

INTERESTED IN STRONGER WORKFLOW EFFICIENCY?

Thales Enrollment Kiosks can help make your lobby run smoothly and efficiently!

The key to a Thales Enrollment Kiosk is its modular design and automatic adjustment capabilities – making it ideal for citizen enrollment and registration applications.

Modular Design

With options for capturing photos, signatures, and other data, along with identity document authentication, POS payment, receipt printing, temporary document issuance, or a combination of these, Thales Enrollment Kiosks provide peace of mind with seamless and hassle free self-service or attended registrations.

Automatic Adjustment Capabilities

Thales Enrollment Kiosks are designed to automatically adjust to each person's height, whether short or tall, and for wheelchair users. The camera automatically adjusts to the applicant's eye level for excellent quality ICAO-compliant photos in just one capture. Additionally, the entire kiosk working area automatically adjusts to a comfortable level for each person's height.

With a variety of intuitive features built-in, Thales Enrollment Kiosks provide strong benefits for your workflow and for your citizens.

Cost effective for Jurisdictions

- Minimize manual processes and increase throughput rates
- Modular design is flexible, easy to operate and maintain
- Reallocate front office resources to more value-added tasks

Secure and reliable processes

- Efficiently verify applicant identity quickly and easily
- Best-in-class biometric capture and registration
- Immediate quality and ICAO checks

Efficient public service for citizens

- Faster DMV experience without long lines
- Automatic height adjustment, no manual interaction needed
- Fast, easy and convenient process

Thales Enrollment Kiosks can be operated by one of your staff (Attended mode), or completely by the citizen (Self Service mode) with one staff member able to supervise and assist several kiosks as needed.

Thales is a biometric kiosk pioneer, with more than 1,000 kiosks already deployed worldwide, enrolling more than 20 million persons since 2009. Thales Enrollment Kiosks are used to register citizens for Driver Licenses, ID Cards, Passports, Resident Permits, and other identity documents.
