

Connect, create and collaborate with Google Meet Series One

At anytime, with anyone from anywhere

[Watch video](#)

There's a Series One device for every meeting room, space and use case.

Desk 27

All-in-one personal video conferencing device for desktops and small shared spaces.

Board 65

All-in-one team video conferencing device for small-to-medium spaces.

Room Kit

Versatile meeting devices to create video conference rooms of any size.

Available early 2022

Series One Desk 27

FOR 1-2 PEOPLE

Everything you can do in the meeting room, now on your desktop.

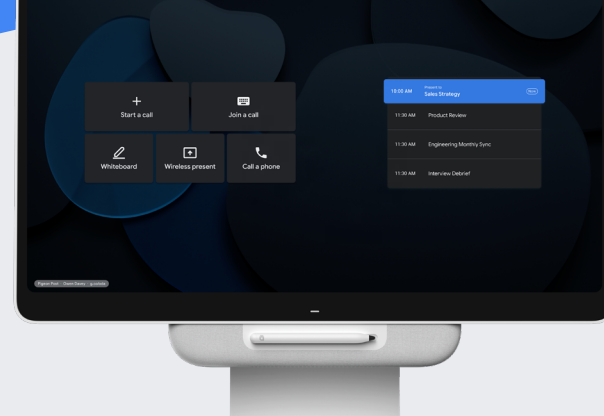

Meet

Make virtual meetings feel like you're in the same room with a 5MP camera, 8 onboard mics, a 27" touchscreen and Google AI.

Collaborate

Communicate, create and collaborate together using your finger or the passive stylus with the integrated Jamboard app for anywhere, anytime collaboration.

Developed with QVOCOR

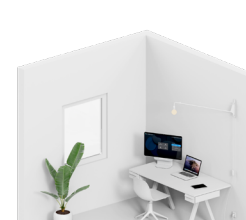

Ideal for:

Privacy spaces or phone booths

Shared hot desks

Your desk—at home or in the office

Available on all Series One hardware

TrueVoice™

Make meetings more equitable by ensuring every voice is heard. Powered by Google AI, TrueVoice™ multi-channel noise cancellation detects and eliminates distracting sounds (like typing and crinkling) while enhancing human voices.

Developed with QVOCOR

Available 2022

Series One Board 65

FOR TEAM SPACES

A hub for all your team collaboration that gives everyone the ability to participate.

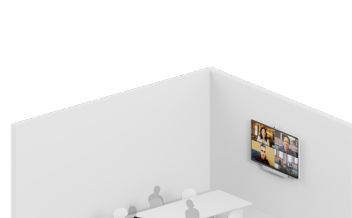

Ideate together

With a 65" 4K touchscreen, 4K camera, two passive styluses, an optional rolling stand and the Jamboard app built right in, Board 65 makes it easy to collaborate anywhere.

Meet together

Start a meeting with a tap and keep the ideation rolling. With a single touch, Board 65 optimizes audio settings for different room sizes and surfaces. Hear and be heard—even in open spaces.

Ideal for:

Team rooms and boardrooms

Executive offices

Spontaneous meeting spaces

“Hey Google, join the meeting.”

Available on all Series One hardware

“Hey Google” voice commands

Go hands-free with voice commands. Start or end meetings using “Hey Google.”

Available now

Series One Room Kit

FOR ROOMS OF ALL SIZES

Meeting room kits made to put people first.

Make the best use of your space

Using Google AI, Series One Room Kits can anonymously track the number of participants in a room throughout the day. In-room occupancy detection helps you understand if you're using your rooms efficiently.

Customize your meeting spaces

From huddle rooms to boardrooms, Series One Room Kits are made to fit rooms of any size. Just add the kits to the display(s) of your choice. For the largest rooms, additional mic pods and smart audio bars ensure everyone has a seat at the table. Optional AV carts make it easy to move room kits where you need them.

Developed with **Lenovo**

Ideal for:

Small rooms

Medium rooms

Large rooms

Available on all Series One hardware

Automatic framing

A single touch automatically detects and frames participants in the room, without loss of quality. As people move around, Series One devices dynamically reframe to keep everyone in focus.

Expand your calling circle:

Series One devices give you choice and flexibility to collaborate with anyone

We get it. Not all of your vendors and clients use Google Meet.

That's why all Series One devices have embedded interoperability with Webex devices. Call into a Webex meeting from a Google Meet device or into Google Meet with a Webex device.

And while optimized for Google Meet, Board 65 and Desk 27 can be used with any video conferencing platform when your laptop is connected via USB-C.
