

Climate Data

Enabling Climate-Aligned Investment Decisions, Disclosures and Compliance with Regulations

Our Climate Data service supports clients globally with their climate-related investment and risk decisions as well as with the monitoring of climate factors.

The Challenge

194 Parties (193 States plus the European Union) have joined the Paris Agreement. Now is the time to take action in the transition to net-zero greenhouse gas emissions by 2050. As the finance sector plays a critical role in transitioning to a low-carbon economy, governments and regulatory bodies all around the world are introducing regulations and recommendations to ensure the targets can be met (e.g. the UK Policy Statement PS21/24: Enhancing climate-related disclosures by asset managers, life insurers and FCA-regulated pension providers; the Swiss Bankers Association (SBA) Guidelines on sustainability; the Swiss Climate Scores; the FINMA Circular 2016/2 "Disclosure – insurers"; the SEC Proposal for Rules to Enhance and Standardize Climate-Related Disclosures for Investors). In order to fulfill the regulatory requirements and to respond to growing interest from clients, it is becoming essential for asset managers, asset owners and banks to manage climate risks and impacts and report transparently on their approach and outcomes.

The SIX Solution

With the Climate Data offering, SIX supports clients worldwide with their climate-related investment and risk decisions as well as with the monitoring of climate factors. The available data is also used in investor reporting and supports compliance with climate related (e.g. TCFD aligned) regulations. SIX identifies, aggregates, normalizes and distributes climate data sets from leading providers (e.g. MSCI, Inrate) via VDF (feed). With the Climate Data from SIX, clients can rely on complete, clean, enriched and high quality information.

Key Benefits

The Climate Data services from SIX:

- ☆ **Supports** your climate related disclosure requirements – the data is based on the proven ESG and regulatory data competence from SIX and leverages our renowned reference data, so you can benefit from complete, clean, enriched and high quality data.
- ☆ **Provides** access to aggregated and normalized data – SIX sources data from several well-established climate data providers, the data is mapped, normalized, comparable and machine readable for automated processing.
- ☆ **Reduces** the complexity of data sourcing by providing one reliable data access point and well-known and trusted delivery capabilities.
- ☆ **Allows** you to simplify your Swiss Climate Scores disclosures with suitable, high quality input data.

Why You Can Rely on Us and This Service

With this offering, SIX addresses your need for extensive and reliable climate data for different use cases and financial instruments. You can receive this data via VDF.
