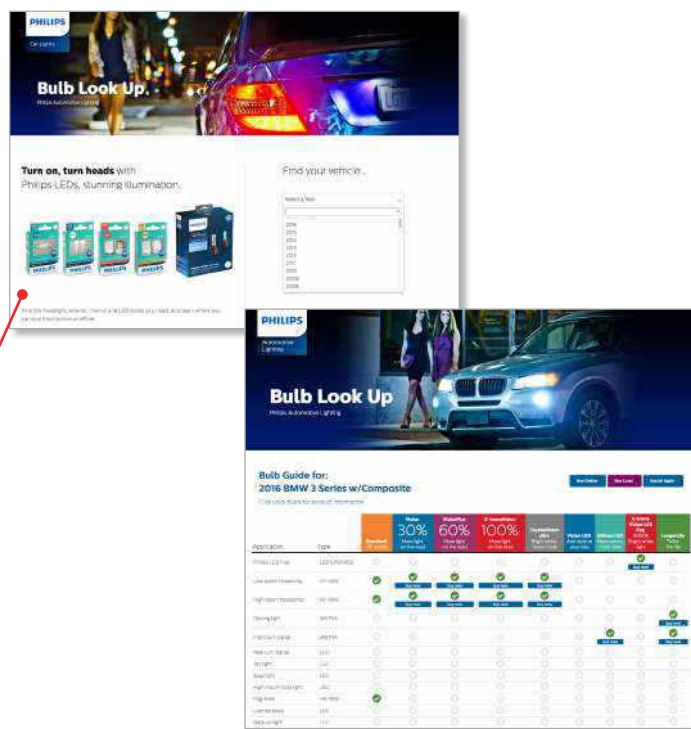

19" x 4" x 26"  
Tip-out type cabinet

# Digital content

The Philips automotive website lets you discover our full portfolio of lighting products. From halogen and Xenon **headlamps** to conventional and LED **signaling and interior lighting**.

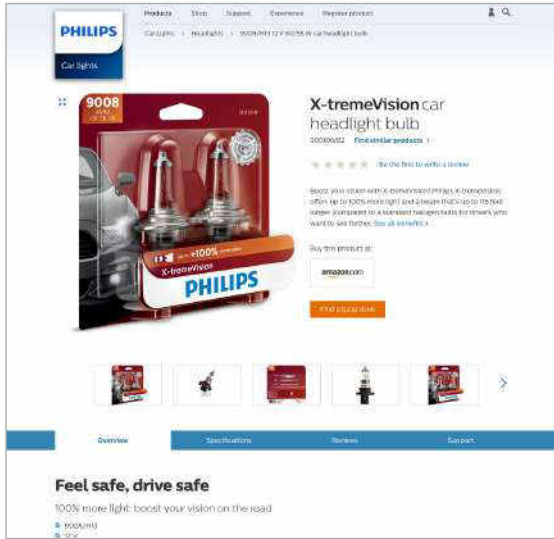

Our **bulb look-up guide** helps you find the right bulbs for your vehicle. Plus, it shows you which Philips upgrades are available for your application.

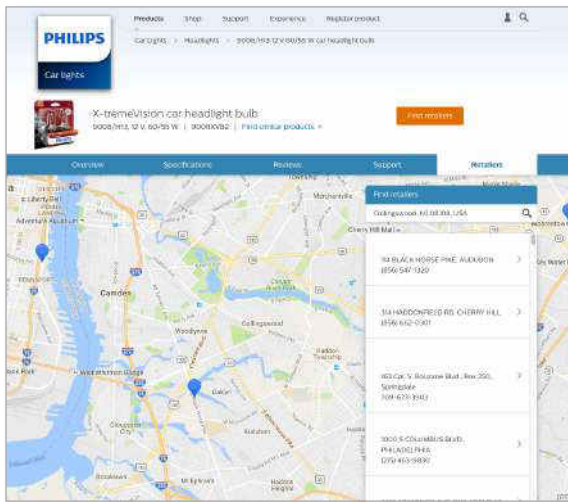

You can also access the **bulb look-up guide** on your mobile device by scanning this QR code.

Our **product overview page** presents all the information you need about each of our products, from product images and videos to technical and commercial specifications, as well as application coverage.

Once you've selected the product you need, you can use our **store locator** to find the closest retailer.

## Xenon HID Certificate of Authenticity website

To protect our customers and consumers from counterfeit Philips Xenon HID lighting products, we've created a proactive solution using unique, state-of-the-art technology.

Now, every genuine Philips Xenon HID package features a Philips Certificate of Authenticity with a holographic seal, label ID, security code, and QR code. Consumers and retailers can check the authenticity of the product either by scanning the QR code or by entering the label ID and security code at **www.philips.com/original**.

If the label ID and security code are valid, you'll receive a confirmation message.

If either the label ID or security code are invalid you'll receive an alert message, and you can contact us to begin to pursue the issue.

(See Page 4 for more information.)

# Lighting technology explained

## ■ Asymmetrical beam pattern

An offset beam pattern for low beam applications. Provides a longer beam in the lane of travel rather than in the opposite lane, which avoids blinding drivers in oncoming traffic.

## ■ Ballast

The electronic driver that controls a Xenon HID bulb.

## ■ Base

Bottom part of the bulb which ensures a proper mechanical and electrical connection with the lamp unit of the car. Its precision is important for a correct beam pattern.

## ■ Board voltage

Electrical voltage in the board net of the vehicle. In cars, the operational voltage at the bulb connector typically varies between 13 and 14 volts (V). The official test voltage for halogen headlight bulbs is 13.2 V according to ECE R37. For trucks with a 24 V board net the test voltage is 28 V. The board voltage has a significant impact on filament bulb lifetime. In general, a 5% voltage increase reduces the lifetime by 50%.

## ■ Burner

Burner is the glass part of a halogen or Xenon HID bulb in which the light emission is generated. It consists of hard or quartz glass and contains the filament and the two electrodes.

## ■ Candela (cd)

Unit of luminous intensity that measures the amount of luminous power emitted by a light source in a particular direction.

## ■ Color temperature

Thermal measure for light color. Derived from the color emitted by a “black body” which is heated up to a certain temperature (see also Kelvin).

## ■ Cut-off zone

The line between the bright and dark zones of low beam light. Above the cut-off zone, the amount of light is limited in order to avoid blinding oncoming traffic.

## ■ D(...)

Nomenclature for Xenon HID bulbs where **D** stands for “discharge.” Available technical types: **D1S**, **D1R**, **D2S**, **D2R**, **D3S**, **D3R**, **D4S**, **D4R**, and **D5S**.

**D1** and **D2** First bulbs introduced in 1991

**D3** and **D4** Mercury-free bulbs that replace D1 and D2

For D1 and D3, the electronic high-voltage starter is already integrated in the bulb base. The **S** type is used with projector (lens) systems. Version **R** is used in open reflectors and features an additional coating on the outer tube (pinstripe) which blocks out some areas to avoid glare.

The **D5S** is a 25-watt bulb with integrated starter and integrated ballast.

## ■ Discharge bulb

The correct, technical term of the so-called Xenon bulb is **high-intensity discharge** bulb. The light is emitted by an electric arc which is produced between two electrodes.

**See also** HID and Xenon light.

## ■ DOT

The United States Department of Transportation which oversees federal highway, air, railroad, maritime and other transportation administration functions. It fulfills a role similar to the Economic Commission for Europe (ECE).

## ■ DRL

Daytime Running Lights.

## ■ ECE

Economic Commission for Europe. One of five regional commissions of the United Nations (UN) based in Geneva that contributes to enhancing the effectiveness of the UN through the regional implementation of outcomes of global UN Conferences and Summits. The ECE is responsible for harmonizing technical specifications for vehicles whose regulations are also mandatory in many countries outside Europe.

## ■ ECE R

This stands for the ECE Regulation.

Examples for vehicle lighting:

**R37** Filament lamps

**R99** Gas-discharge light sources

**R48** Installation of lighting and light-signaling devices

## ■ Electric arc

The connecting luminous discharge between the two electrodes of a Xenon HID bulb. This is similar in principle to a bolt of lightning. The electric arc is created by the high-voltage starter and stabilized and controlled by the ballast.

## ■ Electrodes

Electrical conductors which are positioned opposite each other in the vessel of a Xenon gas-discharge bulb.

The electric arc that emits light is produced between the electrodes.

## ■ E-mark

The ECE mark of approval. The digit following the “E” indicates in which country the approval has been granted.

For example: E1 indicates Germany and E2 indicates France. An approval granted by one ECE member is valid for all member states and is typically adopted by national regulations. Single minor deviations are possible.

## ■ Festoon

A tube-shaped bulb with contacts at each end such as 12844, which is commonly used for interior and license plate lighting.

### ■ Filament

A coiled tungsten wire that emits light.

### ■ H(...)

Nomenclature for halogen bulbs. H = halogen. The bulbs are numbered consecutively.

The most common types are:

**H1** First halogen bulb (single filament).

**9003/H4** Double filament for both low beam and high beam application in one headlamp unit.

**H7** Most common halogen bulb for low beam, high beam, and fog lighting.

### ■ Halogen

A gas that is used to create the halogen cycle process in a light bulb. During operation, tungsten molecules evaporate from the tungsten wire. In the cycle process, they combine with the halogen molecules and fall back to the wire. This extends the lifetime of a bulb and allows operation at a higher intensity. Halogen bulbs contain a high-pressure halogen filling. Non-halogen incandescent bulbs often use a vacuum.

### ■ HB(...)

ECE name of original North American bulb types which were approved for use in Europe as well. For example: HB3 refers to 9005 and HB4 refers to 9006.

### ■ Hg

Symbol for mercury (Latin: hydrargyrum). Xenon bulb types D1 and D2 still contain approximately one third of the amount of mercury as a normal domestic energy-saving bulb. D3, D4 and D5 are completely mercury-free.

### ■ HID

High Intensity Discharge. Correct technical name for a so-called Xenon bulb.

**See also** gas-discharge bulb, Xenon light, Xenon system.

### ■ High-voltage starter

Creates high voltage pulses of approximately 20,000 volts to ignite the electric arc in a Xenon HID bulb.

### ■ HiPerVision

Very compact signaling-bulb range with high-precision filaments and a long lifetime. For use in signaling lights, fog lamps, rear and daytime running lights.

### ■ Illuminance (lux)

Contrary to luminous flux (lumen), which is a measure of the total amount of light emitted by a light source, illuminance describes the amount of luminous flux per unit area, such as on the road. This is measured with a lux meter.

### ■ Kelvin (K)

A unit of measure of temperature based upon an absolute scale whereby zero (minus 459.4 °F) represents the point where all thermal motion ceases. In lighting, however, this is a measure of color temperature. The higher the color temperature, the whiter and cooler the light appears.

### ■ LED

Light Emitting Diode.

### ■ Lifetime

Statistical data that indicate the failure rate of a percentage of bulbs operated at a specific voltage over a certain period of time. Common lifetime data indication:

**B3** Time when statistically 3% of the test samples have failed

**TC** Time when 63% of the test samples have failed.

### ■ Luminance

The intensity of light emitted from a surface per unit area in a given direction from, for example, the filament or the electric arc of a Xenon HID bulb. An important indicator of the amount of light a headlamp unit provides on the road. The unit is candela/m<sup>2</sup> (cd/m<sup>2</sup>).

### ■ Lumen (lm)

Unit of luminous flux.

### ■ Luminous flux (lumen)

The total amount of light that is emitted by a light source in all directions.

### ■ Lux (lx)

Unit of illuminance. 1 Lux = 1 lm/m<sup>2</sup>.

**See also** Illuminance.

### ■ Lux meter

Illuminance measuring device.

### ■ Pb

Symbol for lead (Latin: plumbum).

All Philips automotive bulbs are **lead-free**.

### ■ Quartz glass

Temperature and pressure resistant glass for halogen and Xenon HID bulbs. The glass also has a special coating to block out harmful ultraviolet (UV) light.

### ■ Tungsten

Filament and electrode material.

### ■ UV-block

Ultraviolet (UV) blocking glass absorbs the UV light created by the filament or the electric arc. UV block is mandatory for all ECE complying car bulbs because UV light can damage the plastic cover of the headlamp.

**See also** Quartz glass.

### ■ Wedge base

Bulb with a glass base, such as 3157. Mainly used for parking lights, side indicators, and interior lighting.

### ■ Xenon (Xe)

One of the noble gases. Commonly used to refer to HID bulbs.

### ■ Xenon light

Headlights with HID bulbs.

**See also** D(...), Discharge bulb, HID.

### ■ Xenon system

A complete Xenon system consists of the HID bulb, the high-voltage starter and the electronic ballast which controls the electric arc.

# Understanding Philips **ordering codes**

All our automotive lighting products can be ordered using **Philips Order Entry**.

With Philips Order Entry you can identify the **1 lamp type**, the **2 product range** and the **3 packaging type**.

Example: **12972XVB1**,  
X-tremeVision, single blister

12972

1 Lamp type

XV

2 Range type

B1

3 Packaging type

## 1 Lamp type

Every **lamp type** is designated by Philips with a unique number.  
(See page 33 for examples.)

## 2 Range types

Most lamp types are available in different packaging that is linked to color codes (PR – Vision, blue; VP – VisionPlus, purple, XV – X-tremeVision, dark red, etc.).  
See **‘Upgrades for every bulb in your car’** on pages 20-21 to see how color codes are used to show the availability of each lamp in a specific product range.

**PHILIPS**

Automotive lighting

# Gives them more colors. Gets you more sales.

Philips Ultinon LEDs deliver brilliant lighting performance in a choice of four colors: blue, intense red, intense amber, or 6000K bright white. Easy to install and available for a wide range of interior and exterior applications, Ultinon LEDs are direct replacements for conventional bulbs.

innovation  you
