## Golf Pad TAGS® Quick Start Guide

[Getting started](#) with Golf Pad TAGS is simple, however, it does take a few minutes. We recommend you set up and get familiar with the features before you visit the golf course.

First, download Golf Pad GPS on [Google Play](#) or the [App Store](#)

Attach a tag to each club, including your putter. You'll assign tags to specific clubs using the app, so you can install on any club. Use a twisting motion to gently insert the post into the club grip. It should sit flush. Be sure not to over-tighten.

Open Preferences (gear icon) from the start screen, and select Golf Pad LINK / TAGS to enable tags.

Set up is slightly different for Android as compared to iPhone.

- For Android set up instructions, [click here](#).
- For iPhone set up instructions, [click here](#).

### OPTIONAL SMARTWATCH SET UP

Visit [this link](#) for details on getting started with your smartwatch.

Visit [support.golfpadgps.com](http://support.golfpadgps.com) to view tutorial videos, support articles, FAQ's and more. Contact [our support team](#) for additional questions.
