SAMSUNG Knox

Transforming rugged devices into smooth work tools for frontline staff

Samsung Galaxy Tab Active series, paired with Knox Suite, have given rise to a powerhouse telematics solution.

YellowFox Telematics Systems

For over two decades, YellowFox has dedicated itself to revolutionizing the way telematics providers work, making them one of the leading telematics providers in Germany, Austria, and Switzerland.

YellowFox's focus is automating and digitalizing processes in the transport, logistics, and construction industries, with YellowFleetApp – YellowFox's software. And with the Enterprise Edition of the Samsung Galaxy Tab Active series in the hands of each employee, the combination is a perfect match.

A few facts and figures:

4,500 +
Number of Samsung Galaxy devices enrolled by YellowFox

6,000 +
Number of companies listed with YellowFox

Since 2021
Years of YellowFox and Samsung Knox partnership

02 Challenge

Managing hundreds of devices as simply as possible

YellowFox needed a hardware and software solution compatible with the YellowFleetApp. IT admins spent hours on one-by-one device management before finding the right solution. Without an effective process, workers on the ground were stuck offline if devices or software needed to be updated, costing companies time and money. An all-in-one solution was needed to keep things running smoothly without affecting daily operations.

The ultimate hardware and software combo to complement the YellowFleetApp and ensure efficiency.

Rugged devices made for an industry of tough environments, such as long-haul travel, warehouses, and shipping yards, help keep operations flowing without worrying about delicate hardware.

Centralized device management was the only way to keep multiple devices running optimally without affecting everyday work. In addition, the remote support feature would make resolving work app issues much simpler.
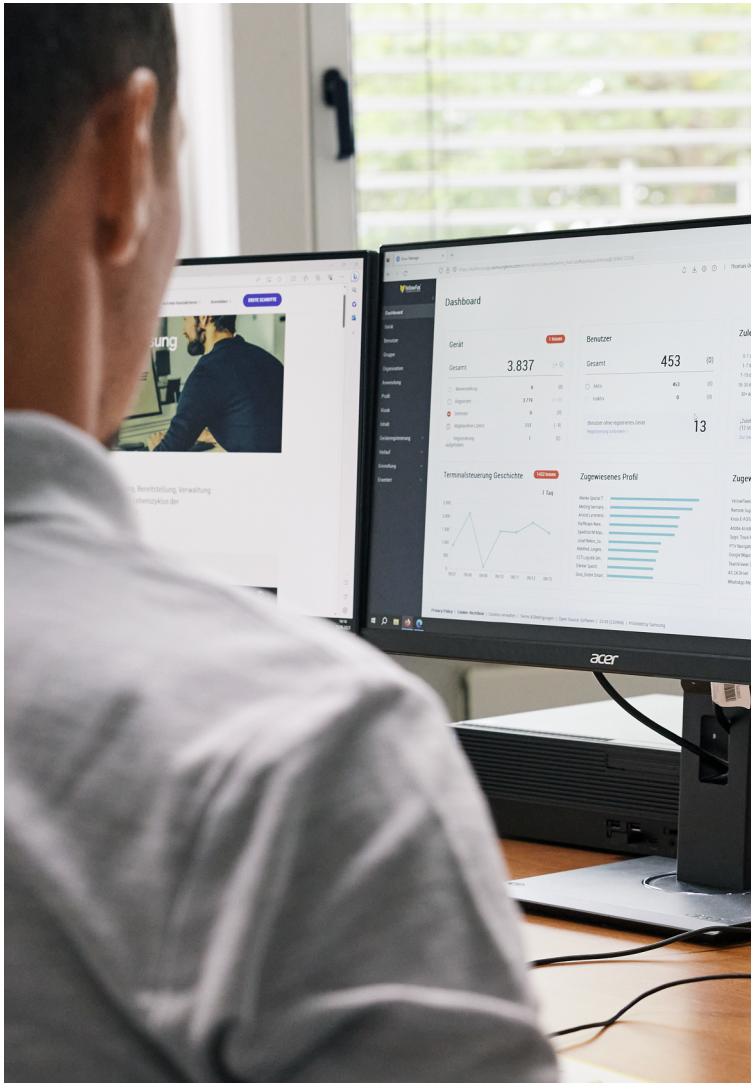

03 Solution

Transforming the telematics industry

Samsung Galaxy Enterprise Edition, a single-package device and software offering, fulfilled YellowFox's every need.

Samsung Galaxy Enterprise Edition was an obvious choice with up to 5-year device security maintenance, 2-year device product cycle coverage, and a 1-year Knox Suite license.

The robust Samsung Galaxy Tab Active series is the perfect device for YellowFox. It allows frontline workers to focus on the job without worrying about fragile devices. With features like replaceable batteries and an S pen, daily operations can continue seamlessly, eliminating the need for charge time or rifling through paperwork.

Plus, Knox Suite gives IT admins the power to efficiently enroll thousands of devices simultaneously, update OS versions, or troubleshoot without disrupting business.

04 Result

Smooth workflow for everyone

From IT admin to truck driver, everyone has peace of mind knowing that they are getting the most out of their software, devices, and their work.

> As we continue to lead our company into the future, Samsung is one of the pillars we can rely on.

Hendrik Sherf
Founder & Managing Director
YellowFox

Optimizing daily workflow

- Thousands of Galaxy devices can automatically enroll EMM/IT policies through the Knox Suite.

- Device OS versions can be updated in the desired conditions such as via Wi-Fi connection only, pre-determined device battery level, or specific time of day to avoid affecting the employee's daily work, increasing productivity and saving on data costs.

- Remote troubleshooting enables IT admins to resolve issues faster than ever, without needing the physical device.

- IT admins can remotely lock, reset, or clear lost or stolen devices of confidential data, preventing data leakage.

Devices perfected for the job

- Devices can be used in tough environments thanks to Samsung Galaxy Tab Active series having IP68 ratings for water and dust protection*.

- Document and delivery signatures can be done directly on the device with the S Pen.

- Easy battery replacement ensures workers are free to work in the field without worrying about device charging.

- Operational functionality, like check-ins and license checks, are possible through NFC-enabled processes.

*   - Galaxy Tab Active series are rated IP68 under IEC standard 60529
    - IP68 is based on test conditions for submersion in up to 1.5 meters of freshwater for up to 30 minutes
    - Not advised for beach or pool use
