

SAMSUNG

Pursuant to California AB 1200, manufacturers of cookware products must disclose whether certain intentionally added chemicals are present in food-contact surfaces or in the handle of such products. The chemicals requiring disclosure are those on the California Candidate Chemicals List, which currently contains over 3,000 chemicals including common metals such as aluminum and iron, among others.

Table 1 below details the models of cookware products in scope of AB 1200 and the chemicals subject to the disclosure requirement. Table 2 provides part-specific substance information, and Table 3 provides the name and link to the “authoritative list” (or lists) that form the basis for each chemical’s inclusion on the California Candidate Chemicals List.

Please note, the presence of any of these chemicals in cookware surfaces does not indicate that the product is unsafe or poses a health risk. For further information about California’s Candidate Chemicals List, visit <https://dtsc.ca.gov/scp/candidate-chemicals-list/>.

Table 1: Chemical detail per model

Model	Chemicals
ARG30	Iron ¹ Manganese ^{1 2 3 4 5 6 7 8} Chromium ^{2 8 9 10 21} Nickel ^{1 16 21 22 23 24 25 26 27 28 29 30} Copper ^{2 10 21 31 32 33 34 35} Aluminum ^{18 19 20} Zinc ^{2 10 31 32 33 34 35}
