

Shaping EU climate and energy policy: Insights from and questions for the Ariadne project

Dates: 30 November – 2 December 2022
 Venue: Martins Hotel EU Brussels, Boulevard Charlemagne 80, 1000 Brussels, Belgium
 Meeting room: Quartz or Topaz

Day 1: Wednesday, 30 November 2022		
Time	Topic	Session Leads
08.45 – 09:00	Registration	
09:00 – 10:30	The EU-ETS price through 2030 and beyond: A closer look at drivers, models and assumptions I <i>(by special invitation only)</i>	Michael Pahle (PIK), Benjamin Görlach (Ecologic Institute)
10:30 – 11:00	Coffee break	
11:00 – 12:30	The EU-ETS price through 2030 and beyond: A closer look at drivers, models and assumptions II <i>(by special invitation only)</i>	Michael Pahle (PIK), Benjamin Görlach (Ecologic Institute)
12.30 – 13.30	Light lunch	
13.30 – 15.00	The EU-ETS price through 2030 and beyond: A closer look at drivers, models and assumptions III, Q&A session (webinar format) <i>(by special invitation only)</i>	Michael Pahle (PIK), Benjamin Görlach (Ecologic Institute), Ottmar Edenhofer (PIK)
15.00 – 15.30	Coffee break	
15.30 – 17.30	Charting a path towards climate neutrality in turbulent times - Tools and institutions that can support stable long-term climate policy	Matthias Duwe (Ecologic Institute) – Joint Climate RECON 2050/ Ariadne event, Ottmar Edenhofer (PIK)
17.30 – 18.30	Reception	

Day 2:

Thursday, 1 December 2022

Time	Topic	Speakers and discussants
09:00 – 09:30	Registration	
09:30 – 10:45	(In)Coherence between European hydrogen and energy policies	Michèle Knodt (TU Darmstadt), Nils Bruch (TU Darmstadt)
10:45 – 11:15	Coffee break	
11:15 – 12:30	Strengthen the governance mechanism: Achieve the 2030 climate targets and close the EU Green Deal gap	Eva-Maria Thierjung, (Universität Greifswald), Fabian Pause (Stiftung Umweltenergierecht - Foundation for Environmental Energy Law), Michèle Knodt (TU Darmstadt), Niels Anger (German Federal Ministry for Economic Affairs and Climate Action, BMWK) (tbc), Dörte Fouquet (Leuphana University Lüneburg/Of Counsel BBH), Luke Haywood (European Environmental Bureau EEB)
12:30 – 13:45	Light lunch	
13:45 – 15:15	REPowerEU: Go-to-areas for renewables and emergency measures to accelerate deployment	Fabian Pause (Stiftung Umweltenergierecht - Foundation for Environmental Energy Law), Sabine Schlacke (Universität Greifswald), Dörte Fouquet (Leuphana University Lüneburg/Of Counsel BBH), Luke Haywood (European Environmental Bureau)
15:15 – 15:45	Coffee break	
15:45 – 17:15	Concepts, Crises & Compromises: Reforming the EU ETS in turbulent times	Grischa Perino (Universität Hamburg), Max Willner (Universität Hamburg)

Day 3: Friday, 2 December 2022		
Time	Topic	Speakers and discussants
09:00 – 09:30	Registration	
09:30 – 11:00	Interactive Workshop: Scanning threats to the EU internal energy market (I)	Benjamin Görlach (Ecologic Institute)
11:00 – 11:15	Coffee break	
11:15 – 12:30	Interactive Workshop: Scanning threats to the EU internal energy market (II)	Benjamin Görlach (Ecologic Institute)
12:30 – 13:30	Light lunch	

More information on the workshops

Day 1

30.11.22 Wednesday

09:00 – 15:00

The EU-ETS price through 2030 and beyond: A closer look at drivers, models and assumptions

The goal of the workshop is to discuss in-depth the types of models, implementation details as well as core assumptions employed in the analysis of ETS prices targeted to inform the policy debate. More specifically, we want to take stock of the diversity of approaches, discuss their pros and cons, and identify major sensitivities and arising developments affecting the price of carbon through the end of this decade and beyond.

Organisers: Michael Pahle (PIK), Benjamin Görlach (Ecologic Institute)

15:30-17:30

Charting a path towards climate neutrality in turbulent times - Tools and institutions that can support stable long-term climate policy

This public event will discuss how stable long-term policy direction towards climate neutrality can be maintained during times of crisis. To explore this question, it dives into the role of two instruments that can provide stability in this context: long-term climate strategies and scientific climate advisory councils. To exchange views on these topics the event features experienced practitioners from the European Commission and national institutions. This event is organised jointly by Climate Recon 2050 and the ARIADNE project and will be accessible both in person and electronically. It will conclude with an informal networking reception for those joining in person in Brussels at the Martin's Brussels EU Hotel.

KOPERNIKUS

Ariadne

PROJEKTE

Die Zukunft unserer Energie

Organisers: Matthias Duwe (Ecologic Institute), Ewa Iwaszuk
(Ecologic Institute)

Day 2

01.12.22 Thursday

09:30 – 10:45

(In)Coherence between European Hydrogen and Energy Policy

The use of renewable and low carbon hydrogen is seen as a promising solution to decarbonize sectors that are difficult to electrify. To support the market ramp-up of the new technology, a comprehensive and coherent European legislative framework covering the complete hydrogen value chain is necessary. In this panel, we will discuss developments, potentials and dangers of regulatory incoherencies to form an effective European hydrogen governance.

Organisers: Michèle Knodt (Technical University Darmstadt), Nils Bruch (Technical University Darmstadt)

01.12.22 Thursday

11:15 -12:30

Strengthening the governance mechanism: Achieving 2030 climate targets and closing the EU Green Deal gap

In response to the Russian war of aggression against Ukraine, the European Commission has presented an update of the "Fit for 55"-package, the "REPowerEU"-Plan. However, this set of measures has a vast blind spot: the Governance-Regulation is not on the reform agenda. Why this situation is a large-scaled grievance, which should be resolved as soon as possible, and what options for action are available in respect thereof will be the subject of this panel. Particularly, the question why it is not sufficient to adapt only sectoral measures and a revision of the governance framework is urgently needed, will be discussed.

Organisers: Eva-Maria Thierjung, (Universität Greifswald), Fabian Pause (Stiftung Umweltenergierecht - Foundation for Environmental Energy Law), Michèle Knodt (TU Darmstadt), Niels Anger (German Federal Ministry for Economic Affairs and Climate Action, BMWK) (tbc), Dörte Fouquet (Leuphana University Lüneburg/Of Counsel BBH), Luke Haywood (European Environmental Bureau EEB)

13:45 – 15:15

REPowerEU plan: Go-to-areas for renewables and emergency measures to accelerate deployment

As part of their RePowerEU plan, the EU Commission called on Member States to swiftly map, assess and secure land available for new renewable energy projects. They followed up on this call by proposing the identification of so-called « go to areas » in the Renewable Energy Directive. Those shall be areas particularly suitable for renewables projects, i.e. areas where no significant impact on the environment is to be expected and where planning and permitting processes can proceed in a quicker pace. This session will discuss whether and how those proposals may help to speed up the deployment of renewables in line with the EU's (more ambitious) goals.

Organisers: Fabian Pause (Stiftung Umweltenergierecht - Foundation for Environmental Energy Law) Sabine Schlacke (Universität Greifswald), Dörte Fouquet (Leuphana University Lüneburg/Of Counsel BBH), Luke Haywood (European Environmental Bureau)

15:45 – 17:15

Concepts, Crises & Compromises: Reforming the EU ETS in turbulent times

The workshop will focus on key design aspects of the EU ETS such as the MSR and Article 29a (and 30h) and particularly addresses people working on these mechanisms.

How do assessments of the current state of the EU ETS differ and what are the key challenges that need to be addressed by the ongoing reform?

What are the expectations behind named design proposals? How does the political process constrain compromises on the design of the EU ETS?

Moreover, the session will inform the research agenda for the next phase of the Ariadne project.

Organisers: Grischa Perino (Universität Hamburg), Maximilian Willner (Universität Hamburg)

Day 3

02.12.22 Friday

09:30 – 12:30

Interactive Workshop: Scanning threats to the EU internal energy market (I)

Since the Russian attack on Ukraine, energy policy in Europe has been in uncharted territory – in terms of fossil fuel price developments, but also in terms of policy interventions in energy markets. This three-hour workshop assembles selected experts (policy practitioners, other stakeholders and academics) to take stock of some of the main threats that the EU internal energy market currently faces, and – in an interactive way – to explore their likelihood, their potential significance, and their possible (positive or negative) impacts on EU climate and energy policy.

Organiser: Benjamin Görlach (Ecologic Institute)
