SUPPLEMENTARY INFORMATION:

I. Abstract

The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 131 to examine an application for patent and, when appropriate, issue a patent. The USPTO is also required to publish patent applications, with certain exceptions, promptly after the expiration of a period of eighteen months from the earliest filing date for which a benefit is sought under title 35, United States Code ("eighteen-month publication"). Certain situations may arise which require that additional information be supplied in order for the USPTO to further process the patent or application. The USPTO administers the statutes through various sections of the rules of practice in 37 CFR part 1.

During the processing of an application for a patent, the applicant or the applicant's representative may be required to submit additional information to the USPTO concerning the examination of a specific application. The specific information required to be submitted includes: requests for extension of time, abandonment of applications and the revival of abandoned applications, disclaimers, appeals, petitions, expedited examination of design applications, requests for continued examinations, requests to inspect, copy, access patent applications, and transmittal forms.

The information in this collection is used by the USPTO to continue the processing of the patent or application to ensure that applicants are complying with the patent regulations and to aid in the prosecution of the application. This also includes situations that require additional information in order for the USPTO to further process the patent or application.

II. Method of Collection

The items in this information collection can be submitted through the USPTO patent electronic filing system (Patent Center), the USPTO's online filing and viewing system for patent applications and related documents. The USPTO also will accept submissions by mail, hand delivery, and facsimile.

Title: Patent Examiner Employment Application.

OMB Control Number: 0651-0042.

Needs and Uses: In the current employment environment, life science and engineering graduates are in great demand. The United States Patent and Trademark Office (USPTO) is in direct competition with the private industry for the same caliber of candidates with the requisite knowledge and skills to perform patent examination work. This information collection covers online applications to the USPTO for entry level patent examiner positions. More specifically, the collection covers the respondent data gathered from the applications. The USPTO posts the relevant positions online and collects applicant information via the USA Staffing System.

The USA Staffing online application collects supplemental information to a candidate's USAJOBS application. This information assists USPTO Human Resource Specialists and Hiring Managers in determining whether an applicant possesses the basic qualification requirements for a patent examiner position. From the information collected, the USA Staffing system creates an electronic real-time candidate inventory on applicants' expertise and technical knowledge, which allows USPTO to immediately review applications from multiple
