

A property management company streamlined their rental document processes across multiple locations

Bella Investment Group is renting out properties at 12 locations across the state of Arizona. They use signNow to execute lease agreements, finalize reservation forms, and sign other types of rent-related documents.

Challenges before switching to signNow:

- ❌ High and often unpredictable pricing with an alternative eSignature solution
- ❌ Complex document workflows with multiple signers across different locations
- ❌ Time-consuming preparation of documents with repetitive data

Results achieved with signNow:

Same-day document eSigning involving multiple parties

Remote apartment booking and lease agreement approvals

Increased staff productivity with reusable templates and one-click document merging

Simplified delivery of multiple documents with Document Groups

eSignature auto-population is what I like the most about signNow! A lease agreement usually comes as a 16-page document. Previously, I had to sign at least nine times across an entire document. Now it's all pre-filled and auto-populated. This is extremely helpful!
