

VisCube C4-T4™

CAVE Immersive 3D Display

Key Features:

- **Ultra Resolution CAVE** VR system
- **Small footprint:** fits into existing spaces
- Multi-screen Immersion: 3 walls and a floor
- Extra large **12' wide** front wall allows more viewers
- **3456x2160 or 4608x2880 resolution**
- Multi-use: mono, stereo 3D, tracked stereo 3D (VR)
- Custom configurations available

The **VisCube C4-T4™** is an **extreme resolution** CAVE immersive virtual reality system. It features rear-projection walls and a front projected floor. The 12' wide front wall and floor allow more viewers in the space than a standard 10' wide CAVE configuration. The VisCube C4-T4 is configured as a turn-key immersive virtual reality system, complete with a tracking system and graphics workstation. See datasheet below.

The VisCube C4-T4 can be installed in existing spaces. **The system fits within standard office 9' ceiling heights.** This eliminates time-consuming and costly room modifications.

VisCube C4-T4 Datasheet

System Specifications

- Resolution: 3456x2160 or 4608x2880 front wall
3456x1920 or 4608x2560 floor
1920x2160 or 2560x2880 side walls
- Screens: 3 walls + 1 floor
- Screen size: 144" w x 90" h front wall, 144" w x 80" h floor
80" w x 90" h side walls
- Footprint: 24' w x 16.5' d x 9' h (approx)

Includes:

- 12 active stereo projectors (1920x1200 or 2560x1600)
- 12 digital edge blending boxes
- Free-standing aluminum structure with front-surface mirrors
- Raised floor surface, custom projector positioners
- Active stereo and 10 pairs of glasses
- Video, projector control, projector sync, and power cabling
- Integrated wire ducts for clean cabling
- Installed and calibrated on-site by Visbox, Inc.

A.R.T. Optical Tracking

- ARTTRACK5 system (4 high resolution cameras)
- Tracked head, tracked wand (controller)

Image Generator

- Graphics workstation with NVIDIA Quadro graphics
- 19" APC rack and all cabling
- Control console with monitor/keyboard/mouse
- Software demos, applications, and development libraries

Sound System

- 5.1 Surround speakers: 5 satellite, subwoofer
- 5.1 Surround system processor/amplifier

Option: Light Block

- Fabric enclosing system
- Blocks ambient light and restricts access

Multi-Screen Applications

The VisCube provides a high level of immersion using multiple life-size 3D display surfaces surrounding the user. With the addition of head tracking, virtual objects appear at human scale and users can manipulate their perspective with natural head movements. This ability to look in, out, and around virtual objects enhances the ability to visualize many types of data.

Other VisCube Models

- VisCube M2, M4: 10'-12' wide, 1920x1200
- VisCube C1, C2: 12' wide, 1920x1200 or 2560x1600
- VisCube C4: 12' wide, 1920x1200 or 2560x1600
- VisCube C4-T2: 10' wide, 2840x2560
- VisCube C4-T3: 12' wide, **4096x2560**
- VisCube C1,C2-4K, C4-4K: 14.25' wide, **4096x2160**
