

# Supplier Relationship Management

## Transforming the way procurement and suppliers engage

PwC's Supplier Relationship Management solution, powered by Salesforce, provides a 360 view of the supplier engagement management lifecycle and enables a significant amount of automation and collaboration. Organizations are empowered to manage all interactions and transactions in one central repository. With a flexible user interface, mobile access, self-service and enhanced analytics embedded throughout, SRM is taking supplier management from manual and reactive to strategic and proactive.

### Module design across packages for ultimate flexibility and implementation based on immediate needs

## Benefits

**Procurement Engagement:**  
Allows buyers and suppliers to perform functions across end-to-end procurement cycle seamlessly

**Supplier Engagement:**  
Gives suppliers access to manage profiles, offerings, and purchase orders all while leveraging Chatter to communicate and collaborate

**Mobility:**  
Buyers and suppliers can access the solution via any device without losing key capabilities or functionality

**Reporting:**  
Allows buyers and suppliers to manage 360 degree relationships with contextual analytics throughout the solution
