MEMORANDUM FOR: Regional Administrators  
Regional Economists  
Field Office Managers  
Field Office Economists

SUBJECT: 1990 Income Limits for Lower Income and Very Low-Income Families  
Under the Housing Act of 1937

This memorandum transmits revised income limits for determination of family eligibility for programs subject to definitions of "lower income" or "very low income" developed in accordance with Section 3(b)(2) of the United States Housing Act of 1937, as amended. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county in the attached lists. The two largest programs subject to these income limits are the Section 8 and Public Housing programs. The revised limits are effective as of the date of this memorandum.

These income limits are based on the HUD estimates of median family income for Fiscal Year 1990. As required by statute, the definition of "lower income family" is based on 80 percent of the median income for the area, with adjustments for smaller and larger families, and the "very low-income family" income limits are based on 50 percent of the median, with adjustments for family size. A 1987 Housing and Community Development Act amendment to the U.S. Housing Act of 1937 established a minimum income limit standard based on the State nonmetropolitan median family income level. This provision increases income limits for over 60 percent of all nonmetropolitan counties, and has also been applied to the small number of metropolitan areas which had lower income limits than those based on the nonmetropolitan median family income for the State in which most or all of each area was located. As authorized by legislation and as has been done in previous years, income limits have also been adjusted for a small number of areas with unusually high or low housing costs in relationship to income.

In calculating income limits, the first step is to calculate what the income limit would be if there were no upward constraints. The Very Low-Income limits for a four-person family are normally set at the higher of:

- 50 percent of the area median family income;

- 50 percent of the State nonmetropolitan median family income for the State in which all or most of the area is located; or,
- the level at which 35 percent of income would pay the rent for a unit renting at 85 percent of the estimated typical rent for an existing two-bedroom unit, as measured by the Section 8 Fair Market Rent standard.

The purpose of the last calculation is to ensure that consideration is given to areas where rental housing costs are unusually high in relation to median family incomes. A 35 percent rent-to-income ratio was selected for use in setting minimum income limits for high cost areas because many nonsubsidized low-income families pay this amount or more for housing, and because households tend not to participate in assisted housing programs unless they are eligible for a significant subsidy. Eighty-five percent of the Fair Market Rent was selected because significant numbers of standard rental units are available in most markets at and above this level.

There continues to be a small number of areas with unusually low rental housing costs in relationship to area median family incomes. To adjust for these situations, the maximum income limit for a Very Low-Income four-person family has been set at the level at which 30 percent of income would pay for a unit renting at the maximum exception rent permitted by the Section 8 Existing Housing program. This guideline, however, is superseded in instances where income limits would otherwise be lower than those based on State nonmetropolitan median family incomes.

In establishing Lower Income limit schedules, which by statute are based on 80 percent of local median family income, the same guidelines as referenced above are applied using an 80 percent standard except that there is no maximum income limit constraint based on low housing costs relative to income levels. As in the past, however, a maximum income limit for Lower Income four-person families has been established. Instead of being set at the national median family income level as was done prior to the 1987 HCD Act's passage, it is set at the higher of the national median family income level of \$35,700 or at 80 percent of the State nonmetropolitan median family income level. For FY 1990, there were no instances where 80 percent of the State nonmetropolitan family income level exceeded the national median.)

For purposes of HUD programs, income limits approved for Indian Trust Lands remain in effect unless superseded by higher FY 1990 income limits.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

Income Limits	Number of Persons in Family and Percentage Adjustments							
	1	2	3	4	5	6	7	8
Lower income	70	80	90	Base	106.25	112.5	118.75	125
Very low-income	70	80	90	Base	108	116	124	132

Higher income limits apply to families with more than eight persons, although they are not included in the printed State lists because of space limitations. The lower income limits for families larger than eight persons are determined by adding 6.25 percent of the four-person income limit base to the eight-person limit for each person in excess of eight. For very low-income limits, 8 percent of the four-person base is added to the eight-person limit for each person in excess of eight. (E.g., the nine-person very low limit equals 1.4 (1.32 + .08) times the four-person limit.) The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up-to-date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants, and Field Offices should be prepared to make income limits available to the public upon request.

Requests from the public for sets of national or regional income limits may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (if in the Washington metropolitan area, dial 252-5154). Questions related to how these income limits apply to tax code provisions should be referred to Mark Scott at the Department of the Treasury (202-566-3064). Questions concerning the methodology used to develop these income limits are addressed in the briefing material supplied to all HUD Field Office economists and also available through HUD USER.

MEMORANDUM FOR: Regional Administrators  
Regional Economists  
Field Office Managers  
Field Office Economists

FROM: *John C. Weicher*  
John C. Weicher

SUBJECT: Estimated Median Family Incomes for  
Fiscal Year 1990

This memorandum transmits updated median family income (MFI) estimates and income distributions for Fiscal Year 1990 (FY 1990) covering all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs) and nonmetropolitan counties. A separate list is attached which provides median income estimates for States and for the metropolitan and nonmetropolitan parts of each State in the United States.

The FY 1990 MFI estimates have been developed by updating the 1979 median family incomes obtained from the 1980 Census. The latest available wage data from County Business Patterns and median family income data from the Bureau of Census Current Population Reports, P-60 Series, have been used to develop these estimates as follows:

- The 1979 to 1987 change was estimated by using MSA and non-MSA county group wage data from County Business Patterns combined with Census Division median family income data from the P-60 Series. The P-60 Series data, which are reliable down to the Census Division level, are used to determine the increase in median family incomes for the nine Census Divisions. An index is then developed which distributes the P-60 based estimates of changes in family incomes to the county level using County Business Patterns data. In effect, the amount of change is determined by the P-60 data, and the distribution of that change within a Census Division is determined by the County Business Patterns data.
- An estimated average annual projected increase of 4.3 percent in MFI is used for 1988 based on preliminary March 1989 P-60 data. Based on trending of P-60 data, an average increase of 5.0 percent is

used for 1989 and an increase of 3.75 percent used for the period between mid-1989 and the middle of FY 1990. Use of projections for the 1988 through March 1990 period is necessary because of the lag in County Business Patterns and P-60 Series data, which are not available in detailed form beyond 1987.

With the exception of one nonmetropolitan county where a special adjustment was made based on County Business Patterns data for the surrounding counties, and six metropolitan areas where adjustments were made using American Housing Survey data, the median family income estimates were developed using the updating procedures described above. A detailed step-by-step description of the methodology used is attached which explains how all of the estimates were calculated. The estimated median family income for the United States for FY 1990 is \$35,700.

Please note that the use of the median family income for various HUD program applications, including income limits for subsidized housing, is subject to individual program guidelines covering definition of income and family, family size, effective dates and other factors. If there are any questions concerning the income estimates, please request your Office's economist to contact his or her Headquarters' counterparts. Public inquiries may be referred to HUD USER, whose toll-free number is 1-800-245-2691 (use 251-5154 in the Washington metropolitan area).

HUD METHODOLOGY FOR ESTIMATING FY 1990 MEDIAN FAMILY INCOMES  
 (ECONOMIC AND MARKET ANALYSIS DIVISION, OFFICE OF ECONOMIC AFFAIRS, PD&R)

The methodology used for estimating the FY 1990 median family incomes (MFIs) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties is based on development of income update factors for each metropolitan area and nonmetropolitan Census County Group. These factors generally are then applied to 1980 Census median family income levels. For a small number of metropolitan areas where recent American Housing Surveys provide estimates of median family income that measurably differ from updated 1980 Census estimates, the AHS estimates are used as the basis for updating.

The income adjustment factors are developed in several steps based on the use of individual wage earner data from County Business Patterns (CBP) which are available for 1979 through 1986, Census Division MFIs from the Current Population Reports P-60 Series which are available for 1979 through 1987, a preliminary P-60 estimate for 1988, and HUD estimates for 1989 and the first part of 1990. The 1989 and 1990 estimates are based on trending P-60 family median income data. The step by step normal procedures as well as the exception procedures used are as follows:

- (1) The increase factors for wage increases are calculated for each Census Division for the 1979-1986 period.

$$\frac{\text{Census Division CBP Wages (1986)}}{\text{Census Division CBP Employees (1986)}}$$

= 7-year increase factor for  
Census Division CBP Wages

$$\frac{\text{Census Division CBP Wages (1979)}}{\text{Census Division CBP Employees (1979)}}$$

- (2) The increase factors for the P-60 Series median family incomes are calculated for Census Divisions for the 1979-1987 period.

$$\frac{\text{Census Division P-60 MFI (1987)}}{\text{Census Division P-60 MFI (1979)}}$$

= 8-year increase factor for Census  
Division P-60 MFI

- (3) The indices relating the County Business Patterns data to the P-60 Series data are calculated for the Census Divisions by deriving the ratios of the P-60 Series factors to the County Business Patterns factors.

$$\frac{\text{8-year increase factor for  
Census Division P-60 MFI}}{\text{7-year increase factor for  
Census Division CBP Wages}}$$

= 8-year to 7-year ratio of Census  
Division P-60 MFI to Census  
Division CBP wages

(4) The increase factors for the individual metropolitan areas and nonmetropolitan counties are calculated by applying the index factors developed for the Census Division to the County Business Patterns data.

MSA CBP Wages (1986)		8- to 7-year ratio	
MSA CBP Employees (1986)	x	of Census Division	= 8-year income
		P-60 MFI to Census	adjustment
		Division CBP wages	factor for MSA
			or County Group
MSA CBP Wages (1979)			
MSA CBP Employees (1979)			

(5) An average annual increase of 4.3 percent is used for 1988, based on P-60 data. A projected increase of 5.0 percent in MFI is used for calendar year 1989, and an average increase of 3.75 percent (3/4 of the 5 percent estimate) is used for the following nine months to obtain a mid-FY 1990 estimate. Use of projected increases for the 1988 through March 1990 period is necessary because of the lag in County Business Patterns and P-60 Series data.

(8-year income adj.)		10-year 9-month income
(factor for MSA )	x	= adjustment factor for
(or County Group )		MSA or Non-MSA county

(6) Calculation of the median family incomes for FY 1990 is completed by multiplying the 1979 median family income obtained from the 1980 census by the income adjustment factor derived in step (5).

(7) If the estimated median family income for FY 1990 is less than the estimate published for FY 1989, the median published for FY 1990 is the same as that published in 1989. Increases are capped at ten percent, unless there is multi-year evidence of a significant differential.

(8) For areas where estimates based on the above procedures differ significantly from those based on current metropolitan American Housing Survey-based estimates updated using CBP and P-60 data, the estimates developed using the above procedures were modified so that they did not differ by more than 6 percent from the AHS-based estimates. A 6 percent range was selected because the true median family income level for an area is unlikely to be outside of a 6 percent range from an AHS-based estimate.

(9) For one nonmetropolitan county, Saunders County, Nebraska, the median family income estimate was revised based on the rate of change in wages for the two adjoining metropolitan areas where a large portion of the county's work force is employed.

NOTE: In step (4) use MSA or Census County Group data as appropriate for 1979 and 1986.

MEMORANDUM FOR: Regional Administrators  
Regional Economists  
Field Office Managers  
Field Office Economists

FROM: C. Austin Fitts, Assistant Secretary for Housing-  
Federal Housing Commissioner, ~~HTA~~ ~~for CH~~

SUBJECT: Approval of Revised FY 1990 Income Limits for  
the Section 221(d)(3) BMIR, Section 235, and  
Section 236 programs

This memorandum transmits revised income limits for determination of family eligibility under Section 221(d)(3) BMIR, Section 235, and Section 236 of the National Housing Act. These income limits, which are listed by dollar amount and family size, are available for each Metropolitan Statistical Area (MSA), Primary Metropolitan Statistical Area (PMSA), and nonmetropolitan county. The revised income limits are effective as of the date of this memorandum.

These revised income limits are based on the HUD estimates of median family income for Fiscal Year 1990. They are developed consistent with the requirements of Section 3(b)(2) of the United States Housing Act of 1937, as amended. As required by legislation, the limits for the Section 236 program are based on 80 percent of the median income for the area and the limits for the Section 235 and Section 221(d)(3) programs are based on 95 percent of the median. As is also required, these income limits are then adjusted for family size. In compliance with a 1987 Housing and Community Development Act amendment to the U.S. Housing Act of 1937, income limits for areas which would otherwise have income limits lower than those based on the State nonmetropolitan median family income level will be increased to that level. This latter provision results in higher income limits for over half of all nonmetropolitan areas. This same adjustment also has been applied to the small number of metropolitan areas which otherwise would have lower income limits than those of nonmetropolitan counties in the State in which all or most of the metropolitan area is located. As permitted by statute, additional adjustments to income limits have been made for areas with unusually high housing costs, but use of the State nonmetropolitan median income calculation already adjusts for most of the areas that would otherwise have been affected.

There will continue to be a small number of areas where minimum income limits based on previously approved guidelines will remain in effect. In accordance with established procedures, Field Offices may request modified Section 235 income limits for specific market areas where warranted by local construction costs.

For areas of unusually high income, the four-person family maximum income limit for the Section 236 program has been established at the higher of the State nonmetropolitan median family income or the national median family income level of \$35,700. The maximums for the Section 221(d)(3) BMIR and Section 235 programs have been calculated so as to maintain the 80 to 95 percent statutory relationship. For areas where Section 235 income limits have been approved on the basis of local cost data, the maximum limits may be higher.

As required by statute, adjustments have been made in the income limits for smaller and larger families by using the four-person family as a base and applying percentage adjustments for various size families as follows:

Number of Persons in Family and Percentage Adjustments							
<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>
70	80	90	Base	106.25	112.5	118.75	125

Higher income limits apply to families larger than eight persons, although they are not included in the printed State lists because of space limitations. The limits for families larger than eight persons are determined by using an adjustment of 6.25 percentage points more for each person beyond the eighth person. For example, the nine-person income limit is determined by multiplying the 4-person income limit by 1.3125 (i.e., the eight-person limit of 125 percent plus 6.25 percent for an additional family member). The limits developed by the use of these factors are to be rounded to the nearest \$50.

HUD Field Offices are responsible for maintaining complete and up-to-date records of all current income limit ceilings established for areas within their jurisdiction. Notice of all income limit revisions should be promptly distributed to program participants and Field Offices should be prepared to make income limits available to the public upon request.

If you have any questions concerning these new income limit approvals or the procedures for requesting special revisions, please contact your HUD Field or Regional Office economist.

### Overview of

#### HUD Section 8 & Public Housing Income Limits

By law, the Department of Housing and Urban Development (HUD) is required to establish income limits for use in determining the eligibility of families and persons seeking to participate in the Department's assisted housing programs. The major active assisted housing programs are the Public Housing program, the Section 8 certificate and voucher programs, and the Section 202 elderly/handicapped program.

Income limits are calculated by family size for each metropolitan area and nonmetropolitan county in the United States and its territories. They are based on the Department's estimates of median family income, with adjustments for areas which have unusually high or low income to housing cost relationships.

The statutory basis for HUD's income limit policies is found in Section 3 of the U.S. Housing Act of 1937, as amended, which contains the following provisions related to income limits:

- "Lower income families" are defined as families whose incomes do not exceed 80 percent of the median family income for the area.
- "Very low-income families" are defined as families whose incomes do not exceed 50 percent of the median family income for the area.
- Income limits for nonmetropolitan areas may not be less than limits based on the State nonmetropolitan median family income level.
- Income limits must be adjusted for family size.
- Income limits may be adjusted for areas with unusually high or low family income or housing-cost-to-income relationships.
- The Secretary of Agriculture must be consulted prior to establishing income limits for rural areas, since these limits also apply to certain Farmers Home Administration programs.

While Section 3 of the U.S. Housing Act defines how income limits are to be established, Section 16 of the Act specifies how income limit standards are to be applied for use with the Public Housing and Section 8 programs. Section 16 provides the following provisions applicable to these two programs:

- At least 95 percent of the dwelling units which first became available for occupancy on or after October 1, 1981, must be leased to very low-income families.
- At least 75 percent of the units first available for occupancy prior to October 1981 must be leased to very low-income families.

#### Income Limit Calculations:

The process of developing income limits involves a number of calculations, starting with the development of estimates of median family income. The major parts of this process are as follows:

- HUD calculates area median family income estimates (one-person households and households consisting of unrelated individuals are excluded from these calculations) for 341 metropolitan areas and for 2415 nonmetropolitan counties within the United States, and for 9 areas in U.S. territories with assisted housing programs.
- Median family income estimates are based on 1980 decennial Census data updated with Bureau of the Census P-60 income data and Department of Commerce County Business Patterns employment and earnings data, except in six areas where metropolitan American Housing Survey data showed sizeable differentials from the 1980-based estimates.
- Two procedures are used to minimize year-to-year fluctuations in median income estimates and income limits. One is to maintain income limits at the previous year's levels for areas where they would decrease if based solely on the most current data. The other is to cap increases at ten percent.

Comparisons of HUD estimates of median area incomes with 1980 Census data provide an indication on estimation accuracy over the 1970-80 period, during which incomes changed by over 100 percent:

- The population-weighted average standard error was six percent.
- Seven percent of metro areas and about 30 percent of non-metropolitan areas had estimate errors in excess of 10 percent.

- Errors were highest for nonmetro counties with populations of less than 5,000 persons and of unusually low income, for which wage data are a poor indicator of median incomes.

American Housing Survey metropolitan surveys provide a more current reference standard as to the accuracy of HUD estimates. Comparison of median family income estimates for FY 1990 based on updated 1980 Census data with estimates based on updated 1987 AHS surveys showed that the median difference in estimates was less than 1.5 percent.

#### Family Size Adjustments:

There is a statutory requirement that income limits be adjusted for family size. The starting point for all adjustments is the four-person family income limit. Once the four-person income limit is established, standard factors are applied as follows:

	<u>Number Persons in Family</u>							
	<u>1</u>	<u>2</u>	<u>3</u>	<u>4</u>	<u>5</u>	<u>6</u>	<u>7</u>	<u>8</u>
Very low-income limit: (50% of median or adj. median=100%)	70%	80%	90%	100%	108%	116%	124%	132%
Lower income limit: (80% of median or adj. median=100%)	70%	80%	90%	100%	106.25%	112.5%	118.75%	125%

#### Adjustments for Areas With Unusual Incomes or Housing Costs:

HUD has always adjusted income limits for areas of unusually high or low income. The revised FY 1990 income limits contain caps and floors based on U.S. median family income and the State non-metropolitan median family income levels. In addition, HUD continues to revise income limits for areas with unusually high or low housing-cost-to-income relationships. Most areas previously affected by the housing cost adjustments, however, now have income limits set based on State nonmetropolitan income levels.

The procedures used to develop FY 1990 income limits, and the outcome of these procedures, are as follows:

	<u># MSAs Affected</u>	<u># Non-Metro Counties Affected</u>
<u>For Very Low Income Limits based on 50% of area median income:</u>		
- A minimum is set based on the State nonmetropolitan median family income	23	1,481
- The income limit is increased if it would otherwise be less than the income level at which 35 percent of a 4-person family's income would pay for a unit renting at 85 percent of the 2-bedroom Sec. 8 Existing FMR	30	92
- The income limit is decreased to the level at which 30 percent of a 4-person family's income would pay for a unit renting at 120 percent of the 2-bedroom FMR	6	77
<u>For Lower Income Limits based on on 80% of area median income:</u>		
- A minimum is set based on the State nonmetropolitan median family income	25	1,526
- The minimum is set at the Very Low Income Limit level if it would otherwise be lower	6 (all are in U.S. terri- tories)	5
- The maximum for a 4-person family is set at the higher of the U.S. median family income level of of \$35,700 or the State non-metro median income level.	22	11

In implementing the 1987 HCD Act amendment that directed the Department to establish minimum income limits for nonmetropolitan areas based on the State nonmetropolitan median family income level, the Department used its discretion to apply this standard to metropolitan areas. It did so because the new provision effectively redefined what the Congress had determined was an acceptable minimum Very Low-Income level, and to not apply this definition to the few metropolitan areas affected would have been inconsistent with the logic of the new provision.

Prior to passage of the 1987 HCD Act, the housing-cost-to-income adjustments outlined above produced higher income limits for about 400 nonmetropolitan counties. Most of these areas now have income limits based on the respective State nonmetropolitan median family income level.

Income Limit Applications:

HUD income limits apply to the following programs:

<u>Program</u>	<u>Income Limit Standard</u>
<u>HUD:</u> All Section 8 programs, including Section 202 Elderly and Handicapped units receiving Sec.8 assistance.	Very Low or Lower Income standards *
Public Housing	Very Low or Lower Income standards *
Section 235 Homeownership program	95 percent of area median family income or higher cost-based number, adjusted for family size
Section 236 rental	Lower Income standard
Section 221(d)(3)(BMIR) below market interest rate rental assistance program	95 percent of area median family income, adjusted for family size
Community Planning and Development programs	Very Low or Lower Income standards, depending on program.

Farmers Home Administration:

Rental and ownership assistance programs with income limits based on Section 8 income limits	Most assistance based on Lower or Very Low income standards, income limits the same as HUD's except for the Virgin Islands, which have a statutory exception.
-------------------------------------------------------------------------------------------------------	---------------------------------------------------------------------------------------------------------------------------------------------------------------------------

\* Section 16 of the 1937 Act governs which income limit standard applies.

Dept. of Treasury:

Low Income Rental Tax  
Credits and Tax-exempt  
Rental Housing Bonds

Current standard for 50% of median family income is the Very Low Income definition, and the current standard for 60% of median family income is 120% of the Very Low Income standard.

Tax-exempt Mortgage  
Revenue Bonds for  
ownership financing

Generally set at 115% of median family income, with adjustments up to 140% of median for high cost areas.

Resolution Trust Corporation:

Disposition of Multifamily  
Housing to Non-profit and  
Public Agencies

Not less than 35 percent of all dwelling units must be made available for occupancy by and affordable for "lower income families" and at least 20 percent must be made available for occupancy by and affordable for "very low income families." The affordability standard used is the rent amount that would be paid by a family paying 30 percent of income for rent whose income is 65 percent of median. The Resolution Trust Corporation has not yet defined how 65 percent of median is to be calculated.

Disposition of Single  
Housing

Priority is given to non-profit Family and public agencies that agree to make the dwellings available for occupancy by and affordable for Lower Income households; households who intend to occupy a dwelling as their primary residence whose adjusted income does not exceed 115 percent of the median income for the area, as determined by the Secretary of HUD, are given a purchase preference priority for the first 3-month period a property is made available for sale. The Resolution Trust Corporation has not yet defined how 115% of median is to be calculated.

Attachment 2

EXCERPTS FROM THE  
HOUSING ACT OF 1937  
(As Amended through 1987)

Section 3:

(b) When used in this Act:

(2) The term "lower income families means those families whose incomes do not exceed 80 per centum of the median income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceiling higher or lower than 80 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of prevailing levels of construction costs or unusually high or low family incomes. The term "very low-income families" means lower income families whose incomes do not exceed 50 per centum of the median family income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher or lower than 50 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of unusually high or low family incomes. Such ceilings shall be established in consultation with the Secretary of Agriculture for any rural area, as defined in section 520 of the Housing Act of 1949, taking into account the subsidy characteristics and types of programs to which such ceilings apply.

HCD Act of 1987 Amendment Affecting Section 3:

Section 567. Median Area Income

For purposes of calculating the median income for any area that is not within a metropolitan statistical area (as established by the Office of Management and Budget) for programs under title I of the Housing and Community Development Act of 1974, the United States Housing Act of 1937, the National Housing Act, or title V of the Housing Act of 1949, the Secretary of Housing and Urban Development or the Secretary of Agriculture (as appropriate) shall use whichever of the following is higher:

(1) the median income of the county in which the area is located;  
or

(2) the median income of the entire non-metropolitan area of the State.

Section 16:

(a) Not more than 25 per centum of the dwelling units which were available for occupancy under public housing annual contributions contracts under this Act before the effective date of the Housing and Community Development Amendments of 1981, and which will be leased on or after such effective date shall be available for leasing by lower income families other than very low-income families.

(b) Not more than 5 per centum of the dwelling units which became available for occupancy under public housing annual contributions contracts and section 8 housing assistance payments contracts under this Act on or after the effective date of the Housing and Community Development Amendments of 1981 shall be available for leasing by lower income families other than very low income families.

(c) In developing admission procedures implementing subsection (b), the Secretary may not totally prohibit admission of lower income families other than very low-income families, and shall establish, as appropriate, differing percentage limitations on admission of lower income families in separate assisted housing programs that, when aggregated, will achieve the overall percentage limitation contained in subsection (b). The Secretary shall issue regulations to carry out this subsection not later than 60 days after the date of the enactment of the Housing and community Development Act of 1987.

(d)(1) The limitations established in subsection (b) shall not apply to dwelling units made available under section 8 housing assistance contracts for the purpose of preventing displacement, or ameliorating the effects of displacement, including displacement caused by rents exceeding 30 percent of monthly adjusted family income, of lower income families from projects being rehabilitated with assistance from rehabilitation grants under section 17 and the Secretary shall not otherwise unduly restrict the use of payments under section 8 housing assistance contracts for this purpose.

(2) The limitations established in subsections (a) and (b) shall not apply to dwelling units assisted by Indian public housing agencies.

ATTACHMENT 3

HUD METHODOLOGY FOR ESTIMATING FY 1990 MEDIAN FAMILY INCOMES  
(ECONOMIC AND MARKET ANALYSIS DIVISION, OFFICE OF ECONOMIC AFFAIRS, PD&R)

The methodology used for estimating the FY 1990 median family incomes (MFIs) for all Metropolitan Statistical Areas (MSAs), Primary Metropolitan Statistical Areas (PMSAs), and nonmetropolitan counties is based on development of income update factors for each metropolitan area and nonmetropolitan Census County Group. These factors generally are then applied to 1980 Census median family income levels. For a small number of metropolitan areas where recent American Housing Surveys provide estimates of median family income that measurably differ from updated 1980 Census estimates, the AHS estimates are used as the basis for updating.

The income adjustment factors are developed in several steps based on the use of individual wage earner data from County Business Patterns (CBP) which are available for 1979 through 1986, Census Division MFIs from the Current Population Reports P-60 Series which are available for 1979 through 1987, a preliminary P-60 estimate for 1988, and HUD estimates for 1989 and the first part of 1990. The 1989 and 1990 estimates are based on trending P-60 family median income data. The step by step normal procedures as well as the exception procedures used are as follows:

- (1) The increase factors for wage increases are calculated for each Census Division for the 1979-1986 period.

$$\frac{\text{Census Division CBP Wages (1986)}}{\text{Census Division CBP Employees (1986)}} = 7\text{-year increase factor for Census Division CBP Wages}$$

$$\frac{\text{Census Division CBP Wages (1979)}}{\text{Census Division CBP Employees (1979)}}$$

- (2) The increase factors for the P-60 Series median family incomes are calculated for Census Divisions for the 1979-1987 period.

$$\frac{\text{Census Division P-60 MFI (1987)}}{\text{Census Division P-60 MFI (1979)}} = 8\text{-year increase factor for Census Division P-60 MFI}$$

- (3) The indices relating the County Business Patterns data to the P-60 Series data are calculated for the Census Divisions by deriving the ratios of the P-60 Series factors to the County Business Patterns factors.

$$\frac{\text{8-year increase factor for Census Division P-60 MFI}}{\text{7-year increase factor for Census Division CBP Wages}} = 8\text{-year to 7-year ratio of Census Division P-60 MFI to Census Division CBP wages}$$

- (4) The increase factors for the individual metropolitan areas and nonmetropolitan counties are calculated by applying the index factors developed for the Census Division to the County Business Patterns data.

<u>MSA CBP Wages (1986)</u>			
MSA CBP Employees (1986)	x	8- to 7-year ratio of Census Division P-60 MFI to Census Division CBP wages	= 8-year income adjustment factor for MSA or County Group
<u>MSA CBP Wages (1979)</u>			
MSA CBP Employees (1979)			

- (5) An average annual increase of 4.3 percent is used for 1988, based on P-60 data. A projected increase of 5.0 percent in MFI is used for calendar year 1989, and an average increase of 3.75 percent (3/4 of the 5 percent estimate) is used for the following nine months to obtain a mid-FY 1990 estimate. Use of projected increases for the 1988 through March 1990 period is necessary because of the lag in County Business Patterns and P-60 Series data.

(8-year income adj.)	10-year 9-month income
(factor for MSA ) x 1.043 x 1.05 x 1.0375 =	adjustment factor for
(or County Group )	MSA or Non-MSA county

- (6) Calculation of the median family incomes for FY 1990 is completed by multiplying the 1979 median family income obtained from the 1980 census by the income adjustment factor derived in step (5).
- (7) If the estimated median family income for FY 1990 is less than the estimate published for FY 1989, the median published for FY 1990 is the same as that published in 1989. Increases are capped at ten percent, unless there is multi-year evidence of a significant differential.
- (8) For areas where estimates based on the above procedures differ significantly from those based on current metropolitan American Housing Survey-based estimates updated using CBP and P-60 data, the estimates developed using the above procedures were modified so that they did not differ by more than 6 percent from the AHS-based estimates. A 6 percent range was selected because the true median family income level for an area is unlikely to be outside of a 6 percent range from an AHS-based estimate.
- (9) For one nonmetropolitan county, Saunders County, Nebraska, the median family income estimate was revised based on the rate of change in wages for the two adjoining metropolitan areas where a large portion of the county's work force is employed.

---

NOTE: In step (4) use MSA or Census County Group data as appropriate for 1979 and 1986.

Attachment 4

Evaluation of Method Used to Estimate 1983 Median Family Incomes

Procedure:

- 1) The 1969 median incomes from the 1970 Census were updated to 1979 and matched with 1980 Census median incomes.
- 2) Data from 1969 and 1979 County Business Patterns and income estimates from March 1970 and 1980 current population surveys were used to update median incomes from 1970 Census in the same manner that current estimates are calculated.
- 3) The only difference in the updating procedure used is that data are available for the entire 1969-1979 period; we estimated the most recent two years because data are not yet available.

Findings:

- 1) The national standard error is \$1,826 on a base of \$20,000 during a period when family income changed by more than 100 percent. When incomes are weighted by number of families in an SMSA or non-metro county, the standard error is reduced to \$1,279.

Standard Error Estimates

<u>U.S. and Census Divisions</u>	<u>Weighted by No. Families</u>	<u>Unweighted</u>
U.S.	\$1,279	\$1,826
New England	1,335	1,617
Middle Atlantic	1,587	1,406
East North Central	931	1,331
West North Central	1,085	1,569
South Atlantic	1,198	1,681
East South Central	1,344	1,665
West South Central	1,482	1,998
Mountain	1,664	2,722
Pacific	1,083	2,646

- 2) 94 percent of all SMSA estimates were within 10 percent of the 1980 Census medians and all but one (Melbourne, Florida) of the SMSAs were within 20 percent. For non-SMSA counties, the range of errors were 67 percent of the counties within 10 percent and 92 percent of the counties within 20 percent. Areas which had the largest errors have one of two characteristics:
  - a) A very small count of families. Approximately 55 percent of all counties have a count of families below 5,000; and 177 counties have less than 1,000 families. The smallest are Loving, Texas and Yellowstone National Park with 28 and 66 families; our estimates for both of the areas were off by more than 20 percent.
  - b) Areas of unusually low income as reported in the 1970 Census. 260 counties had incomes in 1969 below \$5,000. In all of these counties, our estimates understated incomes by more than 20 percent.

AREAS WHERE MEDIAN FAMILY INCOME ESTIMATES  
HAVE BEEN ADJUSTED WITH AMERICAN HOUSING SURVEY DATA

<u>AREA</u>	<u>FY 1989 MEDIAN FAMILY INCOME</u>	<u>AHS-MODIFIED FY 1990 MEDIAN FAMILY INCOME*</u>	<u>1980 CENSUS-BASED FY 1990 MEDIAN FAMILY INCOME</u>
Chicago, IL	\$41,700	\$43,400	\$44,100
St. Louis, MO	\$37,200	\$37,300	\$39,000
Bergen-Passiac, NJ	\$44,300	\$48,000	\$47,200
Jersey City, NJ	\$29,900	\$32,100	\$31,500
Columbus, OH	\$34,900	\$36,100	\$36,500
Houston, TX	\$41,000	\$41,000	\$42,200

---

\* It was assumed that the FY 1990 estimates based on 1980 Census data updated with County Business Patterns and Census P-60 data would be used unless they differed by more than 6 percent from American Housing Survey-based estimates for 1990. In the six cases where the estimates varied by more than 6 percent, the FY 1990 medians were revised so that they did not differ by more than 6 percent from the 1980 Census based estimates. Use of a 6 percent range was based on a comparison of 1980 Census and 1980 American Housing Survey median family income estimates, which indicated that the median differential was less than 1.5 percent in 1980 and that the maximum differential was less than 6 percent.

Handwritten mark or signature at the top center.
