# ATTENTION STORM WATER CONTRACTORS!

**Free design assistance  
and installation oversight.**

- We help you switch-out other storm water systems and prepare detailed CAD drawings for your use and engineer approval, for free.
- StormChamber™ systems are considered as an “or equal” to other detention/retention systems.
- View and download our installation manual at [www.stormchambers.com](http://www.stormchambers.com).

**Less expensive, quicker and easier to install than other chambers, pipe or vaults.**

Attention Storm Water Contractors!

**SWITCH-OUT FOR SIGNIFICANT  
\$\$\$ AND TIME SAVINGS**

# STORMCHAMBER™

THE LOW COST, LOW IMPACT DEVELOPMENT SOLUTION  
FOR RETENTION, DETENTION, CONVEYANCE, REUSE.

## BENEFITS OVER OTHER PLASTIC STORM WATER CHAMBERS

- » Direct connect side portals eliminate expensive header pipe manifold pipe systems and related extra excavation and stone.
- » Larger size = approximately 45% fewer chambers = significantly less excavation, stone, backfill, compaction, grading, and filter fabric required.
- » Exceeds AASHTO H-20 load rating by 3 times.
- » Integrated end walls; no extra cost for end plates.
- » Limited lifetime warranty

## BENEFITS OVER PIPE

- » Significantly less cost.
- » Significantly quicker and easier to install.
- » Significantly less storage space needed and significantly fewer trucks to receive and unload. Up to 213 LF are shipped on one pallet; up to 1,913 LF per truck.
- » Also provides a significantly lower cost alternative to pipe for conveyance, with added benefits of groundwater recharge and water quality enhancement.

“Because we have installed several StormChamber systems, a lot of engineers have asked for advice on competing plastic chambers. We have always recommended the StormChambers. They far exceed the competition on cost and ease and speed of installation.” – *Dean Clark, General Manager, SECO, LLC, Shelton, WA*

“Much less expensive and much quicker and easier to install than the 64” pipe originally speced for the project.” – *Joe Szabo, Owner, J&R Underground Contractors, Milan MI*

“Significantly faster and easier to install than pipe. Significantly less staging room needed and a lot fewer trucks to receive and unload.” (The equivalent of 213 LF of pipe nest on one pallet, 1,913 LF on one truck.) – *Bob Dawson, Owner, Dawson Company, Woodbridge, VA*

“We have installed several StormChamber systems because we find them to be a lot less expensive and quicker to install than the competing systems and we can install them in two layers on very confined sites.” – *Ed Shaw, President, Shaw Construction, Reno, NV*
